Preface	p
Contributors	ix
1 A Bioinformatics Workflow for Investigating Fungal Biosynthetic Gene Clusters	1
<i>Jorge C. Navarro-Muñoz and Jérôme Collemare</i>	
2 Investigating Fungal Biosynthetic Pathways Using Heterologous Gene Expression: <i>Aspergillus oryzae</i> as a Heterologous Host	23
<i>Kate M. J. de Mattos-Shiple, Colin M. Lazarus, and Katherine Williams</i>	
3 Investigating Fungal Biosynthetic Pathways Using Heterologous Gene Expression: <i>Aspergillus nidulans</i> as a Heterologous Host	41
<i>Danielle A. Yee and Yi Tang</i>	
4 Investigating Fungal Biosynthetic Pathways Using Heterologous Gene Expression: <i>Fusarium</i> sp. as a Heterologous Host	53
<i>Mikkel Rank Nielsen and Jens Laurids Sørensen</i>	
5 Heterologous Expression of Fungal Biosynthetic Pathways in <i>Aspergillus nidulans</i> Using Episomal Vectors	75
<i>Indra Roux and Yit Heng Chooi</i>	
6 Targeted Genetic Engineering via <i>Agrobacterium</i> -Mediated Transformation in <i>Fusarium solani</i>	93
<i>Mikkel Rank Nielsen, Samba Evelyne Kabemba Kaniki, and Jens Laurids Sørensen</i>	
7 Investigating Fungal Biosynthetic Pathways Using <i>Pichia pastoris</i> as a Heterologous Host	115
<i>Zhilan Qian, Qi Liu, and Mengbao Cai</i>	
8 Evolutionary Genome Mining for the Discovery and Engineering of Natural Product Biosynthesis	129
<i>Marc G. Chevrette, Nelly Selem-Mojica, César Aguilar, Kristin Labby, Edder D. Bustos-Díaz, Jo Handelsman, and Francisco Barona-Gómez</i>	
9 Inducing Global Expression of Actinobacterial Biosynthetic Gene Clusters	157
<i>Meghan A. Pepler, Xiafei Zhang, Hindra, and Marie A. Elliot</i>	
10 Engineering Modular Polyketide Biosynthesis in <i>Streptomyces</i> Using CRISPR/Cas: A Practical Guide	173
<i>Jean-Malo Massicard, Li Su, Christophe Jacob, and Kira J. Weissman</i>	
11 CRISPR/Cas9-Based Methods for Inactivating Actinobacterial Biosynthetic Genes and Elucidating Function	201
<i>Audam Cbbun and Fabrizio Alberti</i>	

Contents

12	Understanding and Manipulating Assembly Line Biosynthesis by Heterologous Expression in <i>Streptomyces</i>	223
	<i>Lihan Zhang, Takayoshi Awakawa, and Ikuro Abe</i>	
13	Heterologous Expression, Purification, and Characterization of Type II Polyketide Synthase Acyl Carrier Proteins	239
	<i>Grayson S. Hamrick, Casey H. Londergan, and Louise K. Charkoudian</i>	
14	Cyanobacterial Genome Sequencing, Annotation, and Bioinformatics	269
	<i>Jonna Teikari, Martin Baunach, and Elke Dittmann</i>	
15	Single Crossover to Inactivate Target Gene in Cyanobacteria	289
	<i>Jaimie Gibbons, Liping Gu, Yeyan Qiu, and Ruanbao Zhou</i>	
16	Double Crossover Approach to Inactivate Target Gene in Cyanobacteria	299
	<i>Jaimie Gibbons, Liping Gu, and Ruanbao Zhou</i>	
17	Expression of Cyanobacterial Biosynthetic Gene Clusters in <i>Escherichia coli</i>	315
	<i>Alescia Cullen, Matthew Jordan, and Brett A. Neilan</i>	
18	<i>Saccharomyces cerevisiae</i> as a Heterologous Host for Natural Products	333
	<i>Maximilian Otto, Dany Liu, and Verena Siewers</i>	
19	Investigating Plant Biosynthetic Pathways Using Heterologous Gene Expression: Yeast as a Heterologous Host	369
	<i>Shanhui Xu, Sheng Wu, and Yanran Li</i>	
20	Rapid Combinatorial Coexpression of Biosynthetic Genes by Transient Expression in the Plant Host <i>Nicotiana benthamiana</i>	395
	<i>Ling Chuang and Jakob Franke</i>	
21	Optimized Tools and Methods for Methanotroph Genome Editing	421
	<i>Sreemoye Nath, Jessica M. Henard, and Calvin A. Henard</i>	
22	Microarray-Based Screening of Putative HSP90 Inhibitors Predicted and Isolated from Microorganisms	435
	<i>Anusha Kishore, Artem Fetter, and Carsten Zeilinger</i>	
23	Isolation of Water-Soluble Metabolites from Marine Invertebrates and Microorganisms	449
	<i>Lamonielli F. Michaliski, Darlon I. Bernardi, and Roberto G. S. Berlinck</i>	
24	Natural Product Investigation in Lichens: Extraction and HPLC Analysis of Secondary Compounds in Mycobiont Cultures	459
	<i>Muthukumar Srinivasan, Karthik Shanmugam, and Hariharan Gopalsamudram Neelakantan</i>	
	<i>Index</i>	469
