

Contents

Part 1: Introduction

1 Optimization for Total Hip Arthroplasty and Total Knee Arthroplasty, 1

Alexander Orem and Rakesh R. Veerareddy

Introduction, 1

Risk Factors and Optimization, 1

Obesity, 1

Diabetes, 2

Smoking, 2

Intravenous Drug Use, 2

Malnutrition, 3

Frailty, 3

Rheumatologic disease, 3

Who Should Be Offered Elective Total Knee Arthroplasty and Total Hip Arthroplasty?, 3

Selection for Outpatient Arthroplasty, 3

2 Managing Medical Complications Following Total Joint Arthroplasty, 7

Linda Suleiman, Y. J. Sean Lee, and Colin Cantrell

Introduction, 7

Venous Thromboembolism, 8

Incidence, 8

Risk Factors, 8

Diagnosis, 8

Treatment, 8

Prevention, 9

Lower Respiratory Tract Infections/Pneumonia, 9

Incidence, 10

Risk Factors, 10

Diagnosis, 10

Treatment, 10

Prevention, 10

Acute Kidney Injury, 11

Incidence, 11

Risk Factors, 12

Diagnosis, 12

Treatment, 12

Prevention, 12

Cerebrovascular Accident, 13

Incidence, 13

Risk Factors, 13

Diagnosis, 13

Treatment, 13

Prevention, 13

Myocardial Infarction, 14

Introduction, 14

Incidence, 14

Risk Factors, 14

Diagnosis, 14

Treatment, 14

Prevention, 14

3 Pain Management Following Total Hip Arthroplasty and Total Knee Arthroplasty, 18

Jeffrey J. Mojica, Mohammad R. Rasouli, Deepti

Harshavardhana, Alan Molina, and Eugene R. Viscusi

Introduction, 18

Pain Pathway, 18

Multimodal Analgesia, 19

Preoperative Phase, 19

Preemptive Analgesia, 19

Special Considerations for Opioid-Tolerant Patients, 20

Multimodal Analgesic Agents, 21

Acetaminophen, 21

Nonsteroidal Antiinflammatory Drugs, 21

Gabapentinoids, 21

Intraoperative and Postoperative Phases, 23

Periarticular Infiltration, 23

Dexamethasone, 23

Ketamine, 23

Epidural Analgesia, 24

Peripheral Nerve Blocks, 24

Interspace Between the Popliteal Artery and

Posterior Capsule of the Knee Block, 26

Quadratus Lumborum Block, 26

Novel Peripheral Nerve Blocks for Total Hip Arthroplasty, 27

Postdischarge Analgesia, 27

Analgesia for Revision Hip and Knee Surgery, 28

Conclusion, 28

4 Avoiding Complications With Outpatient Total Hip and Knee Arthroplasty, 34

Brian Darrith and Nicholas B. Frisch

Introduction, 34

Preoperative Considerations—Patient Selection and Education, 34

Intraoperative Complications—Perioperative Protocols, 36

Contents

- Anesthesia and Pain Control, 36
- Additional Considerations for an Ambulatory Surgery Center, 38
- Postoperative Complications, 38
 - Managing Immediate Issues, 38
 - Managing the Patient After Discharge, 39
- Early Postoperative Complications: Prevalence and Management, 40
- Conclusion, 41

Part 2: Knee

5 Complications and Outcomes of Nonoperative Treatment Modalities in Knee Osteoarthritis, 44

Hope E. Skibicki and Chad A. Krueger

- Introduction, 44
- Nonoperative Treatment Modalities: Strong Recommendation, 45
 - Aerobic Exercise and Strength Training, 45
 - Nonsteroidal Antiinflammatory Drugs, 45
- Nonoperative Treatment Modalities: Moderate Recommendation, 46
 - Weight Loss, 46
- Nonoperative Treatment Modalities: Inconclusive Recommendation, 47
 - Intraarticular Corticosteroid Injections, 47
 - Platelet-Rich Plasma, 48
 - Partial Meniscectomy, 48
- Nonoperative Treatment Modalities (Strong Recommendation Against), 48
 - Viscosupplementation, 48
- Postoperative Complications Associated With Nonoperative Treatment, 49
 - Risk of Periprosthetic Joint Infection After Intraarticular Injection, 49
- Ipsilateral Hip and Knee Osteoarthritis, 50
- Creating Realistic Expectations, 50
- Conclusion, 50

