A NOTE ON NOTATION xvi

LIST OF ABBREVIATIONS AND SYMBOLS xvii

**Part I INTRODUCTION AND SUMMARY**

Introduction 1

1. INTRODUCTION 2
   - **1.1 Background** 2
   - **1.2 The structure of the book** 4
   - **1.3 Chapter guide for the policy economist** 5
   - **1.4 Introduction for the economic theorist** 5
     - 1.4.1 Welfare analysis and the competitive paradigm 5
     - 1.4.2 Contributions to the analysis of incomplete risk markets 6
   - **1.5 Introduction for the agricultural economist** 8
   - **1.6 Caveats and limitations** 10

2. THE MAIN ISSUES 12
   - **2.1 Background to the problem** 12
   - **2.2 Objectives of commodity price stabilization schemes** 12
     - 2.2.1 Raising average prices and incomes 14
     - 2.2.2 Market access and tariff reform 14
     - 2.2.3 Reducing the risks faced by producers 15
     - 2.2.4 Macro-stabilization and development 15
     - 2.2.5 Reducing the risks faced by consumers 16
     - 2.2.6 Revenue raising 16
   - **2.3 Differences between our approach and earlier studies** 17
     - 2.3.1 The meaning, consequences, and costs of risk 18
     - 2.3.2 Short-run versus long-run impacts 19
     - 2.3.3 General equilibrium incidence of stabilization 19
     - 2.3.4 Macroeconomic effects 19
     - 2.3.5 Other market distortions 20
     - 2.3.6 General functional specification and the biases of conventional parameterizations 20
     - 2.3.7 Dynamic analysis 21
     - 2.3.8 Partial versus complete stabilization programmes 21

2.3.9 Distributional versus efficiency effects 21
2.3.10 Information and expectations 21
2.3.11 Comparison with other instruments 22

3. SUMMARY OF FINDINGS 23
**3.1 Perfect market hypothesis** 24
**3.2 Benefits of price stabilization** 25
3.2.1 The meaning of risk and the effects of price stabilization on the riskiness of agricultural income 26
3.2.2 The effects of price stabilization on the variability of output 29
3.2.3 Effects of price stabilization on mean income 30
3.2.4 Effects of price stabilization on consumers 33
3.2.5 The infeasibility of total stabilization and the desirability of partial stabilization schemes 34
3.2.6 Macroeconomic benefits 35
**3.3 The costs of commodity price stabilization schemes** 36
3.3.1 Responses of the private sector to a commodity price stabilization scheme 37
3.3.1.1 The substitution of public for private storage 37
3.3.1.2 Production decisions of farmers 38
3.3.2 The costs of stabilization in a dynamic stochastic setting 39
**3.4 Some alternative proposals** 39
3.4.1 The establishment of better futures markets 41
3.4.2 The income stabilization scheme 42
3.4.3 The establishment of better borrowing facilities for producing countries 43
3.4.4 The establishment of better credit markets within LDCs 43
**3.5 The empirical results** 43

4. STATEMENT OF THE PROBLEM 47
**4.1 The causes of price variability** 47
4.1.1 Demand variability 49
4.1.1.1 Systematic demand variability 49
4.1.1.2 Non-systematic demand variability 49
4.1.2 Supply variability 50
4.1.2.1 Systematic supply variability 50
4.1.2.2 Non-systematic supply variability 51
4.1.3 Arbitrageurs and speculators 51
4.1.4 Government 52
**4.2 Consequences of commodity price stabilization** 52

Part II FUNDAMENTALS: SUPPLY AND DEMAND UNDER RISK

Introduction 57

5. COMPETITIVE SUPPLY WITH RISK-NEUTRAL FARMERS 59
5.1 Introduction 59
5.2 Competitive supply without risk 60
5.3 Competitive supply with risk-neutral farmers 63
5.3.1 Pitfalls in graphical analysis 67

