

# Contents

<b>1</b>	<b>Snapshots from the History</b> .....	1
1.1	The Braid Group .....	2
1.2	The Fundamental Sequence of Fibrations.....	3
1.3	Artin's Presentation of $\mathcal{B}_n$ and $\pi_1(F(\mathbb{R}^2, n))$ .....	5
1.4	The Cohomology Ring $H^*(F(\mathbb{R}^2, n); \mathbb{Z})$ .....	7
1.5	The Cohomology of the Braid Group $\mathcal{B}_n$ .....	9
1.6	The Cohomology Ring $H^*(\mathcal{B}_n; \mathbb{F}_2)$ .....	10
1.7	Cohomology of Braid Spaces.....	12
1.8	Homology of Unordered Configuration Spaces.....	16
<b>Part I Mod 2 Cohomology of Configuration Spaces</b>		
<b>2</b>	<b>The Ptolemaic Epicycles Embedding</b> .....	23
<b>3</b>	<b>The Equivariant Cohomology of <math>Pe(\mathbb{R}^d, 2^m)</math></b> .....	33
3.1	Small Values of $m$ .....	33
3.2	The Case $m = 2$ .....	34
3.3	Cohomology of $(X \times X) \times_{\mathbb{Z}_2} S^{d-1}$ and $(X \times X) \times_{\mathbb{Z}_2} EZ_2$ .....	39
3.4	The Induction Step .....	49
3.5	The Restriction Homomorphisms – Three Aspects.....	52
3.5.1	A Restriction Homomorphism and the Mui Invariants.....	52
3.5.2	A Restriction Homomorphism and the Dickson Invariants .....	54
3.5.3	Two Lemmas .....	58
<b>4</b>	<b>Hung's Injectivity Theorem</b> .....	63
4.1	Critical Points in Hung's Proof of His Injectivity Theorem.....	64
4.2	Proof of the Injectivity Theorem .....	75
4.2.1	Prerequisites .....	77
4.2.2	Proof of the Dual Epimorphism Theorem .....	84
4.3	An Unexpected Corollary .....	87
4.3.1	Motivation .....	87
4.3.2	Corollary .....	89

## Part II Applications to the (Non-)Existence of Regular and Skew Embeddings

<b>5</b>	<b>On Highly Regular Embeddings: Revised</b> .....	95
5.1	$k$ -Regular Embeddings .....	96
5.2	$\ell$ -Skew Embeddings .....	113
5.3	$k$ -Regular- $\ell$ -Skew Embeddings .....	128
5.4	Complex Highly Regular Embeddings .....	132
<b>6</b>	<b>More Bounds for Highly Regular Embeddings</b> .....	137
6.1	Examples of $\mathcal{S}_{2^m}$ -Representations and Associated Vector Bundles .....	137
6.1.1	Examples of $\mathcal{S}_{2^m}$ -Representations .....	138
6.1.2	Associated Vector Bundles .....	138
6.2	The Key Lemma and its Consequences .....	140
6.3	Additional Bounds for the Existence of Highly Regular Embeddings .....	148
6.4	Additional Bounds for the Existence of Complex Highly Regular Embeddings .....	157

## Part III Technical Tools

<b>7</b>	<b>Operads</b> .....	163
7.1	Definition and Basic Example .....	163
7.2	$O$ -Space .....	166
7.3	Little Cubes Operad .....	167
7.4	$C_d$ -Spaces, An Example .....	169
7.5	$C_d$ -Spaces, a Free $C_d$ -Space Over $X$ .....	170
7.6	Araki–Kudo–Dyer–Lashof Homology Operations .....	171
<b>8</b>	<b>The Dickson Algebra</b> .....	173
8.1	Rings of Invariants .....	173
8.2	The Dickson Invariants as Characteristic Classes .....	176
<b>9</b>	<b>The Stiefel–Whitney Classes of the Wreath Square of a Vector Bundle</b> .....	179
9.1	The Wreath Square and the $(d - 1)$ -Partial Wreath Square of a Vector Bundle .....	179
9.2	Cohomology of $B(S^2\xi) = S^2B(\xi)$ .....	181
9.3	The Total Stiefel–Whitney Class of the Wreath Square of a Vector Bundle .....	183
<b>10</b>	<b>Miscellaneous Calculations</b> .....	187
10.1	Detecting Group Cohomology .....	187
10.2	The Image of a Restriction Homomorphism .....	188
10.3	Weyl Groups of an Elementary Abelian Group .....	192

10.4	Cohomology of the Real Projective Space with Local Coefficients .....	194
10.5	Homology of the Real Projective Space with Local Coefficients .....	197
<b>References</b>	.....	<b>201</b>
<b>Index</b>	.....	<b>207</b>