6 Preoperative Planning for Total Knee Arthroplasty, 55

Raheel Ali and Robert Sershon

- History, 55
- Physical Exam, 56
- Radiographs, 56
- Surgical Principles, 58
- Complex Primary Total Knee Arthroplasty, 60
- Conclusion, 60

7 Gaining Surgical Exposure in Total Knee Arthroplasty, 64

David B. Merkow and Joshua C. Rozell

- Introduction, 64
- Preoperative Assessment, 64

- Management of Previous Incisions, 65
- Intraoperative Principles of Exposure, 66
 - Extensile Exposures, 66
 - Quadriceps Snip, 66
 - V-Y Turndown, 67
 - Banana Peel, 68
 - Femoral Peel, 68
 - Medial Epicondyle Osteotomy, 68
 - Tibial Tubercle Osteotomy, 69
- Conclusion, 70

8 Achieving Balance and Stability During a Total Knee Arthroplasty, 71

Chad A. Krueger and Matthew S. Austin

- Introduction, 71
- Preoperative Considerations—What Is Instability?, 71
- Intraoperative Total Knee Arthroplasty Balancing, 72
 - Mechanical Alignment Versus Kinematic Alignment, 72*
 - Gap Balancing Versus Measured Resection, 73
 - Patellar Tracking, 74
 - Sagittal Plane Balance, 74
 - Strategies for Obtaining Coronal Plane Balance, 75
 - Considerations for Valgus Knees, 75
 - Considerations for Varus Knees, 76
 - The Role of Technology, 76
 - Conclusion, 77

9 Ligamentous Injury in Total Knee Arthroplasty, 79

Gwo-Chin Lee, MD

- Introduction, 79
- Preoperative Considerations, 79
 - Anatomy and Biomechanics, 79
- Intraoperative Medial Collateral Ligament Injury, 79
- Recognition and Assessment of the Ligament Injury, 80
- Treatment Options, 80
- Lateral Ligamentous Injuries, 81
- Conclusions, 81

10 Neurovascular Injury in Total Knee Arthroplasty, 83

Casey M. O'Connor and Samik Banerjee

- Introduction, 83
- Vascular Injuries in Total Knee Arthroplasty, 84
 - Preoperative Risk Factors and Assessment, 84
 - Intraoperative Considerations—Tourniquet Use, 84
 - Mechanism of Vascular Injury, 85
 - Acute Arterial Occlusion, 85
 - Arterial Pseudoaneurysm Formation, 86
 - Arterial Severance, 86

