Frank Hoffmann

Introduction to Crystallography

Springer

Contents

1	Introduction	1
1.1	Crystals, Structures, Orders of Magnitude	2
1.2	Specialist Terms: Crystallographic Poetry	5
1.3	The Term Crystal and Its Definition	6
1.4	Anisotropy	9
1.5	Robert Hooke and the Correspondence Principle I	10
1.6	The Hexagonal Symmetry of Snowflakes	14
1.7	The Concept of the Unit Cell	18
1.7.1	Characterizing the Unit Cell	21
1.8	The Seven Crystal Systems	23
1.9	Lattice and Motif (Basis)	28
	References	31
2	Crystal Shapes and Bravais Lattices	33
2.1	Phenomenology of External Crystal Shapes	34
2.1.1	Tracht and Habitus	39
2.2	Miller Indices	41
2.2.1	Negative Miller Indices	45
2.2.2	Lattice Planes and Miller Indices in 3D	46
2.2.3	Miller Indices, Weiss Parameters, Crystal Faces, and the Correspondence Principle II	46
2.3	Bravais Lattices (Centerings) and the Choice of Unit Cells	50
2.3.1	Primitive Unit Cells/Lattices	50
2.3.2	Centered Unit Cells	55
2.3.3	The 14 Bravais Lattices	59
2.4	Atom Positions: Fractional Coordinates	61
2.4.1	Fractional Coordinates Smaller than Zero or Larger than One	64
2.5	Exchange of Crystallographic Information (CIF Files)	65
2.6	Visualization of Crystal Structures with VESTA	65
2.6.1	Download and Installation	66
2.6.2	Building the Unit Cell	68
2.6.3	Specifying the Atomic Structure	70
2.6.4	Generation of Atomic Bonds	72
2.6.5	Different Display Styles, Boundaries, and the Export of Images and CIFs	73
2.7	Four Aspects of the Hexagonal (Crystal System)	75
2.8	Trigonal, Rhombohedral, and Hexagonal-R	82
	References	89
3	Symmetry (Is Everywhere)	91
3.1	Symmetry Operation and Symmetry Element	92
3.2	The Five Point Symmetry Elements	93
3.2.1	Identity	93
3.2.2	Mirror and Rotational Symmetry	94
3.2.3	Centrosymmetry (Origin Symmetry, Point Symmetry)	99

3.2.4 Rotoinversions ... 101
3.3 **The Symmetry of Outer Crystal Shapes: Crystal Classes** ... 105
3.3.1 First Examples ... 106
3.3.2 Systematic Approach: Crystallographic Viewing Directions ... 109
3.3.3 Relationship Between Crystal System and Crystal Class ... 116
3.3.4 Poster of Crystal Classes, Folding Paper Crystal Shapes, and Interactive Crystal Class Representations ... 120
3.3.5 Crystal Shapes with VESTA ... 121
References ... 125

4 **Symmetry in the Plane: About Wallpaper Patterns, Islamic Mosaics, Drawings from Escher, and Heterogeneous Catalysts** ... 127
4.1 **Glide Planes** ... 128
4.1.1 What Is a Glide Plane? ... 131
4.2 **The Five Bravais Lattices of the Plane, the 17 Plane Groups and Their Significance for Culture and Technology** ... 132
4.2.1 Notation of Plane Groups ... 134
4.2.2 Algorithm for Determining Plane Groups ... 135
4.2.3 Symmetry of the Plane in Cultural Contexts ... 138
4.2.4 Symmetry of the Plane in Technology and Relations Between 3D and 2D Bravais Lattices ... 142
4.3 **Be Creative: Design Your Own 2D Patterns!** ... 147
4.4 **Intermediate Conclusion and Transition to Symmetry in Space** ... 148
References ... 149

5 **Translational Symmetry Elements in Crystals and Space Groups I** ... 151
5.1 **Glide Planes in Crystals** ... 152
5.1.1 The Three Simple Glide Planes *a*, *b*, and *c* ... 153
5.1.2 The Three More Complicated Glide Planes *n*, *d*, and *e* ... 157
5.2 **Screw Axes: Helical Symmetry** ... 162
5.2.1 Characteristics of Helices ... 164
5.2.2 The Symmetry Element Screw Axis ... 165
5.2.3 Screw Axes in Crystal Structures ... 165
5.2.4 Systematic Overview of Crystallographic Screw Axes ... 169
5.3 **Space Groups** ... 172
5.3.1 Definition and Notation of Space Groups ... 174
5.3.2 Relationship of Space Group, Point Group, and Crystal System ... 176
References ... 182

6 **Space Groups II: International Tables** ... 183
6.1 **The Space Group *Pmm*2 in Detail** ... 185
6.1.1 The Header Section of a Space Group ... 185
6.1.2 Area of Diagrams/Diagram of the Symmetry Elements ... 185
6.1.3 The General Position Diagram ... 189
6.1.4 The Asymmetric Unit ... 192
6.1.5 Positions and Coordinates ... 194

6.1.6 Origin and Origin Choice ... 198
6.2 **The Space Group $P2_1/c$ in Detail** ... 199
6.2.1 Settings ... 201
6.2.2 Symmetry Framework and General Position Diagram ... 204
6.2.3 Generators and Symmetry Operations ... 206
6.2.4 Positions and Coordinates ... 207
6.3 **Overview of the Graphical Symbols of the Symmetry Elements of the International Tables** ... 207
6.4 **About the Term Group: Brief Excursion into Group Theory** ... 208
6.5 **The SpaceGroupVisualizer** ... 210
6.6 **Tabular Overview of the 230 Space Groups** ... 211
