PART I Background

CHAPTER 1

The Development of Neuropsychology 1

Ⓢ PORTRAIT Living with Traumatic Brain Injury 1

1.1 The Brain Theory 2

What Is the Brain? 2

How Does the Brain Relate to the Rest of the Nervous System? 4

Ⓢ 1.2 Perspectives on the Brain and Behavior 4

Aristotle: Mentalism 5

Descartes: Dualism 5

Darwin: Materialism 6

Contemporary Perspectives 7

Ⓢ 1.3 Brain Function: Insights from Brain Injury 7

Localization of Function 8

Lateralization of Function 9

Distributed Function 11

Hierarchical Organization 12

SNAPSHOT Ⓢ The Dilemma in Relating Behavior and Consciousness 13

1.4 The Neuron Theory 16

Nervous System Cells 16

Identifying the Neuron 16

Ⓢ Relating Electrical Activity in Neurons to Behavior 17

Ⓢ Connections Between Neurons As the Basis of Learning 18

Ⓢ 1.5 Contributions to Neuropsychology from Allied Fields 19

Neurosurgery 19

Psychometrics and Statistical Evaluation 21

Structural and Functional Brain Imaging 22

CHAPTER 2

Research on the Origins of the Human Brain and Behavior 26

Ⓢ PORTRAIT Evolving a Capacity for Language 26

2.1 Human Origins and the Origins of Larger Brains 27

Research on Human Evolution 27

Evolution of the Human Brain and Behavior 28

Relating Brain Size and Behavior 29

The Meaning of Human Brain-Size Comparisons 34

The Acquisition of Culture 35

Ⓢ 2.2 Comparative Research in Neuropsychology 36

Understanding Brain Mechanisms 36

Designing Animal Models of Disorders 37

Describing Evolutionary Adaptations 37

2.3 Genes, Environment, and Behavior 38

Mendelian Genetics and the Genetic Code 38

SNAPSHOT Ⓢ A Genetic Diagnosis 39

Applying Mendel's Principles 41

Genetic Engineering 43

Phenotypic Plasticity and the Epigenetic Code 45

CHAPTER 3

Nervous System Organization 50

Ⓢ PORTRAIT Stroke 50

3.1 Neuroanatomy: Finding Your Way Around the Brain 51

Describing Location in the Brain 51

A Wonderland of Nomenclature 52

3.2 Overview of Nervous System Structure and Function 53

Support and Protection 53

Blood Supply 55

Neurons and Glia 56

Gray, White, and Reticular Matter 57

Layers, Nuclei, Nerves, and Tracts 58

3.3 Origin and Development of the Central Nervous System 58**3.4 The Spinal Cord 59**

- Spinal-Cord Structure and Spinal-Nerve Anatomy 60
- Spinal-Cord Function and the Spinal Nerves 60
- Cranial Nerve Connections 62
- Autonomic Nervous System Connections 64

3.5 The Brainstem 65

- The Hindbrain 65
- The Midbrain 66
- The Diencephalon 67

3.6 The Telencephalon 68

- The Basal Ganglia 68
- The Limbic System 69
- The Neocortex 70
- Fissures, Sulci, and Gyri 71
- Cortical Organization in Relation to Inputs, Outputs, and Function 71
- Cellular Organization in the Cortex 73
- Cortical Connections 74

SNAPSHOT ☉ How Many Cortical Areas Are There? 75

3.7 The Crossed Brain 76**CHAPTER 4****The Structure and Electrical Activity of Neurons 80**

☉ **PORTRAIT** The Halle Berry Neuron 80

4.1 The Neuron's Structure 81

- Overview of a Neuron 81
- The Neuron as a Factory 81
- The Cell Membrane: Barrier and Gatekeeper 82
- The Nucleus: Blueprints for Proteins 84
- Protein Synthesis: Transcription and Translation 85
- Applying Epigenetic Mechanisms 86
- Proteins: The Cell's Products 87
- Golgi Bodies and the Cytoskeleton 87
- Crossing the Cell Membrane: Channels, Gates, and Pumps 88

