Contents

1 Introduction 1

2 The Π-Riemann Integral 5
- 2.1 The Volume of a Lake 11
- 2.2 Rate of Approximation 17
- 2.3 Quadrature Rules 23
- 2.4 Roots of Nonlinear Equations 44

3 A Convergence Theorem 57
- 3.1 The Riemann–Lebesgue Lemma 59
- 3.2 The Weierstrass Approximation Theorems 64

4 The Modified Π-Riemann Sums 75
- 4.1 Uniformly Distributed Sequences 84

5 The Pattern and Uniform Integrals 95

6 The Improper and Dominated Integrals 101
- 6.1 Improper Integrals of the First Type 102
- 6.2 The Dominated Integral 111
- 6.3 Improper Integrals of the Second Type 122

7 Coda 131

Appendix I 145
- Change of Variable Formulas for Riemann Integrals 145
- The Substitution Formula 147
- Change of Variable Formula, Riemann Integral 148
- Substitution Formula, Riemann–Stieltjes Integral 157
- Change of Variable Formula, Riemann–Stieltjes Integral 160
- Caveat 163

Appendix II 165
Cauchy Integrability Implies Riemann Integrability 165

References 169
