CONTENTS

Foreword.....	xi
Preface.....	xv
About the Author	xvii
List of Acronyms	xix
1. What is a pandemic?	1
Overview	
Definition	
Notable pandemics	
Nomenclature	
Pandemic influenza	
Pandemic-related stressors	
Effects on the healthcare system	
Economic costs	
How do pandemics spread?	
Socioeconomic factors	
Goals of this volume	
2. Contemporary methods for managing pandemics	15
Overview	
Risk communication	
Pharmacological treatments	
Hygiene practices	
Social distancing	
Conclusion	
3. Psychological reactions to pandemics	23
Importance of psychological factors	
Emotional reactions to threats of harm, loss, and change	
The desperate pursuit of quack cures and folk remedies	
Civil unrest, rioting, and mass panic	

Immunologically induced psychological reactions	
Interactions between stress and the immune system	
Conclusion	
4. Personality traits as emotional vulnerability factors.....	39
Vulnerability to emotional distress	
Personality traits	
Negative emotionality	
Trait anxiety and harm avoidance	
Overestimation of threat	
Intolerance of uncertainty	
Monitoring versus blunting	
Unrealistic optimism bias	
Other personality traits	
Conclusion	
5. Cognitive-behavioral models of health anxiety.....	49
What is health anxiety?	
Misinterpretations of health-related stimuli	
Beliefs about health and disease	
Focus of attention	
Adaptive and maladaptive coping	
Treating health anxiety	
Conclusion	
6. The behavioral immune system.....	57
Detection and avoidance of sickly others	
Perceived vulnerability to disease	
Disgust sensitivity	
Pathogens and prejudice	
Implications for naming diseases	
Conclusion	
7. Conspiracy theories.....	63
What are conspiracy theories?	
Medical conspiracy theories	
Causes and correlates of conspiratorial thinking	
Methods for reducing conspiratorial thinking	
Conclusion	

8. Social psychological factors	69
How do beliefs and fears spread through social networks?	
Rumors	
Observational learning	
News media	
Social media	
Social media and vaccination attitudes	
Conclusion	
9. Improving risk communication.....	79
Goals of risk communication	
Logical versus emotional appeals	
Promoting adherence by evoking fear?	
Psychological distance influences perceived risk	
Managing rumors	
Conclusion	
10. Improving vaccination adherence.....	87
Negative beliefs about vaccination	
Factors contributing to vaccination hesitancy	
Changing vaccination attitudes	
Do it for the herd	
Targeting superspreaders	
Treating injection phobia	
Is mandatory vaccination a viable option?	
Conclusion	
11. Treating pandemic-related emotional distress.....	99
A screen-and-treat approach	
Screening methods	
Interventions for pandemic-related distress	
Stress management advice for the general public	
Helping the helpers	
Conclusion	
12. General conclusions and future directions.....	107
A portrait of the next pandemic	
Managing future pandemics	
A roadmap for future research