4.2 The Neuron's Electrical Activity 89

- Recording from an Axon 90
- How the Movement of Ions Creates Electrical Charges 90
- The Resting Potential 93
- Graded Potentials 95
- The Action Potential 96

4.3 Sending a Message Along an Axon 99

- The Nerve Impulse 99
- Saltatory Conduction and Myelin Sheaths 99

SNAPSHOT ☉ Diagnosing MS 101

4.4 How Neurons Integrate Information 101

- Excitatory and Inhibitory Postsynaptic Potentials 102
- Voltage-Sensitive Channels and the Action Potential 102
- Summation of Inputs 103
- The Versatile Neuron 104

4.5 Stimulating and Recording with Optogenetics 105**CHAPTER 5****Communication Between Neurons 108**

☉ **PORTRAIT** Otto Loewi's Dream Breakthrough 108

5.1 Neurotransmitter Discovery 109**5.2 The Structure of Synapses 110**

- ☉ Chemical Synapses 110
- Electrical Synapses 111

☉ 5.3 Neurotransmission in Four Steps 112

- Step 1: Transmitter Synthesis and Storage 112
- Step 2: Neurotransmitter Release 113
- Step 3: Receptor-Site Activation 113
- Step 4: Neurotransmitter Deactivation 114

☉ 5.4 Types of Synapses 114

- Synaptic Variations 114
- Excitatory and Inhibitory Messages 115

☉ 5.5 Varieties of Neurotransmitters 116

- Four Criteria for Identifying Neurotransmitters 116
- Three Classes of Neurotransmitters 117

☉ 5.6 Excitatory and Inhibitory Receptors 120

- Ionotropic Receptors and Excitation 120
- Metabotropic Receptors and Inhibition 121
- Excitatory and Inhibitory Receptor Effects 122

☉ 5.7 Neurotransmitter Activating Systems and Behavior 122

- Neurotransmission in Peripheral Nervous System Divisions 123
- Activating Systems of the Central Nervous System 123

SNAPSHOT ☉ Neurochemical Links Between SIDS and Sleep Apnea 126

CHAPTER 6**The Influence of Drugs and Hormones on Behavior 130**Ⓢ **PORTRAIT** The Case of the Frozen Addict 130**6.1 Principles of Psychopharmacology 131**

- Routes of Drug Administration 131
- Routes of Drug Removal 132
- Revisiting the Blood–Brain Barrier 132
- Drug Routes and Dosage 133

Ⓢ **6.2 Drug Actions in Synapses 134**

- Steps in Synaptic Transmission 134
- Tolerance 136
- Sensitization 136
- Can Drugs Cause Brain Damage? 138

6.3 Grouping Psychoactive Drugs 140

- Group I: Antianxiety Agents and Sedative Hypnotics 140
- Group II: Antipsychotic Agents 142
- Group III: Antidepressants and Mood Stabilizers 142
- Group IV: Opioid Analgesics 144
- Group V: Psychotropics 146

SNAPSHOT Ⓢ Cognitive Enhancement 147

- General Stimulants 149

Ⓢ **6.4 Addiction 149**

- Wanting-and-Liking Theory 149
- Treating Drug Abuse 150

6.5 Hormones 153

- Hierarchical Control of Hormones 153
- Ⓢ Classes and Functions of Hormones 154

CHAPTER 7**Imaging the Brain's Activity 162**Ⓢ **PORTRAIT** Angelo Mosso 162**7.1 Recording the Brain's Electrical Activity 163**

- Single-Cell Recording 163
- Electroencephalographic Recording 165
- Event-Related Potentials 168
- Magnetoencephalography 170

7.2 Brain Stimulation 171

- Deep Brain Stimulation 171
- Transcranial Magnetic Stimulation 172

7.3 Static Imaging Techniques 172

- Imaging by X-Ray 172
- Computed Tomography 173

7.4 Dynamic Brain Imaging 174

- Positron Emission Tomography 174
- Magnetic Resonance Imaging 176
- Optical Tomography 182

