INTRODUCTION	<i>xxix</i>

PART I STUDYING THE WATERY WORLD 1

CHAPTER 1	What We Can Learn from Maritime and Underwater Archaeology?	3
CHAPTER 2	What Is Maritime and Underwater Archaeology?	23
CHAPTER 3	How Do We Learn from Things?	42

PART II ARCHAEOLOGICAL METHODS UNDERWATER 77

CHAPTER 4	Archaeological Research in an Underwater Environment	79
CHAPTER 5	Documenting and Excavating Underwater Sites: Digging and Drawing without Drowning	107
CHAPTER 6	Putting It All Together: How to Get from Site to People	140

PART III HUMAN ADAPTATIONS TO WATERY WORLDS 161

CHAPTER 7 Interacting with the Environment 163

CHAPTER 8 Inhabiting the Coast 193

CHAPTER 9 Ships 217

CHAPTER 10 Life Afloat: Sailors and Seafaring 257

CHAPTER 11 Exploration, Colonization, Trade, and
Extraction 284

CHAPTER 12 Warfare at Sea 320

PART IV PRESERVING OUR MARITIME HERITAGE 353

CHAPTER 13 Managing and Valuing Underwater Cultural
Heritage 355

CHAPTER 14 The Future of Maritime and Underwater
Archaeology 383

LIST OF ILLUSTRATIONS

FIGURES

- Figure 1.1 Sea-level fluctuations throughout the past 2.6 million years of the Pleistocene. 6
- Figure 1.2 Example of underwater preservation: A Neolithic flint axe that is still held within its wooden handle. 10
- Figure 1.3 Statuary being recorded at the submerged city of Alexandria. 11
- Figure 1.4 Diving on *Mars* (1564). 12
- Figure 1.5 *Sea Stallion*, Skuldelev 2 reconstruction. 13
- Figure 1.6 Model of the elaborate carvings on the stern of the *Vasa*. 18
- Figure 2.1 *H. L. Hunley* undergoing conservation. 24
- Figure 2.2 Overlapping relationship of maritime, nautical, and underwater archaeology. 27
- Figure 2.3 Brief timeline of major developments in maritime and underwater archaeology. 29
- Figure 2.4 The Lake Nemi vessel after its raising. 30
- Figure 2.5 Diving bell and setup of divers descending. 31
- Figure 2.6 Excavations underway at Cape Gelidonya. 32
- Figure 2.7 Excavations at Warm Mineral Springs, Florida, in 1973. 33
- Figure 2.8 Excavations underway at the deepwater Mardi Gras shipwreck. 34
- Figure 2.9 SS *Richard Montgomery*, still filled with unexploded WWII ordnance at its place of sinking in the Thames estuary. 38
- Figure 3.1 Single-component vs. multicomponent site. 47
- Figure 3.2 Well-preserved pork barrel from *Heroine* being removed from site. 56
- Figure 3.3 Example of underwater field notes recorded on a data table: in this case, a map of the location of artifacts in an excavation unit at an inundated landscape site. 57
- Figure 3.4 Dendrochronology. 62
- Figure 3.5 Seriation and frequency seriation. 64

