

TABLE OF CONTENTS

	Page
ABSTRACT	i
ACKNOWLEDGMENTS	iv
DEDICATION	vii
PREFACE	viii
LIST OF TABLES	xvi
LIST OF FIGURES	xix
CHAPTER 1: LINEAR REGRESSION	1
The Unstandardized Regression Model	2
The Standardized Regression Model	5
R and R ²	10
Assumptions	11
Properties	12
Normal Linear OLS Regression	13
Robustness and Potential Sources of Multicollinearity	14
The Geometry of Least Squares	16
CHAPTER 2: RELATED UNIVARIATE TECHNIQUES	24
Variable Selection Methods	26
Nonlinear Variables	30
Discrete Dependent Variables	31
Analyses of Variance	38
Classification Procedures: Two Group Discriminant Analysis	41

	Page
CHAPTER 3: RELATED MULTIVARIATE TECHNIQUES	47
Multivariate Multiple Regression	48
Multivariate Tests of Significance	49
Orthogonalizing Procedures	55
Canonical Procedures	61
CHAPTER 4: MULTICOLLINEARITY-DEFINITION AND SIGNIFICANCE	68
Definition	71
Causes	73
Effects of Multicollinearity	74
The Geometry of Multicollinearity	88
Impact on Related Univariate Techniques	92
Impact on Related Multivariate Procedures	95
CHAPTER 5: MULTICOLLINEARITY - ASSESSMENT AND REMEDIATION	98
Assessment	99
Remediation	111
CHAPTER 6: THE SAMPLING DEFICIENT MODEL	129
CHAPTER 7: THE OVERDEFINED MODEL	164
CHAPTER 8: THE PHYSICALLY CONSTRAINED MODEL	193
CHAPTER 9: CONCLUSIONS AND RECOMMENDATIONS	216
BIBLIOGRAPHY	220