SNAPSHOT Ⓢ Tuning In to Language 182Ⓢ **7.5 Comparing Brain-Imaging Techniques and Uses 183**

- Imaging Techniques, Pros and Cons 184
- Toward Multimodal Analyses 185

CHAPTER 8**Organization of the Sensory Systems 188**Ⓢ **PORTRAIT** Phantoms of the Brain 188**8.1 General Principles of Sensory-System Function 189**

- Sensory Receptors Are Energy Filters 189
- Receptors Transduce Energy 190
- Receptive Fields Locate Sensory Events 191
- Receptors Identify Constancy and Change 191
- Receptors Distinguish Self from Other 191
- Receptor Density Determines Sensitivity 192
- Neural Relays Determine the Hierarchy of Motor Responses 192
- Central Organization of Sensory Systems 193

8.2 The Sensory Systems 196

- Vision 196
- Hearing 199
- Body Senses 202
- The Chemical Senses: Taste and Smell 208

SNAPSHOT Ⓢ Watching the Brain Make Flavor 209Ⓢ **8.3 Perception 212**

- Illusions 212
- Synesthesia 212
- Sensory Synergies 213

CHAPTER 9**Organization of the Motor System 216**Ⓢ **PORTRAIT** Mind in Motion 216**9.1 The Neocortex: Initiating Movement 217**

- Mapping the Motor Cortex Using Electrical Stimulation 219
- Multiple Representations in the Motor Cortex 220
- The Movement Lexicon 222
- Premotor Cortex and Movement Plans 223

- Sex Differences Revealed in Functional Imaging Studies 305
- Gender Identity and Sexual Orientation 306
- Research with Neurological Patients 308
- ⊗ Explanations for Sex Differences 309
- ⊗ **12.3 Environmental Effects on Cerebral Organization 313**
 - Language and Culture 313
 - Sensory and Environmental Deficits 315

CHAPTER 13

The Occipital Lobes and Networks 322

- ⊗ **PORTRAIT** An Injured Soldier's Visual World 322

13.1 Occipital-Lobe Anatomy 322

- Subdivisions of the Occipital Cortex 323
- Connections of the Visual Cortex 325

13.2 A Theory of Occipital-Lobe Function 325

- Visual Networks Extending Beyond the Occipital Lobe 326
- Visual Pathways Beyond the Occipital Lobe 329
- Imaging Studies of Dorsal and Ventral Streams 330
- Top-Down Predictions in Vision 331

- ⊗ **13.3 Disorders of Visual Pathways 332**

- ⊗ **13.4 Disorders of Cortical Function 333**

- Case B.K.: V1 Damage and a Scotoma 333
- Case D.B.: V1 Damage and Blindsight 335
- Case G.Y. and Related Cases: V1 Damage and Conscious Vision 335
- Case B.I.: More than Blindsight 335
- Case J.I.: V4 Damage and Loss of Color Vision 336
- Case P.B.: Conscious Color Perception in a Blind Patient 336
- Case L.M.: V5 (MT) Damage and the Perception of Movement 337
- Case D.F.: Occipital Damage and Visual Agnosia 337
- Case V.K.: Parietal Damage and Visuomotor Guidance 338
- Cases D. and T.: Higher-Level Visual Processes 338
- Conclusions from the Case Studies 339

- ⊗ **13.5 Visual Agnosia 339**

- Object Agnosias 339
- Other Visual Agnosias 340

13.6 Visual Imagery 341

- SNAPSHOT** ⊗ Generating Mental Images 342

CHAPTER 14

The Parietal Lobes and Networks 345

- ⊗ **PORTRAIT** Varieties of Spatial Information 345

14.1 Parietal-Lobe Anatomy 345

- Functional Regions of the Parietal Cortex 346
- Connections of the Parietal Cortex 347
- Anatomy of the Dorsal Stream 348