- Figure 3.6 How *terminus post quem* and *terminus ante quem* can be used to provide a relatively precise date. 65
- Figure 3.7 Iconography of early boats. 69
- Figure 3.8 *Olympias*, a recreated Greek trireme, under sail. 73
- Figure 3.9 *Harald Hårfagre*, a recreated Viking dragon (*draken*) ship. 74
- Figure 4.1 Diving physiology with depth. 81
- Figure 4.2 Example recreational diving table showing time limits for diving on air (21 percent oxygen) at various depths. 84
- Figure 4.3 Major underwater site formation processes, especially as related to shipwreck sites. 86
- Figure 4.4 Sampling strategies. 96
- Figure 4.5 Swimline survey. 97
- Figure 4.6 Jackstay survey. 98
- Figure 4.7 Radial survey. 99
- Figure 4.8 Baseline offset survey. 99
- Figure 4.9 Common sonar equipment (towfish) used in underwater research. 100
- Figure 4.10 Several targets as seen in side-scan sonar. 101
- Figure 4.11 Side-scan sonar in use with graphical illustration of the area covered by the instrument. 103
- Figure 4.12 Multibeam sonar in use showing the instrument's ability to record changes in the sea bottom. 104
- Figure 4.13 Sub-bottom profiler record showing a buried channel. 105
- Figure 5.1 Coring a river site from a floating platform. 113
- Figure 5.2 Water dredge setup used by Halligan at inundated landscape excavations. 116
- Figure 5.3 Excavating by trowel and water dredge and by hand-fanning. 117
- Figure 5.4 Triton XLS-17 ROV with specialized archaeological equipment. 120
- Figure 5.5 Grid frame used on *Nuestra Señora de Encarnación* shipwreck, lost off the coast of Panama in 1688. 121
- Figure 5.6 Plan map and section recorded after minimal excavation using baseline offset and trilateration measuring techniques. 122
- Figure 5.7 The trilateration method. 123
- Figure 5.8 Trilateration using two or three datums. 124
- Figure 5.9 Using grid frame to map an excavation area. 125
- Figure 5.10 Using a control point and baseline to map a site. 126
- Figure 5.11 Photomosaic and site plan created from photomosaic and direct measurements. 127
- Figure 5.12 Photomosaic of Chersonessos A. 128
- Figure 5.13 Photogrammetry model of Alexandria, VA shipwreck 44AX229 and photogrammetric recording. 129
- Figure 5.14 Using lift bags to lift a column capital from the Kızılburun shipwreck, Turkey. 132
- Figure 5.15 The *Alvin Clark* soon after raising. 133
- Figure 6.1 Stone tool assemblage from San Clemente California that is associated with early Holocene boatbuilding. 142
- Figure 6.2 Native Americans of the eastern United States using fire to remove the interior of a log boat. 143

- Figure 6.3 Alpena-Amberley Ridge survey areas. 148
- Figure 6.4 Example of submerged hunting structures on Alpena-Amberley Ridge. 149
- Figure 6.5 Representations of Mishebeshu. 152
- Figure 6.6 Example of a lines drawing based on archaeological data. 154
- Figure 6.7 Example of construction drawing based on archaeological data. 155
- Figure 6.8 The hull of a ship divided with planes to demonstrate the relationships between the lines on a lines plan. 155
- Figure 6.9 *La Belle* shipwreck during excavation. The metal wall in the background is the interior of the cofferdam. 157
- Figure 7.1 Generalized sea level chart for entire Pleistocene, last 500,000 years, and more precise curve for past 35,000 years, showing selected major events in hominid history in italics. 169
- Figure 7.2 Preservation potential for inundated coastal sites. 171
- Figure 7.3 Projectile point being used as camouflage by an urchin at a submerged offshore site in the Florida Gulf of Mexico. 173
- Figure 7.4 Artifacts and cut-marked tusk from the ca. 12,600 BCE cultural component at Page-Ladson. 176
- Figure 7.5 Late Pleistocene Florida landmass and current Florida shorelines, showing loss since Page-Ladson, the oldest dated Florida archaeological site, was occupied. 177
- Figure 7.6 Partial plan of the submerged portions of Port Royal. 179
- Figure 7.7 Portus, more specifically the remains of Trajan's harbor (outlined in white), outside of modern Rome. 182
- Figure 7.8 Quagga mussel colonization of the railroad car ferry *Milwaukee* (1903), sunk on 22 October 1929 in Lake Michigan. 185
- Figure 8.1 Major coastal cities. 195
- Figure 8.2 Reconstruction of a Ferriby boat approaching a landing place. 197
- Figure 8.3 Tulum, Mexico. 198
- Figure 8.4 Shipheds at Zea Harbor, 4th Century BCE. 200
- Figure 8.5 Caesarea Maritima viewed from above. 201
- Figure 8.6 Workers posed on the docks of Bryggen with the historic warehouses and homes in the background. 202
- Figure 8.7 London's advancing waterfront, 1st Century CE to modern times. 203
- Figure 8.8 Amphora found in the Thames estuary and the pits of the 6000 olives that it contained. 204
- Figure 8.9 Map of modern San Francisco showing locations of wharves and converted ships. 205
- Figure 8.10 Woolwich Shipyard, 1753. 209
- Figure 8.11 Oostenburg Shipyard, 1726, with a ship on the launching ways and ship timbers arranged around the yard. 210
- Figure 8.12 Nanjing Treasure Shipyard during excavation. 211
- Figure 8.13 Artist's reconstruction of Buiston Crannog, Ayrshire, Scotland. 213
- Figure 9.1 Raft, reed boat, logboat, and skin boat. 220
- Figure 9.2 Ferriby Boat reconstruction demonstrating the use of cleats and lashing to join the planks. 223
- Figure 9.3 Kuhfu ship. 224

