Preface	xv
1 Damage Caused by Physical and Chemical Agents and Their Prevention	1
<i>Suza Ahmed, Mohammad Mohsin Ul Hoque and Abubakar Siddik</i>	
1.1 Introduction	1
1.2 Characteristics of Typical Museum Textiles	2
1.3 Agents Causing Damage to Textile Materials	2
1.4 Deterioration of Textiles by Mechanical Stresses	3
1.4.1 Dimensional Changes	4
1.4.2 Change in Modulus	4
1.5 Deterioration of Textiles by Light and Radiation	5
1.5.1 Deterioration of Textiles by Photochemical Tendering	5
1.5.2 Fading of Dyes	6
1.5.3 Accelerated Photochemical Tendering	6
1.5.4 Light Ageing	7
1.6 Deterioration of Textiles by Humidity and Temperature	7
1.6.1 Temperature	7
1.6.2 Relative Humidity	7
1.6.3 Fluctuating Humidity and Temperature	8
1.7 Deterioration by Acid, Alkali, and Water	8
1.8 Deterioration of Textiles by Gaseous and Solid Contaminants	8
1.8.1 Gaseous Contaminants	9
1.8.2 Particulate Contaminants	9
1.9 Deterioration of Textiles to Biological Agents	9
1.9.1 Insects and Pests	9
1.9.2 Mold	11
1.9.3 Source of Biological Agents	11
1.10 Cases of Damages in Museum Textiles	11
1.11 Other Factors Influencing the Damages to Textiles	13
1.11.1 Alienation	13
1.11.2 Fire	13
1.11.3 Theft or Vandalism	13
1.12 Avoiding Damages	13
1.12.1 Temperature and Humidity	13
1.12.2 Avoiding Damages Caused by Light and UV Radiation	14
1.12.2.1 Measuring Light and UV Levels	14

1.12.3	Avoiding Damages Caused by Pest	15
1.12.4	Avoiding Damages Caused by Pollutants	15
1.12.5	Avoiding Environmental Damages	15
1.13	Conservation of Museum Textiles	16
1.13.1	Moth Management	16
1.13.2	Integrated Pest Management	16
1.13.2.1	Monitoring the Collections	17
1.13.2.2	Insect Trapping	18
1.13.2.3	Traditional Method	18
1.13.2.4	Hygienic Control of Pests	18
1.13.2.5	Pest-Proofing	18
1.13.3	Laser Cleaning of Tarnished Silver and Copper Threads in Museum Textiles	19
1.14	Conclusion	19
	References	20
2	Biological Damage to Textiles and Prevention Methods	23
	<i>Kurmo Konsa, Theodora Kormpaki and Janika Turu</i>	
2.1	Introduction	23
2.2	Biodeterioration of Textiles Caused by Microorganisms (Bacteria, Fungi)	25
2.2.1	Most Common Species of Microorganisms in Textile Collections	25
2.2.2	Deterioration Caused by Microorganisms	26
2.2.3	Methods of Examination and Identification of Microorganisms	27
2.3	Biodeterioration of Textiles Caused by Insects	28
2.3.1	Most Common Species of Insects in Textile Collections	28
2.3.2	Deterioration Caused by Insects	29
2.3.3	Monitoring and Identification of Insects in Textile Collections	30
2.4	The Control of Biodeterioration of Textiles	30
2.4.1	Prevention Methods	31
2.4.1.1	Construction Aspects	31
2.4.1.2	Storage Conditions	31
2.4.1.3	Storage	32
2.4.1.4	Room Monitoring	32
2.4.2	Remediation Methods	33
2.4.2.1	Low Temperatures (Freezing)	34
2.4.2.2	High Temperatures (Heating)	34
2.4.2.3	Gamma Radiation	34
2.4.2.4	Modified Atmospheres	35
2.4.2.5	Mechanical Removal	35
2.4.3	Chemical Control Methods	35
2.4.4	New Methods for the Control of Biodeterioration of Textiles	36
2.5	Biological and Chemical Risk Factors in the Preservation and Conservation of Textiles	37
2.6	Conclusion	37
	References	38

