

CONTENTS

1. Core Pathology Patterns in Medical Liver Specimens	1
Normal Liver Histology	1
Portal Tracts	1
Hepatic Lobule	2
Acute Liver Failure	6
Liver Injury Patterns	8
General Necrosis Patterns	8
Biliary Obstructive Pattern	9
Ductopenia	12
Bland Lobular Cholestasis	13
Ascending Cholangitis	15
Granulocytic Epithelial Lesions	15
Cholangitis Lenta	16
Fatty Liver	16
Cytoplasmic Changes in Hepatocytes	18
Hepatic Pattern	23
Grading Hepatitis Activity	30
Resolving Hepatitis Pattern	30
Bland Lobular Necrosis	31
Vascular Disease Patterns of Injury	35
Peliosis Hepatis	39
Granulomas	40
Amyloid	41
Changes that Support a Diagnosis of Chronic Liver Disease	41
Combined Patterns of Injury	43
Almost Normal Liver	44
Fibrosis Evaluation	45
Overview	45
Reporting Fibrosis	46
Specimen Adequacy	46
Fibrosis Evaluation	48
No Fibrosis	48
Sinusoidal Fibrosis	49
Central Vein Fibrosis	51
Portal Fibrosis	51
Bridging Fibrosis	53
Cirrhosis	56
Cirrhosis/Fibrosis Regression Pattern	58

2.	Viral Hepatitis.	65
	Hepatotropic Viruses	65
	Hepatitis A	65
	Hepatitis B	66
	Hepatitis C	70
	Hepatitis D	73
	Hepatitis E	74
	Clinicopathologic Syndromes and Selected Challenges	75
	Nonhepatotropic Viruses	80
	Herpes Simplex Virus (HSV).	80
	Epstein-Barr Virus.	80
	Cytomegalovirus	82
	Adenovirus	83
	Other Nonhepatotropic Viruses.	84
3.	Nonviral Infections of the Liver.	89
	Bacterial Infections.	90
	Hepatic Abscess	91
	Ascending Cholangitis.	95
	Hepatitis Pattern.	95
	Syphilis.	96
	Tick-Borne Diseases	98
	Malarial Infection.	101
	Parasites	101
	Schistosomiasis.	101
	Other Trematodes.	104
	Echinococcosis	104
	Entamoeba Histolytica.	107
	Visceral Larva Migrans	107
4.	Granulomas and Granulomatous Disease	113
	Epidemiology of Granulomas	113
	Special Stains	115
	Definitions and Terminology.	116
	Granulomatous Disease	116
	Granulomatous Inflammation.	118
	Granulomatous Hepatitis.	118
	Poorly Formed Granuloma	119
	Morphologic Subtypes of Granulomas	119
	Granuloma (Not Otherwise Specified).	119
	Necrotizing Granuloma	120
	Fibrin Ring Granuloma	121
	Florid Duct Lesions	122

Foreign Body Granuloma	122
Fibrotic Granuloma	122
Lipogranuloma/Mineral Oil Granuloma	124
Kupffer Cell Aggregates	125
Infections and Granulomas	125
Mycobacterial Infection	125
<i>Bartonella Henselae</i>	128
<i>Brucella</i>	129
<i>Listeria Monocytogenes</i>	130
Q Fever	131
<i>Salmonella</i>	131
Tick-Borne Disease	131
Tularemia	131
Whipple Disease	132
Other Bacterial Infections	132
Fungal Infections	132
Histoplasmosis	132
<i>Cryptococcus</i>	134
<i>Candida, Aspergillus, Mucor</i>	135
Parasites	135
Schistosomiasis	135
<i>Entamoeba Histolytica</i> and <i>Echinococcus</i>	135
Viral Infections	135
Granulomas and Neoplasms	135
Granulomas and Systemic Disease	137
Sarcoidosis	137
Primary Biliary Cholangitis	138
Celiac Disease	139
Common Variable Immunodeficiency	139
Crohn Disease	139
Chronic Granulomatous Disease	139
Fatty Liver Disease	140
Sjogren Syndrome	140
Granulomas and Drug Reactions	140
Other Reported Associations	140
Acute Cellular Rejection	140
Other Associations	141
Idiopathic Granulomas	141
5. Autoimmune Hepatitis and Overlap Syndrome	149
Demographics	149
Etiology	149