- Figure 9.4 Reconstruction based on Uluburun shipwreck. 225
- Figure 9.5 Shell-first building sequence as demonstrated by Skuldelev 3. 227
- Figure 9.6 Frame-first building sequence. 228
- Figure 9.7 Diminishing use of mortise-and-tenon joints. 229
- Figure 9.8 Kyrenia II under sail, 1987. 230
- Figure 9.9 Dhow illustrated in the 13th century CE manuscript al-Hariri's *Māqāmat*. 231
- Figure 9.10 Sewn planking on interior of a dhow. 232
- Figure 9.11 Cross-sections of the Quanzhou ship and the Shinan shipwreck. 233
- Figure 9.12 Polynesian double canoe, *Hōkūle'a*. 235
- Figure 9.13 Sewn Polynesian voyaging canoe. 236
- Figure 9.14 Examples of clinker and carvel ship construction. 237
- Figure 9.15 Sutton Hoo ship during excavation. 238
- Figure 9.16 Skuldelev 1 and 2 hulls on exhibit at the Viking Ship Museum. 239
- Figure 9.17 Bottom-based ship construction sequence. 241
- Figure 9.18 Bremen Cog reconstruction, *Roland von Bremen*. 242
- Figure 9.19 Carrack (Magellan's *Victoria*). 243
- Figure 9.20 Mezzaluna applied to the narrowing and rising of a hull. 248
- Figure 9.21 Shipwrights using plans at a shipyard from *Éléments de l'architecture navale* by Henri-Louis Duhamel du Monceau, 1752. 250
- Figure 9.22 Clipper ship *Sovereign of the Seas*. 250
- Figure 9.23 The bow of *Snow Squall* based on archaeological remains. 251
- Figure 9.24 Diagram of SS *Great Britain* showing hull shape, decks, and propeller. 253
- Figure 10.1 1658 map showing locations in the *Periplus of the Erythean Sea*. 260
- Figure 10.2 Dead reckoning. 261
- Figure 10.3 Sand clocks of various sizes and a compass recovered from the early 19th century Mardi Gras shipwreck. 262
- Figure 10.4 *Kamal* navigation tool in use. 263
- Figure 10.5 Astrolabes from the 1606 *Nossa Senhora dos Mártires* shipwreck. 264
- Figure 10.6 Personal artifacts recovered from *Mary Rose*. 267
- Figure 10.7 Contemporary engraving of Anne Bonny and Mary Read. 270
- Figure 10.8 19th century medical drawing of the effects of scurvy. 273
- Figure 10.9 Example of rope-work and scrimshaw. 275
- Figure 10.10 Crossing the Line ceremony during the 19th century. 277
- Figure 10.11 World War II-era sailors displaying their tattoos. 281
- Figure 11.1 Engraving in a 1603 German edition of Sir Walter Raleigh's 1595 *Discovery of Guiana*. 286
- Figure 11.2 Map showing Mersa Gawasis, Nile shipyard, and possible locations of Punt. 287
- Figure 11.3 Ancient locations described in chapter 11. 288
- Figure 11.4 Excavation of Phoenician hull remains at Mazarron 1 site, Spain. 290
- Figure 11.5 Cross-Section of the Kyrenia ship, an archaeologically recovered *holkades*, on display at the Kyrenia Castle on Cyprus. 292