14.2 A Theory of Parietal-Lobe Function 349

- ⊗ Behavioral Uses of Spatial Information 350

- SNAPSHOT** ⊗ The Cognitive Neural Prosthetic 353

- The Complexity of Spatial Information 353

- ⊗ **14.3 Somatosensory Symptoms of Parietal Lesions 354**

- Somatosensory Thresholds 355
- Somatosensory Disorders 355
- Somatosensory Agnosias 356

- ⊗ **14.4 Symptoms of Posterior Parietal Damage 357**

- Bálint Syndrome 357
- Contralateral Neglect and Other Symptoms of Right Parietal Lesions 357
- The Gerstmann Syndrome and Other Left Parietal Symptoms 359
- Apraxia and the Parietal Lobe 360
- Drawing 361
- Spatial Attention 361
- Disorders of Spatial Cognition 362
- Left and Right Parietal Lobes Compared 362

- ⊗ **14.5 Major Symptoms and Their Assessment 363**

- Clinical Neuropsychological Assessment 364

14.6 Parietal-Lobe Networks 365

CHAPTER 15

The Temporal Lobes and Networks 370

- ⊗ **PORTRAIT** Living with Temporal-Lobe Damage 370

15.1 Temporal-Lobe Anatomy 370

- Subdivisions of the Temporal Cortex 371
- Connections of the Temporal Cortex 372
- Anatomy of the Ventral Stream 373

15.2 A Theory of Temporal-Lobe Function 374

- Sensory Processes 374
- Affective Responses 375
- Spatial Navigation 375
- The Superior Temporal Sulcus and Biological Motion 375
- Visual Processing in the Temporal Lobe 376
- Are Faces Special? 378
- Auditory Processing in the Temporal Lobe 380
- Olfactory Processing in the Temporal Lobe 384
- ⊗ Asymmetry of Temporal-Lobe Function 384

SNAPSHOT © Why Do We Love Music? 385

15.3 Temporal-Lobe Networks 385

© **15.4 Symptoms of Temporal-Lobe Lesions 386**

- Disorders of Auditory and Speech Perception 386
- Disorders of Music Perception 387
- Disorders of Visual Perception 388
- Disturbance of Visual- and Auditory-Input Selection 388
- Impaired Organization and Categorization 389
- Disorders of Odor Perception and Memory 389
- Inability to Use Contextual Information 390
- Memory Impairment 390
- Altered Affect and Personality 391
- Changes in Sexual Behavior 391

© **15.5 Clinical Neuropsychological Assessment of Temporal-Lobe Damage 391**

CHAPTER 16

The Frontal Lobes and Networks 395

© **PORTRAIT** Losing Frontal-Lobe Functions 395

16.1 Frontal-Lobe Anatomy 395

- Subdivisions of the Frontal Cortex 396
- Frontal-Lobe Networks 399

16.2 A Theory of Frontal-Lobe Function 400

- Functions of the Motor Cortex and Premotor Cortex 400
- Functions of the Prefrontal Cortex 401
- Heterogeneity of Frontal-Lobe Function 402

SNAPSHOT © Heterogeneity of Function in the Orbitofrontal Cortex 403

16.3 Executive Functions of the Frontal-Lobe Networks 403

© **16.4 Symptoms of Frontal-Lobe Lesions 404**

- Disturbances of Motor Function 405
- Loss of Divergent Thinking 407
- Environmental Control of Behavior 410
- Poor Temporal Memory 412
- © Impaired Social and Sexual Behavior 415
- Does a Spatial Deficit Exist? 417
- © Clinical Neuropsychological Assessment of Frontal-Lobe Damage 418