Non-Neoplastic Diseases of the Liver

Clinical Features	149
Laboratory Findings	149
Enzyme Elevations	149
Serologic Findings	150
Seronegative Autoimmune Hepatitis	150
Autoimmune Hepatitis Subtypes	150
Diagnostic Approach	151
Scoring Systems for Establishing a Diagnosis	151
Microscopic Findings	153
Fulminant Hepatitis Pattern	153
Subfulminant Hepatitis Pattern	154
Acute Hepatitis Pattern	155
Nonspecific Chronic Hepatitis Pattern	160
Cryptogenic Cirrhosis Pattern	160
Special Populations	160
Pediatric Autoimmune Hepatitis	160
Autoimmune Hepatitis in Men	162
Seronegative Autoimmune Hepatitis	162
Autoimmune Hepatitis Undergoing Treatment	162
Immunohistochemical Findings	162
Fibrosis Staging	163
Overlap Syndromes	165
Overlap Between Autoimmune Hepatitis and Primary Biliary Cholangitis	165
Overlap Between Autoimmune Hepatitis and Primary Sclerosing Cholangitis	167
Differential Diagnosis	168
Viral Hepatitis	168
Autoimmune Hepatitis-Like Drug-Induced Liver Injury	169
Wilson Disease	169
Treatment	169
Prognosis	170
Systemic Autoimmune Conditions with Mild Nonspecific Hepatitis	170
Adult Giant Cell Hepatitis	171
6. Pediatric Cholestatic and Biliary Tract Disease	177
Neonatal Cholestatic Liver Disease	177
Biliary Atresia	177
Paucity of Intrahepatic Bile Ducts	182
Neonatal Hepatitis/Neonatal Cholestasis	184
Bile Salt Deficiency Diseases	187
Other Causes of Neonatal Cholestasis	190
Congenital Hepatic Fibrosis/Autosomal Recessive Polycystic Liver Disease	191
Caroli Syndrome/Caroli Disease	194

Autosomal Dominant Polycystic Kidney and Liver Disease	194
Inherited Defects in Bilirubin Metabolism	195
7. Adult Cholestatic and Biliary Tract Diseases	199
General Features of Biliary Tract Disease	199
Lobular Cholestasis	199
Bile Ductular Proliferation	200
Bile Ductular Cholestasis (Cholangitis Lenta)	202
Bile Duct Duplication	202
Bile Infarct	202
Bile Duct Loss (Ductopenia)	203
Cholate Stasis	203
Periductal Fibrosis	204
Fibro-obliterative Duct Lesion	204
Giant Cell Transformation of Bile Ducts	204
Changes of Chronic Biliary Tract Disease	205
Biliary Fibrosis	205
Biliary Patterns of Cirrhosis	205
Special Stains	206
Bland Lobular Cholestasis Pattern	207
Biliary Obstruction Pattern	208
Bacterial Cholangitis	209
Ascending Cholangitis	209
Segmental Cholangiectasia	210
Primary Sclerosing Cholangitis	211
Small Duct Primary Sclerosing Cholangitis	216
IgG4 Sclerosing Disease	217
Sclerosing Cholangitis with Granulocytic Epithelial Lesion	221
Primary Biliary Cholangitis	221
Other Causes of Chronic Biliary Tract Disease	227
Sarcoidosis	227
Acquired Immunodeficiency Syndrome (AIDS)-Associated Cholangiopathy	228
Bile Salt Deficiencies	228
Cystic Fibrosis	228
Debilitated Patients	230
Vasculitis	230
Ductopenia	231
8. Drug-Induced Liver Injury	237
Clinical Features	237
Mechanisms of Injury	237
Establishing Causality in Drug-Induced Liver Injury	238
Outcome	238