- Arteriovenous Fistula Formation, 87
- Preventing Arterial Injury During Total Knee Arthroplasty, 87
- Managing Intraoperative Acute Bleeding Complications, 88
- Nerve Injuries in Total Knee Arthroplasty, 88**
 - Preoperative Risk Factors, 88
 - Valgus Deformity or Flexion Contracture, 88
 - Postoperative Epidural Analgesia, 88
 - Neuropathy, 88
 - Rheumatoid Arthritis, 89
 - Tourniquet Use, 89
 - Postoperative Considerations—Hematoma, 89
 - Constrictive Dressing, 89
 - Postoperative Treatment of Peroneal Nerve Palsy After Total Knee Arthroplasty, 89
 - Complex Regional Pain Syndrome (CRPS), 89
- 11 Periprosthetic Knee Fractures, 92**
Ryan S. Charette, Alex L. Neuwirth, and Roshan P. Shah
 - Introduction, 92
 - Types of Periprosthetic Knee Fractures, 92
 - Intraoperative, 92
 - Postoperative, 93
 - Classification, 93
 - Incidence, 94
 - Risk Factors, 94
 - Treatment, 95
 - Intraoperative Periprosthetic Femur Fractures, 95
 - Postoperative Periprosthetic Femur Fractures, 95
 - Nonoperative Treatment, 95*
 - Open Reduction Internal Fixation (ORIF), 96*
 - Revision Total Knee Arthroplasty, 97*
 - Periprosthetic Tibia Fractures, 97
 - Periprosthetic Patella Fractures, 98
 - Outcomes, 99
 - Intraoperative Fractures, 99
 - Distal Femur Periprosthetic Fractures, 99
 - Periprosthetic Tibia Fractures, 100
 - Periprosthetic Patella Fractures, 100
- 12 Unicompartmental Knee Arthroplasty, 103**
Tad L. Gerlinger and Brian C. Fuller
 - Introduction, 103
 - Preoperative Factors, 104
 - Ligamentous Instability, 104
 - Partial-Thickness Cartilage Loss, 105
 - Coronal Deformity, 105
 - Flexion Contracture, 106
 - Previous High Tibial Osteotomy, 106
 - Intraoperative Complications, 106
 - Cartilage Injury, 106
 - Iatrogenic Collateral Ligament Injury, 106
 - Aberrant Tibial Resection, 106
 - Component Malposition, 107
 - Postoperative Complications, 108**
 - Bearing Dislocation, 108
 - Aseptic Loosening, 108
 - Progression of Arthritis, 108
 - Polyethylene Wear, 109
 - Infection, 109
 - Periprosthetic Fracture, 110
 - Tibial Subsidence, 110
 - Conclusion, 111
- 13 Patellofemoral Arthroplasty, 117**
Blair Ashley and Jess H. Lonner
 - Introduction, 117
 - Patient Selection, 117
 - Patellar Maltracking and Instability, 118
 - Tibiofemoral Disease Progression, 119
 - Other Complications, 121
 - Conclusion, 121
- 14 Marlex Mesh Reconstruction of Extensor Mechanism Disruption in Total Knee Arthroplasty, 124**
Charles P. Hannon and Matthew P. Abdel
 - Introduction, 124
 - Intraoperative Extensor Mechanism Disruption, 125
 - Postoperative Extensor Mechanism Disruption, 125
 - Surgical Technique and Rehabilitation—A Case Example, 125
 - Tips for Marlex Mesh Reconstruction Technique, 128
 - Managing the Implants, 128
 - Tibial Trough Technique for Retained Implants, 128
 - Ventral and Dorsal Soft-Tissue Coverage of the Marlex Mesh, 128
 - Outcomes and Complications After Marlex Mesh Reconstruction, 130
 - Conclusion, 131
- 15 Painful Total Knee Arthroplasty Workup, 134**
Arthur Malkani, Mark Williams, and Travis Parkulo
 - Introduction, 134
 - History, Physical Examination, and Imaging, 134
 - Intrinsic Etiologies for Knee Pain Following Total Knee Arthroplasty, 135
 - Prosthetic Joint Infection, 135
 - Instability, 136
 - Aseptic Loosening, 139
 - Polyethylene Wear and Osteolysis, 140
 - Malalignment, 141
 - Arthrofibrosis, 143
 - Extrinsic Etiologies for Knee Pain Following Total Knee Arthroplasty, 143
 - Conclusion, 144

