## BIG DATA—A NEW MEDIUM?

Edited by Natasha Lushetich

## CONTENTS

Lis	t of figures	ix
Lis	t of contributors	xi
Ac	Acknowledgements	
	Prologue: Why ask the question? Natasha Lushetich	1
РА Ра	<sub>RT I</sub> Itterning knowledge and time	15
1	Big data and/versus people knowledge: On the ambiguities of humanistic research <i>Ingrid M. Hoofd</i>	17
2	Simulated replicants forever? Big data, engendered determinism, and the end of prophecy <i>Franco 'Bifo' Berardi</i>	32
3	"Visual hallucination of probable events": On environments of images, data, and machine learning <i>Abelardo Gil-Fournier and Jussi Parikka</i>	46

PART II Patterning use and extraction		61
4 Biometric datafication in gover Btihaj Ajana	nmental and personal spheres	63
5 Digital biopolitics and the problem Tim Christaens	n of fatigue in platform capitalism	80
6 Appreciating machine-generated learning mechanisms <i>Lonce Wyse</i>	d artwork through deep	94
PART III Patterning cultural heritage an	d memory	113
7 Data to the Nth degree: Zoomir Craig J. Saper	ng in on The Smart Set	115
8 Intellectual autonomy after artific of memory institutions and histor <i>Nicola Horsley</i>	ial intelligence: The future rical research	130
9 BeHere: Prosthetic memory in the Natasha Lushetich and Masaki Fujih	age of digital frottage nata	145
PART IV		
Patterning people		161
10 Surfaces and depths: An aesthetics Dominic Smith	of big data	163
11 POV-data-doubles, the dividual, an Mitra Azar	nd the drive to visibility	177
12 Reading big data as the heterogen Simon Biggs	eous subject	191
13 Epilogue: Telepathic exaptation in A speculative approach to the effect <i>Warren Neidich</i>	late cognitive capitalism: cts of digitality	206
