Contents

Preface	i
Janusz S. Bień Towards Displacement Model of Memory	1
Toni Bollinger / Ulrich Hedtstück / Claus – Rainer Rollinger / Rudi Studer Text Understanding in LILOG	21
Ralph Grishman Domain Modeling for Language Analysis	41
Walter von Hahn Analysis and Generation of Discourse	59
Eva Hajičová Automatic Compilation of a Knowledge Base	71
Yasunari Harada On Describing Natural Languages in Unification Environments	83
Robert R. Hoffman What Is a Hill? Computing the Meanings of Topographic and Physiographic Terms	-97
Jürgen Krause The Concepts of Sublanguage and Language Register in Natural Language Processing	129
Jürgen Kunze Semantic Representation as a Link between Parsing and Knowledge Representation	159
Ira Monarch / Sergei Nirenburg ONTOS: An Ontology – Based Interactive Know – ledge Acquisition System	183
Greg Myers / Tony Hartley Modeling Lexical Cohesion and Focus in Written Texts: Popular Science Articles and the Naive Reader	201

James Pustejovsky	
Semantic Function and Lexical Decomposition	243
Ulrich Reimer / Udo Hahn	
An Overview of the Text Understanding System	
TOPIC	305
Dietmar Rösner	
Text Generation in the Framework of the SEMSYN	321
Project: Current Status, Future Prospects	321
Annely Rothkegel Knowledge Representation and Text Processing	331
Petr Sgall	221
Meaning, Sense, and Contradiction	353
Jörg H. Siekmann	
Unification Theory	365
Brian M. Slator / Yorick A. Wilks	
Towards Semantic Structures from Dictionary	
Entries	419
Harold Somers	4.61
Subcategorization Frames and Predicate Types	461
Gerhard Strube Functional Constraints for Modeling Human	
Empirical Constraints for Modeling Human Language Processing: On – Line Analysis of	
Temporal Sentences	489
Masaru Tomita	
Parser Factory: The Universal Parser Compiler and	
Its Application to a Knowledge – Based Speech	
Translation System	515
Index	553
Authors and Editors	557