16.5 Intelligence and the Frontal Lobes 420

CHAPTER 17

Cortical Networks and Disconnection Syndromes 425

© **PORTRAIT** At Cross Purposes 425

17.1 Disconnecting Cognitive Functions 425

17.2 Anatomy of Cerebral Connections 427

© **17.3 Understanding Disconnection 428**

- Toward a Modern Understanding of Disconnection 429

© **17.4 Hemispheric Disconnection 430**

- Commissurotomy 430
- Callosal Agenesis and Early Transections 431

© **17.5 Disconnecting Sensorimotor Systems 432**

- Olfaction 432
- Vision 433
- Somatosensory Functions 433
- Audition 434
- Movement 434
- Effects of Partial Disconnection 435

SNAPSHOT © An fMRI Study of Disconnection 436

© **17.6 Lesion Effects Reinterpreted As Disconnection Syndromes 436**

- Apraxia 436
- Agnosia and Alexia 437
- Contralateral Neglect 437

© **17.7 Cortical Networks and Hubs 438**

- The Development of Networks 439
- Hubs and Connectivity in Brain Dysfunction 440

PART III Higher Functions

CHAPTER 18

Learning and Memory 443

© **PORTRAIT** The Discovery of Memory Systems 443

© **18.1 Memory and Amnesia 443**

- Varieties of Memory 444
- Varieties of Amnesia 445

© **18.2 Explicit Memory 447**

- Episodic Memory 447
- Semantic Memory 449
- Neural Substrates of Explicit Memory 450
- Hemispheric Specialization for Explicit Memory 455

© **18.3 Implicit Memory 457**

- Sparing of Implicit Memory in Amnesia 457
- Neural Substrates of Implicit Memory 458

© **18.4 Emotional Memory 461**

- Evoking Negative Emotions 461
- Neural Substrates of Emotional Memory 461
- Unique Aspects of Emotional Memory 462

- ⊙ **18.5 Short-Term Memory 462**
 - Short-Term Memory and the Temporal and Parietal Lobes 462
 - Short-Term Memory and the Frontal Lobes 463
 - ⊙ Neuropsychological Testing for Short-Term Memory Function 463

SNAPSHOT ⊙ Disrupting Memory Formation 464

- ⊙ **18.6 Special Memory Abilities 466**
 - Savant Syndrome 466
 - Superior Autobiographical Memory 467

- 18.7 Issues in Relating Memory to Neural Structures 467**
 - Memory and Daily Life 469

CHAPTER 19

Language 473

⊙ **PORTRAIT** Multilingual Meltdown 473

19.1 What Is Language? 473

- Language Structure 474
- Producing Sound 474
- Core Language Skills 475

19.2 Searching for the Origins of Language 477

- Discontinuity Theories 477

SNAPSHOT ⊙ Genetic Basis for an Inherited Speech and Language Disorder 478

- Continuity Theories 478
- Experimental Approaches to Language Origins 481

19.3 Localization of Language 483

- Wernicke–Geschwind Model 483
- Anterior and Posterior Language Regions 483
- Dual Pathways for Language 484
- Speech Zones Mapped by Brain Stimulation and Surgical Lesions 485
- Speech Zones Mapped by Brain-Imaging Techniques 487
- ⊙ Neural Networks for Language 488
- Nodes and Neural Webs for Language 491

⊙ 19.4 Language Disorders 492

- Fluent Aphasias 492
- Nonfluent Aphasias 493
- Pure Aphasias 494

⊙ 19.5 Localization of Lesions in Aphasia 494

- Cortical Language Components 494
- Subcortical Language Components 495
- Right-Hemisphere Contributions to Language 495

⊙ 19.6 Neuropsychological Assessment of Aphasia 496

- Acquired Reading Disorders 497

CHAPTER 20

Emotion and the Social Brain 503

⊙ **PORTRAIT** Agenesis of the Frontal Lobe 503

20.1 The Nature of Emotion 503

- What Are Emotions? 504

20.2 Historical Views 505

- Investigating the Anatomy of Emotion 505
- The Emotional Brain 506
- Cortical Connections of Emotion 506

