<i>List of contributors</i>	vii
Introduction to the <i>Handbook of Theory and Methods in Applied Health Research</i> <i>Sarah G. Brearley and Catherine Walshe</i>	1
<b>PART I RESEARCH SKILLS</b>	
1 Critical appraisal: how to examine and evaluate the research evidence <i>Alyson L. Dodd, Siobhan Reilly, Faraz Ahmed and Carol Thomas</i>	5
2 Literature reviews <i>Nancy Preston and Helen Aveyard</i>	23
3 Developing research questions <i>Sarah G. Brearley</i>	38
4 Between the institution and the field: research ethics in health and social care <i>Amanda Bingley and Anne Grinyer</i>	64
<b>PART II VARIETY AND VARIATION IN QUALITATIVE RESEARCH METHODS</b>	
5 Ethnography in applied health research <i>Michaela Edwards</i>	88
6 An introduction to narrative research methods in health and social care <i>Amanda Bingley</i>	107
7 Grounded theory methods and analysis: methodological revisions and practical application <i>Susannah Baines</i>	128
8 Thinking about, doing and writing up research using interpretative phenomenological analysis <i>Craig D. Murray and David J. Wilde</i>	140
9 Using action research to implement, investigate and evaluate interventions in applied health research <i>John Hamilton and Sandra Varey</i>	167
10 The crossover artist: consensus methods in health research <i>Saskia Jünger and Sheila Payne</i>	188

### PART III VARIETY AND VARIATION IN QUANTITATIVE RESEARCH METHODS

- |    |   |     |
|----|---|-----|
| 11 | Designing and using quantitative health-care questionnaires and surveys<br><i>Jane Simpson and Ian Fletcher</i>   | 215 |
| 12 | Understanding effect and effectiveness of interventions: trials and other evaluative study designs in applied health research<br><i>Naomi Fisher and Heather Robinson</i> | 232 |
| 13 | Analysing quantitative data: correlation and beyond<br><i>Guillermo Perez Algorta</i>   | 251 |
| 14 | Using and analysing secondary data<br><i>Anthony C. Gatrell</i>   | 268 |

### PART IV CONTEMPORARY ISSUES

- |    |   |     |
|----|---|-----|
| 15 | Using information and communication technologies for health research<br><i>Gerasimos Chatzidamianos and Rob J. Parker</i> | 284 |
| 16 | The case for mixed methods in applied health research<br><i>Catherine Walshe</i>  | 304 |
| 17 | Public engagement in health research<br><i>Michelle Collins and Emma Halliday</i>   | 323 |
|    | Conclusions and final thoughts: dissemination and impact<br><i>Catherine Walshe and Sarah G. Brearley</i>                 | 341 |
|    | <i>Index</i>  | 347 |