- Figure 11.6 A Renaissance reconstruction of Ptolemy's 1st projection, indicating the Land of Silk (*Serica*) in northeast Asia at the end of the overland Silk Road and Qin (*Sinae*) in the southeast at the end of the maritime routes. 294
- Figure 11.7 Torlonia Relief from Portus showing a Roman merchant ship coming into port. 295
- Figure 11.8 North Atlantic and European locations described in chapter 11. 296
- Figure 11.9 Quanzhou Bay shipwreck during excavation, note the bulkheads running across the hull. 297
- Figure 11.10 Maritime Silk Road (solid line) and Silk Road (dashed line). 298
- Figure 11.11 Schematic of a large ship in Zheng He's fleet. 299
- Figure 11.12 European expansion beginning in the 15th century. 300
- Figure 11.13 A caravel from Vasco da Gama's 1502 Portuguese India Armada. 301
- Figure 11.14 Site plan of *San Juan*, Red Bay, Labrador. 303
- Figure 11.15 Reconstructed Dutch East Indiaman *Batavia*. 306
- Figure 11.16 Triangular trades. 308
- Figure 11.17 Artifacts recovered from the *Fredensborg* slave ship wreck, including cargo and personal effects. 309
- Figure 11.18 Advertisement for the clipper ship *Ocean Express* emphasizing the speed of the vessel and its captain, even surpassing the steamship in the background. 311
- Figure 11.19 Whalers processing a whale at sea. 314
- Figure 11.20 Plan map of the steamboat *Heroine* shipwreck, Red River, Oklahoma. 316
- Figure 12.1 Drawing of limestone relief at Medinet Habu depicting Ramses III and his fleet in battle with the fleet of the Sea Peoples. 322
- Figure 12.2 Hypothetical drawing of an Athenian trireme in the process of ramming a Persian trireme during the Battle of Salamis in 480 BCE. 323
- Figure 12.3 The Athlit ram on display at the National Maritime Museum, Haifa, Israel. 324
- Figure 12.4 Greek fire engulfing a galley. 325
- Figure 12.5 The Gokstad ship built toward the end of the 9th century CE. 327
- Figure 12.6 *Tetsuhau* ceramic bombs. 330
- Figure 12.7 The Battle of Lepanto, 7 October 1571. 332
- Figure 12.8 The *Mary Rose* at the Mary Rose Museum in Portsmouth Historic Dockyard. 334
- Figure 12.9 The *Vasa* as viewed from the stern quarter in the Vasa Museum, Stockholm. 335
- Figure 12.10 Reconstructed view of the 1982 archaeological investigation of *Scourge*. 340
- Figure 12.11 1862 Currier & Ives lithograph based on a sketch by F. Newman memorializing the first battle between ironclad vessels USS *Monitor* and CSS *Virginia*. 342
- Figure 12.12 The *H. L. Hunley* submarine immersed in its purpose-built conservation vat. 344

- Figure 12.13 Rendering of the wreck of light cruiser SMS *Cöln*, scuttled in Scapa Flow on 21 June 1919. 345
- Figure 12.14 USS *Lexington* (CV-2) aircraft carrier underway. 348
- Figure 12.15 USS *Nautilus* (SSN-571) underway in June 1965. 350
- Figure 13.1 Representatives from dozens of nations attend a plenary session of the United Nations Educational, Scientific and Cultural Organization General Conference. 362
- Figure 13.2 A Geographic Information System (GIS) illustrating the superimposition of georeferenced data layers. 369
- Figure 13.3 Summary graphic produced by the Bureau of Ocean Energy Management to explain the extent of maritime boundaries to stakeholders in the United States offshore oil and gas industry. It illustrates the potential complexities associated with delineating maritime zones within which different legal protections for underwater cultural heritage may apply. 370
- Figure 13.4 Archaeological site plan of U-352, a World War II-era German submarine sunk off the coast of North Carolina, developed by the Monitor National Marine Sanctuary as part of a site condition assessment. 371
- Figure 13.5 Line engraving depicting CSS *Georgia*, an ironclad floating battery that served in the defense of Savannah, Georgia, during the American Civil War. 372
- Figure 13.6 A salvage barge crowded with the remains of O 16, a World War II-era Royal Netherlands Navy submarine sunk in the Gulf of Siam. 372
- Figure 13.7 Cannon from CSS *Alabama*. 376
- Figure 13.8 Personal wallet from U-853. 378
- Figure 14.1 Students at Florida State University's underwater archaeology field school learning how to map a site on land before moving underwater. 387
- Figure 14.2 Students at Florida State University's underwater archaeology field school mapping artifacts underwater. 389
- Figure 14.3 Florida Public Archeology Network (FPAN) avocational archaeological diver training. 393

TABLES

- Table 3.1 Some key data gained from the Windover charnel pond excavations. 52
