

Table of contents

1	Introduction	1
1.1	Biocatalysis	1
1.2	Biocatalysis in non-aqueous media	1
1.2.1	Biocatalysis with enzymes in organic solvents	3
1.2.2	Bacterial whole-cell biocatalysis in organic solvents	5
1.3	Cytochrome P450 monooxygenases	7
1.3.1	The Third P450 monooxygenase from <i>Bacillus megaterium</i> (BM3).....	8
1.3.2	Catalytic cycle of BM3	9
1.3.3	BM3 catalyzed selective hydroxylation of benzenes and steroids	10
1.4	Microgels	11
1.5	Antimicrobial peptides (adhesion peptides)	12
1.6	SpyTag/SpyCatcher system.....	14
1.7	Artificial metalloenzymes.....	16
1.7.1	Nitrobindin (NB)	17
2	Objectives	19
3	Materials and methods	21
3.1	Chemicals.....	21
3.2	Enzymes and kits	21
3.3	Devices and software.....	21
3.4	Strains and plasmids.....	23
3.5	Cultivation media and additives	23
3.6	Cloning	24
3.6.1	PCR, digestion, and ligation	24
3.6.2	Site-directed mutagenesis	25
3.6.3	Transformation.....	25
3.6.4	Cryopreservation and DNA isolation	26
3.7	Protein production	26
3.7.1	Shake flask expression and cell harvest	26
3.7.2	Stirred-tank reactor cultivation	27
3.8	Protein purification	27
3.8.1	Affinity chromatography.....	27
3.8.2	Ion-exchange chromatography.....	28
3.9	Surface functionalization of <i>E. coli</i>	28
3.9.1	Binding of adhesion peptide fusion proteins to <i>E. coli</i> cells.....	28
3.9.2	Binding of MH to <i>E. coli</i> cells from lysates.....	29
3.9.3	Detaching MH from <i>E. coli</i> cell and re-attachment	29
3.9.4	Labeling of NB4-MH fusion proteins.....	30
3.9.5	ThioGlo conjugation.....	30

3.9.6	Characterization of the cell-binding of adhesion peptides	30
3.10	Surface functionalization of microgels	31
3.10.1	Quantification of proteins on SpyCatcher-microgels	32
3.10.2	Survival assay of <i>E. coli</i> cells	33
3.11	Computational methods	34
3.12	Catalysis	34
3.12.1	P450 catalyzed hydroxylation of BCCE	34
3.12.2	P450 catalyzed hydroxylation of aromatic compounds	35
3.12.3	P450 catalyzed hydroxylation of testosterone	36
3.12.4	On-cell epoxidation of <i>trans</i> - β -methylstyrene	36
3.12.5	BSLA catalyzed hydrolysis of <i>p</i> NPB	37
3.12.6	Dye decolorization and MnPPIX@NB4H recycling	37
3.13	Analytical methods	38
3.13.1	Optical density and concentration of DNA and protein	38
3.13.2	Sodium dodecyl sulfate-polyacrylamide gel electrophoresis	38
3.13.3	Agarose gel electrophoresis	39
3.13.4	Confocal microscopy	39
3.13.5	CD-spectroscopy	40
3.13.6	Quantification of P450 by (CO)-difference spectra	40
3.13.7	High-Performance Liquid Chromatography (HPLC)	40
3.13.8	Gas Chromatography (GC) sample preparation	42
3.13.9	Gas Chromatography (GC) measurements	42
4	Results and discussion	44
4.1	Stabilization of <i>E. coli</i> in organic solvents	44
4.1.1	Enzyme selection and construct generation	47
4.1.2	Substrate selection and establishment of analytical methods	49
4.1.3	Binding of microgels to <i>E. coli</i> cells via eGFP-adhesion peptides	51
4.1.3.1	Adhesion peptide selection, production, and purification	52
4.1.3.2	Evaluation of the binding of adhesion peptides to <i>E. coli</i> cells	54
4.1.3.3	Conjugation of eGFP-MH(f) to microgels and addition to <i>E. coli</i>	56
4.1.3.4	Whole-cell biocatalysis with microgel-MHf-conjugates	57
4.1.4	Crosslinked microgel-MH conjugates	58
4.1.4.1	Generation of Cys-SpyC, SpyT-GB1-MH, and SpyT-GB1-SpyT	59
4.1.4.2	Quantification of immobilized protein on microgel	61
4.1.4.3	Testing the stabilizing effect of microgel-coverage on cells	62
4.1.4.4	Whole-cell biocatalysis with crosslinked microgel-MH conjugates	63
4.1.5	Covalent anchoring of microgels to cells	65
4.1.5.1	Generation of CSD-SpyC and Cys-GB1-SpyT	65
4.1.5.2	Effect of covalently linked microgels on <i>E. coli</i> cells	68
4.1.5.3	Whole-cell biocatalysis with covalently bound microgels	69
4.1.6	Conclusion	71
4.2	Adhesion peptide-based on-cell catalysis	72

4.2.1	Computational analysis of the binding of MH to <i>E. coli</i>	74
4.2.2	Characterization of the binding of eGFP-MH to <i>E. coli</i>	75
4.2.3	Generation and characterization of NB4H-MH	78
4.2.4	On-cell catalysis.....	80
4.2.5	Conclusion	82
4.3	Selective immobilization of ArMs on microgels.....	83
4.3.1	Generation of NB4H-SpyT.....	85
4.3.2	Conjugation of NB4H-SpyT to microgels.....	85
4.3.3	Microgel-based recycling of NB4H@MnPPIX	86
4.3.4	Conclusion	88
5	Lessons learned	89
6	Summary	90
7	References	92
8	Appendix	106
8.1	Calibration curves	106
8.2	Protein purification chromatograms	107
8.3	Oligonucleotides, plasmids, and synthetic genes	108
8.4	Purified proteins	112
8.5	Sequences of enzymes used for catalysis.....	114
8.6	Buffers.....	115
8.7	List of abbreviations	115
8.8	List of figures.....	118
8.9	List of tables	120
8.10	List of equations	121
9	Publication summary	122
10	Eidesstattliche Erklärung	124