Part 3: Hip

16 Preoperative Planning for Total Hip Arthroplasty, 149

Maria Bautista and Jorge Manrique

Introduction, 149

Preoperative Templating, 149

Obtaining Preoperative Radiographs, 149

Anatomic and Biomechanical Landmarks, 150

Templating and Restoration of Hip

Biomechanics, 150

Special Considerations, 152

Digital Templating, 153

Templating Accuracy, 153

New Technology, 153

Conclusion, 153

17 Complications of Exposures for Total Hip Arthroplasty, 156

Danielle Ponzio and Andrew B. Kay

Introduction, 156

Posterior Approach, 156

Intraoperative Complications, 156

Sciatic Nerve Injury, 156

Postoperative Complications, 157

Dislocation, 157

Transgluteal Approaches: Anterolateral and Direct Lateral, 157

Intraoperative Complications, 157

Abductor Weakness, 157

Postoperative Complications, 158

Heterotopic Ossification, 158

Direct Anterior Approach, 158

Intraoperative Complications, 158

Neurovascular Injuries, 158

Fracture, 159

Postoperative Complications, 160

Wound Healing and Infection, 160

Conclusion, 160

18 Component Positioning and Stable Fixation in Total Hip Arthroplasty, 166

Michael Harvey, Miles Batty, and Chris Melnic

Introduction, 166

Preoperative Considerations, 166

Initial Evaluation, 166

Templating, 167

Implant Options, 167

Cementless Femoral Components, 167

Cementless Acetabular Components, 167

Cemented Implants, 168

Spinopelvic Relationship, 168

Intraoperative Considerations and

Complications, 169

Positioning of the Acetabular Component, 169

Stable Fixation of the Acetabular Component, 170

Positioning of the Femoral Component, 170

Stable Fixation of the Femoral Component, 171

Hip Stability and Restoration of Leg Length, 172

Postoperative Considerations and

Complications, 172

Postoperative Leg Length Discrepancy, 172

Component Migration, 173

Summary, 174

19 Total Hip Arthroplasty Instability, 177

Simon P. Garceau and Ran M. Schwarzkopf

Epidemiology, 177

Risk Factors and Prevention, 177

Diagnosis, 179

Treatment, 180

Reduction, 180

Revision, 181

Abductor Deficiency, 181

Dual-Mobility Liners, 181

Constrained Liners, 183

Summary, 185

20 Neurovascular Injury in Total Hip Arthroplasty, 188

Nicholas M. Brown, Andrew Schneider, Cameron Killen, and Benjamin Davis

Introduction, 188

Nerve Injuries, 188

Anatomical Overview, 188

Diagnosis, 189

Treatment, 190

Vascular Injuries, 191

Anatomic Overview, 191

Diagnosis, 192

Treatment, 192

Considerations for Specific Approaches, 193

Posterior Approach, 193

Direct Anterior Approach, 193

Lateral Approach, 194

Conclusion, 194

21 Intraoperative Periprosthetic Fracture During Total Hip Arthroplasty, 197

Yehuda Kerbel, Anthony Boniello, and Wayne G. Paprosky

Background, 197

Preoperative Evaluation and Prevention, 198

Intraoperative Periprosthetic Fractures:

Femur, 199

Management of Intraoperative Periprosthetic

Fractures: Femur, 200

Longitudinal Calcar Split, 200

Proximal Femur Fractures, Including Fractures of the Greater Trochanter, 200

Complete Midshaft Diaphyseal Femur Fractures, 200

- Distal Femur Fractures Extending Well Beyond the Prosthesis, 200
 - Intraoperative Periprosthetic Fractures:
 - Acetabulum, 200
 - Management of Intraoperative Periprosthetic Fractures: Acetabulum, 201
 - Nondisplaced Fractures With Stable Components, 202
 - Nondisplaced or Displaced Fractures With Unstable Component, 202
 - Postoperative Management, 203
 - Conclusion, 203
- 22 Troubleshooting the Direct Anterior Approach, 206**
 - Mark D. Hasenauer, Robert A. Sershon, Craig J. McAsey, and William G. Hamilton, MD*
 - Introduction, 206
 - Preoperative Factors, 206
 - Patient Assessment, 206
 - Body Habitus and Physical Exam, 206*
 - Imaging Assessment, 207
 - Operative Table Selection, 207
 - Specialized Surgical Table, 207
 - Standard Table, 208
 - Table Attachment Devices, 208
 - Intraoperative Complications and Their Management, 208
 - Standard Incision and Skin Management, 208
 - Bikini Incision, 208
 - Initial Exposure, 209
 - Acetabular Preparation and Implantation, 209
 - Femoral Exposure, 209
 - Femoral Preparation, 210
 - Extensile Exposure, 210
 - Femoral-Sided Complications, 210
 - Femoral Perforation, 210*
 - Calcar Fractures, 211*
 - Greater Trochanter Fracture, 211*
 - Femoral Shaft Fracture, 211*
 - Conclusion, 211
- 23 Postoperative Periprosthetic Fractures in Total Hip Arthroplasty, 214**
 - Arpan Patel, Jefferson Li, and Brett Levine*
 - Introduction, 214
 - Periprosthetic Femur Fractures, 215
 - Epidemiology, 215
 - Preoperative Risk Factors, 215
 - Patient-Related Factors, 215*
 - Intraoperative Risk Factors, 215
 - Postoperative Risk Factors for Late Periprosthetic Fractures, 216
 - Diagnosis and Evaluation, 216
 - Classification, 216
 - Treatment, 217
 - Early Postoperative Periprosthetic Fractures, 217*
 - Late Postoperative Periprosthetic Fracture, 219*
 - Outcomes, 222
 - Periprosthetic Acetabular Fractures, 224
 - Epidemiology, 224
 - Risk Factors, 224
 - Diagnosis and Evaluation, 224
 - Classification, 226
 - Treatment, 226
 - Preoperative Planning for Specific Fractures, 226
 - Acute Intraoperative Fractures, 228*
 - Acute Postoperative Fractures—Trauma, 229*
 - Chronic Postoperative Fractures—Insufficiency Fractures From Osteolysis and Radiation, 229*
 - Outcomes, 229
 - Conclusion, 231
- 24 Workup of the Painful Total Hip Arthroplasty, 235**
 - Kimberly A. Bartosiak and Visili Karas*
 - Preoperative Considerations, 235
 - Differentiating Hip Versus Spine Pathology, 235
 - Postoperative Considerations, 235
 - Evaluation for Periprosthetic Joint Infection, 235
 - Osteolysis and Wear, 236
 - Recognizing Implants and Bearing Surfaces as Pain Generators, 238
 - Taper Corrosion, 239