6. SUPPLY WITH RISK-AVERSE FARMERS 69
6.1 Introduction 69
6.2 The meaning of risk aversion 69
6.2.1 Measuring risk aversion 72
6.2.2 Parameterizing utility functions 73
6.3 Measures of risk 76
6.4* Comparative statics of risk analysis 80
6.4.1 Effect of risk on effort 81
6.4.2 Effect of risk on welfare 83
6.4.3 Stability and comparative statics 83
6.5 Mean-variance analysis 85
6.5.1* Properties of the log-normal distribution 88
6.5.2 Quadratic approximations and Taylor series expansions 90
6.6 Measuring the benefits of price and income stabilization 92

7. EMPIRICAL MEASUREMENTS OF PRODUCERS' ATTITUDES TO RISK 96
7.1 Distinguishing among alternative hypotheses 96
7.1.1 Risk-taking in a multi-period context 99
7.2 Empirical evidence 100
7.3 Experimental determination of attitudes to risk 101
7.3.1 Interpreting the evidence 103
7.4 Other empirical studies of attitudes to risk 105
7.5 The magnitude of income risk 108

8. THEORY OF CONSUMER DEMAND 111
8.1 Introduction 111
8.2* Duality, indirect utility functions, and the expenditure function 112
8.3* Attitudes towards risk 116
8.4 The specification of demand risk and utility functions 118

9.* CONSUMER BENEFITS OF PRICE STABILIZATION 122
9.1 Introduction 122
9.2 Efficiency and transfer benefits 123
9.3 Income variability alone 124

9.4 Supply variability alone 125
9.5 Combining demand and supply variability 126
Appendix: Derivation of formulae 129
10. MARKET EQUILIBRIUM WITH RATIONAL EXPECTATIONS 131
10.1 Introduction 131
10.2 The nature of expectations 131
10.3 The efficiency of rational expectations equilibria 136
10.4 Simple models of rational expectations with supply risk 137
10.5 Concluding remarks 141
11. PRICE DYNAMICS, EXPECTATIONS, AND ADJUSTMENTS 142
11.1 Introduction 142
11.2 Two models of incorrect expectations 143
11.2.1 Ignoring correlations 143
11.2.2 Adaptive expectations and the cobweb 148
11.3 Empirical tests of rational expectations 152
11.4 Learning and reasonable expectations 153
11.4.1 Obtaining information 154
11.4.2 Processing information 156
11.5 The efficiency of expectations 157
11.6 Conclusions 158

Part III MARKET EQUILIBRIUM

Introduction 161
12. SHARING AND REDUCING RISK 163
12.1 Risk-sharing activities 164
12.1.1 Limitations on risk-spreading and risk-sharing 165
12.1.2 Mechanisms for risk-spreading 167
12.1.3 Implications for the assessment of price stabilization schemes 168
12.2 Risk-reducing activities 169
12.2.1 The choice of technique 170
12.2.2 Crop diversification 170
12.2.3* Implications 172
12.2.4 Other actions which affect the risk borne by producers 175
12.3 Conclusions 175
13.* FUTURES MARKETS AND RISK REDUCTION 177
13.1 Futures markets and storage 178
13.2 The risk-reducing role of futures markets 181
13.3 Futures markets – hedging and speculation 183
13.3.1 Futures markets for commodities with no storage 183
13.3.2 Equilibrium in the futures market 185