Non-Neoplastic Diseases of the Liver

Role of the Pathologist	238
Histologic Patterns of DILI	239
Acute Hepatitis	239
Chronic Hepatitis	244
Acute Cholestatic Injury	245
Chronic Cholestasis and Ductopenia	247
Steatosis and Steatohepatitis	248
Granulomatous Hepatitis	251
Vascular Injury	252
Other Patterns	254
Specific Clinicopathologic Settings	255
9. Fatty Liver Disease	265
Nomenclature	265
Nonalcoholic Fatty Liver Disease	265
Demographics	265
Clinical Features	265
Genetic Associations	266
Fatty Liver Disease in the Normal Weight	266
Laboratory Findings	266
Autoimmune Serologies	266
Natural History	267
Histologic Findings	267
Formal Grading and Staging	281
Applying the NAS Grade and Staging System	282
Treatment	286
Cryptogenic Cirrhosis	286
Metabolic Syndrome without Fat	286
Alcohol Liver Disease	287
Fatty Liver Disease Resulting from Drug-Induced Liver Injury	288
Chemotherapy-Associated Steatohepatitis	289
Additional Causes of Macrovesicular Steatosis	289
Various Nutritional Disorders	290
Hepatitis C, Genotype 3	290
Inflammatory Conditions of the Small Bowel	290
Portal Vein Thrombosis	291
Wilson Disease	292
Microvesicular Steatosis	292
10. Iron Overload, Wilson Disease, and Other Genetic Liver Diseases	299
Iron Overload	299
Normal Iron Metabolism	299
Acquired Hepatic Iron Overload (Secondary Iron Overload)	300

Inherited Disorders of Iron Overload.	301
<i>HFE</i> -Associated Hereditary Hemochromatosis	302
Hereditary Hemochromatosis Type 2 (Juvenile Hereditary Hemochromatosis) . .	305
<i>TFR2</i> -Related Hereditary Hemochromatosis	306
Ferroportin Disease	306
Aceruloplasminemia	306
Hemochromatosis Type 5 (Autosomal Dominant Iron Overload)	306
African Iron Overload	307
Neonatal Hemochromatosis (Gestational Alloimmune Liver Disease)	307
Disorders of Porphyrin Metabolism.	309
Porphyria Cutanea Tarda	309
Erythropoietic Protoporphyrria.	310
Wilson Disease	311
Alpha-1-Antitrypsin Deficiency	316
Tyrosinemia	319
Disorders of Carbohydrate Metabolism.	320
Glycogen Storage Diseases	320
Lafora Disease.	324
Galactosemia	324
Hereditary Fructose Intolerance.	325
Mucopolysaccharidoses	327
Lysosomal Storage Disorders	330
Gaucher Disease	330
Acid Sphingomyelinase Deficiency (Niemann-Pick Disease Types A and B)	332
Niemann-Pick Disease Type C	333
Lysosomal Acid Lipase Deficiency	335
Farber Disease.	336
<i>GLB1</i> -Related Disorders	337
Fabry Disease	337
Peroxisomal Disorders	337
Zellweger Spectrum Disorders	337
Mitochondrial Disorders	338
Urea Cycle Disorders	341
11. Transplantation Pathology.	353
Evaluation of the Donor Liver	353
Assessment of Steatosis	355
Other Features	355
Preservation/Reperfusion Injury	357
Small-for-Size Graft.	359
Vascular Occlusion	360
Hepatic Artery Thrombosis	361