20.3 Candidate Structures in Emotional Behavior 507

- Processing Emotional Stimuli 507
- Brain Circuits for Emotion 508

⊙ **20.4 Neuropsychological Theories of Emotion 510**

- Asymmetry in Emotion Processing 510
- Temporal-Lobe Personality 513

⊙ **20.5 Social Cognitive Theories of Emotion 514**

- The Theory of Constructed Emotion 515

SNAPSHOT ⊙ Perception of Faces and Fear in the Case of S.M. 516

- Damasio's Somatic Marker Hypothesis 516
- LeDoux's Theory of Emotional Consciousness 518

20.6 The Social Brain and Social Cognition 520

- Frontal Lesions in Monkeys 520
- Cerebral Lesions in Humans 521
- Social Brain Networks 522
- The Self and Social Cognition 524

CHAPTER 21

Spatial Behavior 528

⊙ **PORTRAIT** Lost in Space 528

21.1 Spatial Behavior and Spatial Impairments 529

- Explaining Spatial Behavior 529
- Experimental Models of Spatial Behavior 530
- ⊙ Neuropsychological Tests of Spatial Behavior 535
- ⊙ Clinical Descriptions of Spatial Impairments 536

⊙ **21.2 Dorsal- and Ventral-Stream Contributions to Spatial Behavior 539**

- The Dorsal Stream in the Parietal Cortex 539
- The Dorsal Stream in the Frontal Cortex 541
- Location, Location, Location: The Ventral Stream and Frontal Cortex 542
- The Ventral and Dorsal Streams in Temporal Cortex 542

SNAPSHOT © Imaging the Hippocampi of London Taxi Drivers 544

21.3 The Brain's Positioning System 545

- Place Cells 545
- Head-Direction Cells 546
- Grid Cells 546
- Location of Positioning System Cells 547

21.4 Individual Differences in Spatial Abilities 548

21.5 Scene Construction and Theory of Mind 549

- Scene Construction Theory 550
- Theory of Mind 550

CHAPTER 22

Attention and Consciousness 554

© **PORTRAIT** A Curious Case of Neglect 554

© **22.1 Defining Attention and Consciousness 554**

© **22.2 Attention 556**

- Automatic and Conscious Processing Compared 556
- Neurophysiological Evidence of Attention 558
- Parallel Processing of Sensory Input 561
- Functional Imaging and Attention 561
- © Networks of Attention 564
- Mechanisms of Attention 567

© **22.3 Inattention 568**

- Absence of Visual Attention 568
- Sensory Neglect 570

© **22.4 Consciousness 571**

- What Is Consciousness? 571
- The Neural Basis of Consciousness 573
- Cerebral Substrates of Consciousness 574
- Emotion and Consciousness 575

SNAPSHOT © Stimulating Nonconscious Emotion 576

- Nonconscious Processing 577

PART IV Plasticity and Disorders

CHAPTER 23

Brain Development and Plasticity 581

© **PORTRAIT** Plasticity and Language 581

23.1 Approaches to Studying Brain Development 581

23.2 Development of the Human Brain 582

- Neuron Generation 583
- Cell Migration and Differentiation 585
- Neural Maturation 586
- Synapse Formation and Pruning 587
- Glial Development 589
- © Neural Development in the Adolescent Brain 589

23.3 Imaging Studies of Brain Development 590

23.4 Development of Problem-Solving Ability 592

23.5 Environmental Effects on Brain Development 595

- Developmental Effects of Aversive Environments 596
- Environmental Influences on Brain Organization 597
- Experience and Neural Connectivity 600
- Plasticity of Representational Zones in the Developing Brain 601

© **23.6 Brain Injury and Plasticity 602**

- Effects of Age 602
- Effects of Brain Damage on Language 603

SNAPSHOT © Distinct Cortical Areas for Second Languages 603

© **23.7 Studying Plasticity after Early Brain Injury 607**

- Effects of Early Brain Lesions on Behaviors Later in Life 607
- Effects of Early Brain Lesions on Brain Structure Later in Life 609
- Factors Influencing Plasticity after Early Cortical Injury 610