3	Microscopy of Historical Textiles	45
	<i>Hana Lukesova</i>	
3.1	Introduction	45
3.2	Optical Microscopy	46
3.2.1	Stereomicroscopes	46
3.2.1.1	Textile Techniques	47
3.2.1.2	Finishing	47
3.2.1.3	Repairs and Changes	48
3.2.1.4	Reflected Light Microscopy	48
3.2.2	Transmitted White Light and Polarized Light Microscopy	48
3.2.2.1	Transmitted White Light Microscopy	48
3.2.2.2	Polarized Light Microscopy	49
3.2.2.3	Fiber Identification	50
3.2.2.4	Finishing	51
3.2.2.5	Microbiological Attack	52
3.2.3	Digital Microscopy	52
3.3	Electron Microscopy	53
3.3.1	Scanning Electron Microscopy	53
3.3.1.1	Sample Preparation	53
3.3.1.2	Fiber Identification of Animal Hairs	53
3.3.1.3	Finishing	54
3.3.1.4	Dyeing	54
3.3.1.5	Quality	54
3.3.1.6	Degradation	55
3.3.2	Transmission Electron Microscopy	55
3.3.2.1	Sample Preparation	56
3.4	Conclusion	56
	References	57
4	Computational Structural Analysis	61
	<i>Rana Al Ali, Mohamed Dallel, Boumediene Nedjar and Elhem Ghorbel</i>	
4.1	Introduction	61
4.2	Mechanical Modeling of Textile	62
4.2.1	Microscopic Modeling of Textiles	63
4.2.2	Mesoscopying Modeling of Textiles	63
4.2.3	Macroscopic Modeling of Textiles	65
4.3	Historical Textiles' Modeling	67
4.3.1	Creep in Structural Analysis	67
4.3.2	Finite Element Method	68
4.3.3	The Rheological Model	68
4.3.3.1	Kinematic Associated with Elastic Behavior	70
4.3.3.2	Constitutive Equations Associated to the Elastoplastic Branch [I]	71
4.3.3.3	Constitutive Equations Associated to the Viscoelastic Branch [II]	76
4.4	Application to Tapestries: Case Studies	76
4.4.1	Application 1: The Importance of Considering the Orthotropy	77

4.4.2	Application 2: Effect of Hanging System	78
4.4.3	Application 3: Presence of Tears and Slits	79
4.5	Conclusion	79
	Acknowledgement	80
	References	80
5	Characterization of Ancient Dyes and Prints	85
	<i>Hannah Dewey, Meghan Lord and Januka Budhathoki-Uprety</i>	
5.1	Introduction	85
5.2	Characterization Methods	87
5.2.1	Thin Layer Chromatography	87
5.2.2	High-Performance Liquid Chromatography	89
5.2.2.1	Dyestuff Analysis	90
5.2.2.2	Sample Preparation and Extraction Methods	90
5.2.2.3	Detectors	92
5.2.2.4	Limitations	93
5.2.3	Raman Spectroscopy	94
5.2.4	Infrared Spectroscopy	96
5.2.5	Fluorescence Spectroscopy	97
5.2.6	Fiber Optic Reflectance Spectroscopy	99
5.2.7	Mass Spectrometry	100
5.3	Printing Techniques	101
5.4	Conclusion	102
	References	103
6	State-of-the-Art Characterization Methods for Historic Textiles	107
	<i>Reza Assefi Pour, Mazeyar Parvinzadeh Gashti and Jinxin He</i>	
6.1	Introduction	108
6.2	Dating of Textiles	108
6.2.1	Radiocarbon Dating	109
6.2.1.1	Advantages and Limitations of Radiocarbon Dating	109
6.2.1.2	Radiocarbon Dating Measurements	110
6.2.1.3	The AMS Method of Radiocarbon Dating	110
6.2.2	Micromechanical Method for Textiles Dating	111
6.3	Molecular Analysis	112
6.3.1	DNA Analysis	112
6.3.2	Amino Acid Composition	114
6.4	Proteomics	115
6.4.1	Principle and Evaluation Process of Historic Textiles	115
6.4.2	Why Proteomics Is Preferred	117
6.5	Isotopic Tracing	118
6.5.1	The Strontium Isotope Tracing System	118
6.5.2	Benefits of Sr Isotope Tracing	119
6.5.3	Limitations of Sr Isotope Tracing	119
6.6	Thermal Analysis	120
6.7	Optical Measurement Tests	121

6.8	Analytical Methods for Dye Analysis	122
6.8.1	Mass Spectrometry	123
6.8.2	Chromatography	123
6.8.3	Electrophoresis	124
6.8.4	Microextraction	124
6.9	Conclusion	126
	References	126
7	Nondestructive Testing of Historic Textiles	131
	<i>Anna Klisińska-Kopacz</i>	
7.1	Introduction	131
7.2	Sampling	132
7.3	Analytical Investigation Techniques Using X-Rays	133
7.3.1	X-Ray Radiography	133
7.3.2	X-Ray Fluorescence	135
7.3.3	Scanning Electron Microscopy with X-Ray Microanalysis	137
7.3.4	X-Ray Diffraction	139
7.4	Vibrational Spectroscopy	140
7.4.1	Fourier Transform Infrared Spectroscopy	141
7.4.2	Raman Spectroscopy and Surface-Enhanced Raman Spectroscopy	143
7.5	Case Studies	144
7.5.1	17th Century Painted Silk Banner	144
7.5.2	16th Century Carpet	146
