1 Complex rehabilitation in an interdisciplinary team context	1
<i>Jo Haworth and Helen O'Leary</i>	
Aim	2
Objectives	2
Overview	2
What do we mean by 'rehabilitation'?	3
A framework for defining rehabilitation	5
Models of rehabilitation	10
Team working in rehabilitation	11
The clinical rehabilitation pathway	14
Summary	16
References	16
2 Medical management in rehabilitation	18
<i>Helen Banks and Ganesh Bavikatte</i>	
Aims	19
The role of the doctor within the specialist rehabilitation team	19
Medical causes of complex disability	20
The medics role in symptom management	25
Medical urgencies encountered in specialist rehabilitation	31
Prognosis	35
Summary	37
References	37
3 The role, impact, and reflections of the rehabilitation nurse	39
<i>Nicola Hill</i>	
Aims	39
Introduction	40
Definition, roles, and responsibilities of a rehabilitation nurse	40

Family and carer support	41
Formulating nursing goals and assessing outcomes	44
Caring for patients with reduced mental capacity	45
Discharge planning	46
Community rehabilitation nurse	47
Development of the rehabilitation nurse role	48
Summary	49
References	49
4 Prolonged disorders of consciousness	50
<i>Mary Ankers</i>	
Aims	51
What is a prolonged disorder of consciousness?	51
Assessment approaches within a pathway model of rehabilitation	55
Challenges in providing assessment, care, and treatment for PDOC	60
Evolving and innovative practice in PDOC diagnosis	62
Developing effective and evidence-based team working for PDOC	63
Summary	64
References	65
5 24-hour approach to physical management	67
<i>Emily Wilson-Meredith and Emily Low</i>	
Aims	68
Introduction	68
Physical consequences of injury/illness	69
The role of the interdisciplinary team in 24-hour physical management	75
Physical management modalities	76
Summary	84
References	85
6 Adjusting to life after illness or injury	86
<i>Cara Pelsler</i>	
Aims and objectives	86
What do we mean by adjustment?	87
Using models of adjustment and grief to understand emotional reactions to injury	88
Factors impacting the adjustment process	92
The impact of psychological factors on interdisciplinary team rehabilitation	95
Positive adaptation and growth	97
The impact of injury or illness on the family	98
Supporting patients and families; what can we do to help?	99
Summary	101
References	101

7	Mental health in complex rehabilitation	103
	<i>Antonio Swaraj DaCosta and Jon Alan Smith</i>	
	Aims	104
	Introduction	104
	Psychiatry within a rehabilitation setting	104
	What is 'mental health' and how do we assess it?	106
	Environmental influences	107
	Psychotropic medications and their role in rehabilitation	108
	Incidences of risk in rehabilitation	109
	The Mental Capacity Act and the Mental Health Act	111
	Mental health illnesses in complex rehabilitation	112
	Summary	117
	References	117
8	Working with behaviour that challenges	119
	<i>Peter Kinsella</i>	
	Aims and objectives	120
	What do we mean by 'behaviour that challenges'?	120
	Why does it occur?	122
	Assessment of behaviour from an interdisciplinary perspective	124
	Methods of assessment	125
	'There are no triggers'	126
	Supporting the person with behaviour that challenges	127
	Behavioural approaches	127
	Antecedent approaches	128
	Consequential approaches; responses to behaviour	130
	Therapeutic relationships and communication	131
	Psychological therapy	132
	Reflections on learning; working with behaviour that challenges	133
	Summary	134
	References	134
9	Cognition; an assessment and rehabilitation	137
	<i>Nicola Branscombe, Stephen Mullin, Cara Pelsler, and Wendy Owen</i>	
	Aims	138
	Introduction	138
	Attention	142
	Memory	146
	Rehabilitation of memory	148
	Perception	151
	Rehabilitation of cognitive–perceptual impairment	153
	Apraxia	153
	Cognitive fatigue	154
	Management of fatigue	155
	Executive functions	155

Executive function in daily life	156
Rehabilitation of executive dysfunction	159
Summary	160
References	160
10 Communication disorders in rehabilitation: an interdisciplinary approach	164
<i>Elaine Bailey and Lisa Barklin</i>	
Aim	165
Overview	165
Definition of communication	165
Role of speech and language therapists	165
The communication cycle	166
The impact of communication disorders	167
Definition of a communication disorder	167
Types of communication disorders	168
The impact of communication disorders on the patient and their family	171
Supporting families	174
IDT working	174
Supporting communication for mental capacity assessments	175
Assistive technology and alternative and augmentative communication	180
Summary	183
References	183
11 Dysphagia in rehabilitation: an interdisciplinary approach	185
<i>Elaine Bailey and Lisa Barklin</i>	
Aims and objectives	186
Overview	186
Definition	186
Incidence	186
Mechanism of swallowing	187
Causes of dysphagia	189
Assessment of dysphagia	189
The effect of dysphagia on the rehabilitation journey	190
Rationale for IDT working	191
Interdisciplinary management of dysphagia	191
Managing risk	196
Key learning points	198
References	199

12	Nutrition and dietetics in rehabilitation	201
	<i>Joanne Sim and Rachel K. Taylor</i>	
	Aims	202
	Objectives	202
	Nutrition and dietetics in rehabilitation	202
	Nutritional aims during rehabilitation	202
	Nutrition support	204
	Other nutritional considerations in rehabilitation	208
	Factors affecting weight gain and strategies to improve outcomes	209
	Dietetics role within the IDT	213
	Ethical/difficult decisions about nutrition	216
	Summary	219
	References	220
13	Early vocational rehabilitation within an interdisciplinary context	222
	<i>Ray Langford</i>	
	Aim	223
	Objectives	223
	Introduction	223
	Models of service delivery	224
	Embedding vocational rehabilitation practice into the interdisciplinary team	226
	Specialist vocational rehabilitation	227
	Providing patient-centred vocational rehabilitation	228
	Vocational rehabilitation interventions	229
	Summary	233
	References	234
14	A patient's perspective	235
	<i>Elly Milton and Marie Milton</i>	
	Introduction	235
	Elly's story	236
	Marie's story	237
15	Supporting the socioeconomic needs of patients and their families within the context of a complex rehabilitation setting: creating opportunities through collaboration, rehabilitation, and beyond	242
	<i>Claire Hendry and Erin M. Beal</i>	
	Aims	243
	Introduction	243
	Risk factors and prevalence	244

x Contents

The socioeconomic impacts of major injury and illness	245
The wider impact on family networks	247
Multiagency working: supporting the multifaceted needs of patients and families	248
The Life-Link Clinic	250
Summary	252
References	254
16 Conclusion	258
<i>Cara Pelser, Angela Harrison, Ganesh Bavikatte, and Helen Banks</i>
