

Content

1. Introduction	7
1.1 The central hypothesis—in bad neighbourhood?	12
1.2 Digital capitalism and value	17
1.3 Productive forces and the market	19
1.4 Three distributive forces and their development	22
1.5 Illustrations and destructions	24
2. Digital Capitalism Revisited—again?	27
2.1 Dan Schiller and the emergence of digital capitalism	30
2.2 Dynamic—Transformation—Actors	33
2.3 Immateriality—Labour—Value	37
2.4 Scarcity—Superabundance—Crisis	45
2.5 Much said—any questions answered?	58
3. The First Blind Spot: Value in Digital Capitalism	61
3.1 Mazzucato or the rediscovery of value	62
3.2 Whoever speaks of value	67
3.3 Continuing the search for the new	79
4. Transformation and the Productive Forces	83
4.1 Polanyi's Great Transformation	86
4.2 Marx's development of the productive forces	97
4.3 The productive forces and digital capitalism: reductionism and misunderstandings	107
5. The Second Blind Spot: The Realisation of Value in (Digital) Capitalism	113
5.1 Expansion and the market	114
5.2 Consumption and society	121
5.3 Communication and crisis	129

6. The Distributive Forces and (Digital) Capitalism:	
What is New?	139
6.1 The distributive force 'advertising and marketing'	142
6.2 The distributive force 'transport and warehousing'	147
6.3 The distributive force 'control and prediction'	155
6.4 How the distributive forces combine with digitalisation	166
7. The Distributive Forces and (Digital) Capitalism:	
Some Clarifications	173
7.1 Distinction: relations of distribution versus circulation	174
7.2 Transformation or casting off the skin: the disruption of the productive forces?	182
7.3 The development of productive and distributive forces—conceived as one	193
8. The Distributive Forces in Digital Capitalism:	
Some Empirical Illustrations	199
8.1 GAFAM and the platform economy	200
8.2 Catalysts for value realisation	207
8.3 The distributive forces and merchant capital 4.0	221
9. Digitalisation:	
Distributive Force or Destructive Force?	231
Bibliography	253
List of Figures	279