13.3.3 Comparisons with perfect price stabilization 187
13.3.4 Future markets for continuously stocked commodities 188
**13.4 The supply response of introducing futures markets** 190
**13.5 Conclusions** 191
**Appendix: Properties of joint normal distributions** 193
14. STORAGE AND SAVINGS 195
**14.1 Storage** 195
14.1.1 The effect of storage on price stability 197
**14.2 The effects of private storage on public buffer stocks** 199
**14.3* Savings** 201
14.3.1 Asset integration and the perceived cost of risk 204
15.* THE EFFICIENCY OF MARKET EQUILIBRIUM 207
**15.1 Introduction** 207
**15.2 A simple model with identical farmers and consumers** 212
15.2.1 Farmers 212
15.2.2 Consumers 213
15.2.3 Market equilibrium 214
**15.3 The inefficiency of market equilibrium** 214
15.3.1 Introduction 214
15.3.2 Constrained Pareto efficient allocations 215
15.3.3 Redundancy of risk markets and constrained efficiency 217
**15.4 Conditions for constrained Pareto efficiency** 218
15.4.1 Necessary and sufficient conditions for redundancy of risk markets 218
15.4.2 Necessary conditions for constrained Pareto efficiency 220
**15.5 Restrictions on technology which ensure efficiency** 225
15.5.1 Multiplicative risk 225
15.5.2 Costless choice of techniques 227
**15.6 The magnitude of the distortions** 228
**15.7 Optimal corrective tax policy** 231
15.7.1 Conclusions on market efficiency with identical producers 232
**15.8 Imperfectly correlated output risk** 232
**15.9 Conclusions** 235
16. INFORMATION AND MARKET EQUILIBRIUM 238
**16.1 Introduction** 238
**16.2* Futures markets** 239
**16.3 Implications** 243
**16.4 Information and commodity price stabilization** 244

Part IV PRICE STABILIZATION WITH NO SUPPLY RESPONSE

Introduction 247

17. THE THEORY OF PARTIAL PRICE STABILIZATION 249

**17.1 The definition of price stabilization** 249

**17.2 The welfare effect of stabilization** 252

17.2.1 The welfare effects on the three participants 253

17.2.2 Efficiency and distributional effects 254

**17.3 The total efficiency benefits of price stabilization** 255

**17.4 Stabilizing variable demand** 258

18.* DETERMINANTS OF THE DISTRIBUTIONAL IMPACT OF PRICE STABILIZATION 259

**18.1 Benefits to risk-neutral producers** 260

18.1.1 Stabilizing price with supply variability 260

18.1.1.1 The effects of a little price stabilization 261

18.1.1.2 Effects of slight destabilization 261

18.1.1.3 Total stabilization versus no stabilization 262

18.1.2 Stabilizing price with variable demand 262

18.1.2.1 Additive risk 264

18.1.2.2 Multiplicative demand risk 264

18.1.2.3 Multiplicative inverse risk 266

18.1.3 Including buffer profits 266

**18.2 Price stabilization with risk-averse producers** 267

**18.3 The consumer benefits of price stabilization** 269

18.3.1 Stabilizing price with variable supply 269

18.3.2 Stabilizing price with variable demand 270

**18.4 Conclusions** 271

19. EFFECTS OF MARKET DISTORTION 272

**19.1 Introduction** 272

**19.2 A simple linear model of distorted trade** 276

19.2.1 Linear trade policies 279

19.2.2 Non-linear trade policy 280

**19.3 Conclusions** 282

20. ESTIMATES OF THE BENEFITS OF PRICE STABILIZATION 284

**20.1 Introduction** 284

**20.2 Measurement problems** 285

20.2.1 The instability facing individual countries 289

20.2.2 Summary 292

**20.3 The benefits of price stabilization** 293

20.3.1 The costs of price stabilization 294

20.3.2 The distributive and risk-reducing effects of price stabilization 294

20.3.2.1 Producers 295

20.3.2.2 Consumers 295
20.4 Alternatives to buffer stocks 297
20.5 Conclusions 298

Part V SUPPLY RESPONSES TO STABILIZATION

Introduction 301

21.* THE SIMPLE THEORY OF SUPPLY RESPONSE TO PRICE STABILIZATION 304
21.1 A model of supply under price risk 304
21.1.1 Equilibrium without price stabilization 305
21.1.2 The stability of equilibrium 306
21.2 A general characterization of stabilization schemes 308
21.3 The effects of equilibrium homothetic price stabilization schemes 310
21.3.1 The effect on consumers 313
21.4 The evaluation of particular schemes 313
21.4.1 A small degree of stabilization 313
21.4.2 Small departures from complete stabilization 314
21.5 The distributional impacts of stabilization with diverse producers 315
21.6 Demand-induced variability 316
21.7 Concluding remarks 317