Non-Neoplastic Diseases of the Liver

Venous Thrombosis/Stenosis	362
Allograft Rejection	362
Acute Antibody-Mediated Rejection	363
Chronic Antibody-Mediated Rejection	366
Acute Cellular Rejection.	366
Late Acute Cellular Rejection.	371
Chronic Rejection	371
Infections	374
Cytomegalovirus	374
Human Herpesvirus 6.	375
Adenovirus	376
Hepatitis E	377
Epstein-Barr Virus.	377
Post-Transplant Lymphoproliferative Disorder	377
Fungal Infections	378
Recurrent Disease	379
Hepatitis C	379
Hepatitis B	381
Recurrent Autoimmune Hepatitis	382
Recurrent Primary Biliary Cholangitis.	383
Recurrent Primary Sclerosing Cholangitis.	384
Recurrent and De Novo Nonalcoholic Fatty Liver Disease	386
Recurrent Alcoholic Liver Disease	387
De Novo Diseases Arising in the Transplanted Liver.	389
Plasma Cell Hepatitis (De Novo Autoimmune Hepatitis)	389
Idiopathic Post-Transplant Chronic Hepatitis and Fibrosis.	391
Biliary Stricture.	391
Hepatic Graft Versus Host Disease	392
12. Vascular Disorders	405
Hepatic Vein Lesions/Disorders of Outflow.	405
Budd-Chiari Syndrome.	405
Congestive Hepatopathy	409
Sinusoidal Obstruction Syndrome/Veno-Occlusive Disease	412
Sinusoidal Lesions	415
Peliosis Hepatis.	415
Hypertensive Diseases of Pregnancy (Hemolysis, Elevated Liver Enzymes, and Low Platelets [HELLP] Syndrome and Preeclampsia).	416
Sickle Cell Disease	416
Amyloidosis	418
Portal Vein Lesions.	421
Portal Vein Thrombosis	421

Congenital Anomalies and Portosystemic Shunts.	423
Noncirrhotic Portal Hypertension	425
Obliterative Portal Venopathy/Hepatoportal Sclerosis	425
Nodular Regenerative Hyperplasia.	427
Diseases of the Hepatic Artery	431
Ischemic Hepatitis	431
13. Systemic Diseases Involving the Liver	437
Inborn Errors of Immunity	437
Common Variable Immunodeficiency	438
Hyper-IgM Syndromes 1 and 3	443
Chronic Granulomatous Disease.	444
Immune Dysregulation, Polyendocrinopathy, and Enteropathy, X-Linked Syndrome	448
Autoimmune Polyendocrinopathy with Candidiasis and Ectodermal Dystrophy . . .	448
Veno-Occlusive Disease with Immunodeficiency	449
Hemophagocytic Lymphohistiocytosis	449
Gastrointestinal Disorders	451
Celiac Disease.	451
Inflammatory Bowel Disease	452
Systemic Infections.	453
Human Immunodeficiency Virus Infection.	453
Sepsis	455
Nonspecific Hepatitis	457
Collagen Vascular Diseases.	458
Anorexia Nervosa	459
Liver Disease in Pregnancy.	460
Acute Fatty Liver of Pregnancy	461
Intrahepatic Cholestasis of Pregnancy.	462
Cystic Fibrosis.	463
Liver Findings in Diabetes Mellitus	465
Glycogenic Hepatopathy	466
Hepatic Vascular Lesions in Diabetes Mellitus.	467
14. Cryptogenic Cirrhosis.	475
General Approach to Classify a Case as Cryptogenic Cirrhosis.	475
Frequency of Cryptogenic Cirrhosis	476
Most Common Histologic Diagnoses for Clinical Cryptogenic Cirrhosis.	476
Outcomes After Liver Transplantation.	477
Common Challenges in Identifying the Cause of Cirrhosis.	477
Burned-Out Disease	477
Assessing the Contribution of Coexisting Diseases.	478
Unlikely Causes of Cryptogenic Cirrhosis.	479

Non-Neoplastic Diseases of the Liver

General Patterns of Cirrhosis	479
Micronodular and Macronodular Cirrhosis.	479
Biliary Pattern of Cirrhosis.	480
Interpretation of Other Individual Histologic Findings	482
Marked Iron Overload	482
Marked Copper Overload.	483
Ground-Glass Inclusions	483
Alpha-1-Antitrypsin Globules	483
Fat, Balloon Cells, Mallory Bodies	483
Granulomas	484
Vascular Outflow Disease	484
Practical Approach	484
Cirrhosis, No Cause Identified Histologically	485
Cirrhosis, Possible Cause Identified Histologically	486
Cirrhosis, Probable or Definite Cause Identified Histologically	486
Index	489