 - Insufficient or Excessive Correction of Acetabulum, 246
 - Postoperative Complications, 247
 - Osteonecrosis, 247
 - Nonunion, 247
 - Stress Fracture/Postoperative Fracture, 247
 - Venous Thromboembolism, 248
 - Infection, 248
 - Heterotopic Ossification, 249

Contents

Symptomatic Hardware, 249
Conversion to Total Hip Arthroplasty, 249
Conclusion, 249

Part 4: Hip and Knee Periprosthetic Joint Infections

26 Diagnosis and Definitions of Periprosthetic Joint Infections, 253

Javad Parvizi and Noam Shohat

Introduction, 253
Diagnostic Tests, 253
 Clinical Manifestations, 253
 Serum Markers, 254
 Synovial Fluid Markers, 255
 Intraoperative Findings, 256
Formal Definitions Related to Periprosthetic Joint Infection, 257
 Diagnostic Criteria, 257
 Demarcation Between Acute and Chronic, 258
 Definitions for Treatment Success/Failure, 259
Conclusion, 260

27 Management of Acute Periprosthetic Joint Infections, 263

Joseph Serino, Charles P. Hannon, and Craig J. Della Valle

Introduction, 263
Diagnosis of Acute Postoperative Periprosthetic Joint Infection, 263
Treatment of Acute Postoperative Periprosthetic Joint Infection, 264
 Technique, 265
 Postoperative Antibiotics, 266
 Outcomes, 266
One-Stage Exchange of Cementless Components, 266
 Indications and Contraindications, 269
 Technique, 269
 Outcomes, 270
Two-Stage Exchange, 270
Wound Management, 270
 Prevention of Wound Complications, 270
 Postoperative Incisional Drainage, 271
 Hematoma, 271
Conclusion, 271

28 Management of Chronic Periprosthetic Joint Infection, 275

Carlos A. Higuera, Ardalan Sayan, and Joseph Palmer

Introduction, 275
 Systemic Host Grade, 275
 Local Extremity Grade, 276
Treatment Options, 276
 One-Stage Revision Arthroplasty, 277
 Surgical Technique, 277

Two-Stage Revision Arthroplasty, 278
 Surgical Technique, 279
DAIR, 279
 Surgical Technique, 280
Antibiotic Suppression Alone, 280
Optimization of Spacers in Two-Stage Revisions, 280
Salvage Options, 281
Conclusion, 282

29 Antibiotics and Cement, 287

Eric Lee and Antonia F. Chen

Introduction, 287
Polymethylmethacrylate (PMMA), 287
 Monomer Liquid, 287
 Polymer Powder, 288
 Curing, 288
 Viscosity, 288
 Biomechanical Properties, 289
Duration of Local Antibiotic Treatment, 289
 Modifications, 289
 Cement Preparation—Surgeon Molded Versus Prefabricated, 289
 Storage, 289
 Alternative Carriers, 289
Antibiotic-Loaded Bone Cement, 290
Choosing Antibiotics, 290
 Heat Stability, 290
Heat-Stable Antibiotics in PMMA, 291
 Formulation, 291
 Elution/Mixing Technique, 291
 Cement Beads, 291
PMMA Spacers Versus Beads, 291
 Antibiotics, 291
Antibiotic Dosing, 292
Duration of Elution/Two-Stage Revision, 292
Specific Antibiotics, 292
 Toxicity/Complications, 292
Conclusion, 295

30 Antibiotic Spacer Techniques in Hip and Knee, 298

Cody C. Green, Bryan D. Springer, and Omar A. Behery

Introduction, 298
 Antibiotic-Loaded Bone Cement Spacers in the Hip and Knee, 298
Medical Complications of Hip and Knee Spacers, 299
 Mortality, 299
 Nephrotoxicity, 301
Surgical Complications of Hip and Knee Spacers, 301
 Wound Complications, 301
 Spacer Fracture-Dislocation, 301
 Acetabular Erosion, 302
 Persistent Infection, 303
Conclusion, 303

Index, 305
