Contents

1 Basic notions and facts 1
- 1.1 Notation and prerequisites 1
- 1.2 Incidence algebras 4
- 1.3 Convex cones 7
- 1.4 Polyhedra 22
- 1.5 Recession cones 29
- 1.6 Valuations 33
- 1.7 Identities for characteristic functions 49
- 1.8 Polarity as a valuation 59
- 1.9 A characterization of polarity 64

2 Angle functions 71
- 2.1 Invariant measures 71
- 2.2 Angles 77
- 2.3 Conic intrinsic volumes and Grassmann angles 82
- 2.4 Polyhedral Gauss–Bonnet theorems 98
- 2.5 A tube formula for compact general polyhedra 105

3 Relations to spherical geometry 113
- 3.1 Basic facts 113
- 3.2 The gnomonic map 120
- 3.3 Spherical and conic valuations 122
- 3.4 Inequalities in spherical space 129

4 Steiner and kinematic formulas 135
- 4.1 A general Steiner formula for polyhedral cones 136
- 4.2 Support measures of general convex cones 147
- 4.3 Kinematic formulas 157
- 4.4 Concentration of the conic intrinsic volumes 170
- 4.5 Inequalities and monotonicity properties 183
- 4.6 Observations about the conic support measures 188

5 Central hyperplane arrangements and induced cones 195
5.1 The Klivans–Swartz formula 196
5.2 Absorption probabilities via central arrangements 206
5.3 Random cones generated by central arrangements 212
5.4 Volume weighted Schläfli cones 222
5.5 Typical faces 227
5.6 Intersections of random cones 237

6 Miscellanea on random cones 241
6.1 Random projections 241
6.2 Gaussian images of cones 243
6.3 Wendel probabilities in high dimensions 247
6.4 Donoho–Tanner cones in high dimensions 251
6.5 Cover–Efron cones in high dimensions 260
6.6 Random cones in halfspaces 277

7 Convex hypersurfaces adapted to cones 283
7.1 Coconvex sets 284
7.2 Mixed volumes involving bounded coconvex sets 288
7.3 Wulff shapes in cones 294
7.4 A Minkowski-type existence theorem 299
7.5 A Brunn–Minkowski theorem for coconvex sets 306
7.6 Mixed volumes of general coconvex sets 310
7.7 Minkowski's theorem for general coconvex sets 313
7.8 The cone-volume measure 320

8 Appendix: Open questions 325