CHAPTER 24

Neurodevelopmental Disorders 615

© **PORTRAIT** Life Without Reading 615

© **24.1 What Are Neurodevelopmental Disorders? 616**

- Incidence of Neurodevelopmental Disorders 616

24.2 Causes of Intellectual Disability 617

- Cerebral Palsy 618
- Hydrocephalus 619
- Fragile-X Syndrome 619
- Fetal Alcohol Spectrum Disorder 620
- Down Syndrome 622

24.3 Communication Disorders 624

- Language Disorder 624

- Speech Sound Disorder 624
- Childhood-Onset Fluency Disorder 625
- Social Communication Disorder 626
- 24.4 Autism Spectrum Disorder 626**
 - Anatomical Correlates of ASD 627
 - Ⓢ Causes of ASD 628
- 24.5 Attention-Deficit/Hyperactivity Disorder 629**
- 24.6 Specific Neurodevelopmental Learning Disorders 630**
 - Reading Disabilities 631
- SNAPSHOT** Ⓢ Imaging Sound Perception and Reading Disability 634
 - Mathematical Disabilities 635
 - Ⓢ Neuropsychological Evaluation 636
 - Developmental Coordination Disorder 637
- Ⓢ **24.7 Developmental Influences on Neurodevelopmental Disorders 638**
 - Structural Damage and Toxic Effects 638
 - Hormonal Effects 638
 - Environmental Effects 639
 - The Relative Age Effect 640
- Ⓢ **24.8 Adult Outcomes of Neurodevelopmental Disorders 640**

CHAPTER 25

Plasticity, Recovery, and Rehabilitation of the Adult Brain 645

- Ⓢ **PORTRAIT** Recovery from Stroke 645
- Ⓢ **25.1 Principles of Brain Plasticity 646**
 - Principle 1: Plasticity is common to all nervous systems, and the principles are conserved 646
 - Principle 2: Plasticity can be analyzed at many levels 646
 - Principle 3: The two general types of plasticity derive from experience 651
 - Principle 4: Similar behavioral changes can correlate with different plastic changes 651
 - Principle 5: Experience-dependent changes interact 651
 - Principle 6: Plasticity is age dependent 652
 - Principle 7: Plastic changes are time dependent 652
 - Principle 8: Plasticity is related to an experience's relevance to the animal 652
 - Principle 9: Plasticity is related to the intensity or frequency of experiences 652
 - Principle 10: Plasticity can be maladaptive 653

- Ⓢ **25.2 Can Plasticity Support Functional Recovery after Injury? 653**
 - Compensation Compared with Recovery 653
 - What Happens When a Brain Is Injured? 654
- Ⓢ **25.3 Examples of Functional Restitution 655**
 - Recovery from Motor-Cortex Damage 655
 - Recovery from Aphasia 656
 - Recovery from Traumatic Lesions 656
 - Recovery from Surgical Lesions 657
 - Return to Daily Life 658
- 25.4 Research on Plasticity in the Injured Brain 659**
 - Functional Imaging after Cerebral Injury 660
- SNAPSHOT** Ⓢ Using Imaging to Study Recovery 660
 - Physiological Mapping after Cerebral Injury 662
- 25.5 Variables Affecting Recovery 663**
- 25.6 Therapeutic Approaches to Recovery after Brain Damage 664**
 - Pharmacological Therapies 664
 - Growth Factors 665
 - Cell-Based Therapies 665
 - Activity-Based Therapies 665
 - Electrical Stimulation 666
 - Cognitive Rehabilitation 666
 - Tactile Stimulation 667
 - Music and Other Behavioral Therapies 668