22. RISK AVERSION AND SUPPLY RESPONSE: A GEOMETRICAL ANALYSIS 318
22.1 Introduction 318
22.2 The model 320
22.3 Outline of the diagrammatic approach 320
22.3.1 The producer's indifference curve 324
22.3.2 The iso-effort locus 324
22.3.3 The short-run feasibility locus 325
22.3.4 The long-run feasibility locus 325
22.4 Effect on producers 326
22.4.1 The short-run impact on producers 326
22.4.2 The long-run impact on producers 327
22.5 Consumers' welfare and Pareto optimality of the market equilibrium 329
22.6* The allocation of buffer profits 332
22.7 Concluding remarks 334

23. PARETO-INFERIOR TRADE AND PRICE STABILIZATION 336
23.1 Introduction 336
23.2 Comparison of autarky and free trade 339
23.2.1 The model 339

23.2.2 Farmers' allocation of land 340
23.2.3 Autarky versus free trade 342
23.2.4 Welfare analysis 345
**23.3 Multiple equilibria and stability** 348
23.3.1 Boundary equilibria 350
23.3.2 Stability 350
23.3.3* Example: Risk-neutral farmers 350
23.3.4* Stability of symmetric equilibrium for infinitely risk-averse farmers 351
**23.4 Partial versus general equilibrium analysis** 352
**23.5 Robustness of the analysis** 353
23.5.1 Alternative specifications of consumers' demand curves 354
23.5.2 Alternative specifications of risk 355
23.5.3 Alternative specifications of producers' utility functions 355
23.5.4 Two factors and comparative advantage 355
**23.6 Concluding remarks** 356
**Appendix 1* Conditions for boundary equilibria** 358
**Appendix 2* Stability analysis** 360

24. TRADE POLICY 362
**24.1 Introduction** 362
24.1.1 Symmetric trade policies 362
**24.2 Effect of allowing a small amount of trade** 367
**24.3 Effects of a small restriction on free trade** 368
24.3.1 Quotas versus tariffs 369
**24.4 Financial markets** 370
**24.5 Conclusions** 371

**Part VI MACROECONOMIC REPERCUSSIONS**

**Introduction** 373

25. EXPORT-LED PRICE INSTABILITY 377
**25.1 The model** 377
**25.2 Perfect wage and price flexibility** 379
**25.3 Price rigidities and unemployment** 381
25.3.1 Minimum wage below critical level: full employment 382
25.3.2 Minimum wage above critical level: periodic unemployment 384
25.3.3 Fixing the minimum wage 388
**25.4 A simple model of inflation** 388
**25.5 Lessons from the models** 389
**Appendix: The feasible range for the minimum wage** 391

26. BALANCE-OF-PAYMENTS POLICY 392
27. EXPORT INSTABILITY AND GROWTH 395
28. INTERNATIONAL INSTABILITY 399

Part VII DYNAMIC CONSIDERATIONS

Introduction 403
29. BUFFER STOCKS 406
29.1 Buffer stocks as stochastic processes 406
29.2 The choice of stock rule 409
29.2.1 Implications of the competitive storage rule 412
29.2.2 Some simple examples of stock rules 414
29.2.3 The pure random walk model 416
29.2.4 Famine stock rule 418
29.3 Conclusions 420
30.* OPTIMAL COMMODITY STOCKPILING RULES 421
30.1 Introduction 421
30.2 Approximate solutions 423
30.2.1 Average stock size 426
30.2.2 The degree of price stabilization 426
30.2.3 The cost of increased price stability 427
30.3 The benefits of price stabilization 428
30.4 The bias in the competitive stock rule 430
30.4.1 Extensions 432
30.4.2 Comparisons with alternative stocking rules 432
30.5 Conclusions 433
Appendix: Derivation of approximate stock rule 435
31. EPILOGUE 439
