# Human Epigenomics

# Contents

<b>Part A Introduction</b> .....	1
<b>1 What Is Epigenomics?</b> .....	3
1.1 Chromatin and Gene Expression .....	4
1.2 The Epigenetic Landscape .....	8
1.3 Chromatin Organization .....	10
1.4 Epigenome Marks of Transcriptional Regulation .....	13
1.5 Impact of Epigenomics on Health and Disease .....	16
Additional Reading .....	18
<b>2 Methods and Applications of Epigenomics</b> .....	19
2.1 Epigenomic Methods .....	20
2.1.1 Mapping DNA Methylation .....	21
2.1.2 ChIP-seq .....	23
2.1.3 Chromatin Accessibility .....	25
2.1.4 Chromatin Interaction Analyses .....	26
2.2 Epigenomics Consortia .....	27
2.2.1 ENCODE .....	28
2.2.2 FANTOM5 .....	29
2.2.3 Roadmap Epigenomics .....	31
2.2.4 IHEC .....	32
2.3 Exploring Epigenomics Data .....	33
Additional Reading .....	37
<b>Part B Molecular Elements of Epigenomics</b> .....	39
<b>3 The Structure of Chromatin</b> .....	41
3.1 Central Units of Chromatin: Nucleosomes .....	41
3.2 Histones and Their Modifications .....	43
3.3 Histones Variants .....	44
3.4 Euchromatin and Heterochromatin .....	47
3.5 Nuclear Architecture .....	50

3.6	TADs and Chromosome Territories. . . . .	53
	Additional Reading . . . . .	56
<b>4</b>	<b>DNA Methylation</b> . . . . .	57
4.1	Cytosines and Their Methylation . . . . .	58
4.2	DNA Methylation at the Genome Scale . . . . .	60
4.3	Interaction of Transcription Factors with Methylated DNA . . . . .	66
4.4	Insulators, CTCF and Imprinting. . . . .	67
4.5	Link of DNA Methylation to Disease . . . . .	71
	Additional Reading . . . . .	73
<b>5</b>	<b>The Histone Code</b> . . . . .	75
5.1	Molecular Principles of the Histone Code . . . . .	76
5.2	Genome-Wide Interpretation of Histone Modification Patterns. . . . .	81
5.3	Combinatorial Impact of Histone Modifications . . . . .	85
	Additional Reading . . . . .	88
<b>6</b>	<b>Chromatin Modifiers</b> . . . . .	89
6.1	Chromatin Readers. . . . .	90
6.2	Chromatin Writers . . . . .	91
6.3	Erasers . . . . .	95
6.4	Gene Regulation via Chromatin Modifiers. . . . .	97
6.5	Lysine Demethylase Activity During Cell Cycle Progression. . . . .	100
	Additional Reading . . . . .	102
<b>7</b>	<b>Chromatin Remodelers and Organizers</b> . . . . .	103
7.1	Gene Regulation in the Context of Chromatin Structure . . . . .	104
7.2	Chromatin Remodelers . . . . .	105
7.3	Chromatin Organization in 3D . . . . .	111
7.4	Long ncRNAs as Chromatin Organizers . . . . .	115
	Additional Reading . . . . .	120
<b>Part C Impact of Epigenomics in Health and Disease</b> . . . . .		121
<b>8</b>	<b>Embryogenesis and Cellular Differentiation</b> . . . . .	123
8.1	Chromatin Dynamics During Early Human Development . . . . .	123
8.2	Reprogramming of the Germ Line . . . . .	128
8.3	Cellular Reprogramming to Pluripotency . . . . .	130
8.4	Chromatin Dynamics During Differentiation . . . . .	134
8.5	Development and Disease. . . . .	136
	Additional Reading . . . . .	140
<b>9</b>	<b>Population Epigenomics and Aging</b> . . . . .	141
9.1	Epigenetic Memory and Transgenerational Inheritance . . . . .	142
9.2	Population Epigenomics . . . . .	146
9.3	Epigenomics of Aging . . . . .	151
	Additional Reading . . . . .	158

<b>10 Cancer Epigenomics</b> . . . . .	159
10.1 Impact of Epigenetic Mutations in Cancer . . . . .	160
10.2 Epigenetic Dys-Regulation in Tumorigenesis . . . . .	162
10.3 Role of Epigenetic Reprograming in Cancer . . . . .	166
10.4 Epigenetic Mechanisms of the Hallmarks of Cancer . . . . .	169
10.5 Epigenetic Cancer Therapy . . . . .	170
10.5.1 KMT Inhibitors . . . . .	171
10.5.2 KDM Inhibitors . . . . .	171
10.5.3 KDAC Inhibitors . . . . .	172
10.5.4 DNMT Inhibitors . . . . .	172
Additional Reading . . . . .	174
<b>11 Neuroepigenetics</b> . . . . .	175
11.1 Epigenetics of Neuronal Development and Memory . . . . .	176
11.2 MeCP2 and the Rett Syndrome . . . . .	179
11.3 Epigenetics of Neurodegenerative Diseases . . . . .	182
Additional Reading . . . . .	190
<b>12 Epigenomics of Immune Function</b> . . . . .	191
12.1 Epigenetics of Hematopoietic Differentiation . . . . .	192
12.2 Role of Epigenetics in Immune Responses . . . . .	196
12.3 Epigenetics of Immune Diseases . . . . .	199
Additional Reading . . . . .	203
<b>13 Nutritional Epigenomics</b> . . . . .	205
13.1 Epigenetic Mechanisms Linking Metabolites and Gene Transcription . . . . .	205
13.2 Cell Decisions via the Metabolome-Epigenome Axis . . . . .	209
13.3 Epigenetic Regulation of Metabolic Tissue Differentiation . . . . .	212
13.4 Epigenomics of Intergenerational Metabolic Disease . . . . .	214
Additional Reading . . . . .	217
<b>Glossary</b> . . . . .	219