CHAPTER 26

Neurological Disorders 672

- Ⓢ **PORTRAIT** Concussion 672
- Ⓢ **26.1 The Neurological Examination 673**
 - The Patient's History 673
 - The Physical Examination 673
- Ⓢ **26.2 Traumatic Brain Injury 674**
 - Open Head Injuries 675
 - Closed Head Injuries 676
 - Behavioral Assessment of Head Injury 677
 - Recovering from and Preventing Head Injury 678
- 26.3 Epilepsy 679**
 - Classifying Seizures 680
 - Ⓢ Treating Epilepsy 681
- 26.4 Tumors 681**
- 26.5 Headache 682**
 - Types of Headache 683
 - Ⓢ Treating Headache 684
- 26.6 Infections 684**
 - Types of CNS Infection 685
 - Ⓢ Treating CNS Infection 687

Ⓢ 26.7 Disorders of Motor Neurons and the Spinal Cord 687

- Myasthenia Gravis 687
- Poliomyelitis 688
- Multiple Sclerosis 689
- Paraplegia and Quadriplegia 689

SNAPSHOT Ⓢ ALS: Amyotrophic Lateral Sclerosis 690

- Brown-Séquard Syndrome 690
- Hemiplegia 691

26.8 Motor Disorders Involving the Basal Ganglia 691

- Hyperkinetic Disorders 692
- Hypokinetic Disorders 694
- Causes of Parkinsonism 696
- Treating Parkinson Disease 698
- Psychological Aspects of Parkinson Disease 698

26.9 Cerebral Vascular Disorders 699

- Types of Cerebral Vascular Disease 699
- Treating Cerebral Vascular Disorders 701

CHAPTER 27

Psychiatric and Related Disorders 705

Ⓢ PORTRAIT Posttraumatic Stress Disorder 705

27.1 The Brain and Behavior 706

27.2 Schizophrenia 707

- Structural Abnormalities in Schizophrenic Brains 707
- Biochemical Abnormalities in the Brains of People with Schizophrenia 708
- Ⓢ Cognitive Symptoms in Schizophrenia 709
- Ⓢ Schizophrenia as a Neurodevelopmental Disorder 710

27.3 Mood Disorders 711

- Neurochemical Aspects of Major Depression 712
- Neuropathological and Blood-Flow Abnormalities in Major Depression 713
- Treatments for Major Depression 714
- Neurobiological Aspects of Bipolar Disorder 715

Ⓢ 27.4 Anxiety Disorders 716

27.5 Psychosurgery 717

27.6 Psychiatric Symptoms of Cerebral Vascular Disease 718

27.7 Dementias 718

- Anatomical Correlates of Alzheimer Disease 720

Putative Causes of Alzheimer Disease 722

- Ⓢ Clinical Symptoms and the Progression of Alzheimer Disease 723

27.8 Prion-Related Disorders 724

Ⓢ 27.9 Sleep Disorders 725

- Narcolepsy 727
- Insomnia 728

SNAPSHOT Ⓢ Restless Legs Syndrome 729

27.10 Micronutrients and Behavior 731

CHAPTER 28

Neuropsychological Assessment 737

Ⓢ PORTRAIT Lingering Effects of Brain Trauma 737

Ⓢ 28.1 A Biopsychosocial Model for Neuropsychological Assessment 738

28.2 The Changing Face of Neuropsychological Assessment 739

- Ⓢ The Clinical Role of Neuropsychology 740

Ⓢ 28.3 The Basics of Neuropsychological Assessment 741

- Goals of Neuropsychological Assessment 742
- Intelligence Testing in Neuropsychological Assessment 743
- Categories of Neuropsychological Assessment 744

Ⓢ 28.4 Ten Core Features of Neuropsychological Assessment 746

28.5 The Problem of Effort 748

28.6 Developing Better Neuropsychological Procedures 749

- Leveraging Technology 750

Ⓢ 28.7 Case Histories 750

- Case 1: Epilepsy Caused by Left-Hemisphere Tumor 751
- Case 2: Epilepsy Caused by Right-Hemisphere Infection 751

SNAPSHOT Ⓢ Is Brain Injury Always Bad? 752

- Case 3: Rehabilitation 753
