1	Introduction	1
1.1	Admissible Banach Space Representations	2
1.2	Principal Series Representations.....	3
1.3	Some Questions and Further Reading	5
1.4	Prerequisites	6
1.5	Notation.....	7
1.6	Groups	7
Part I Banach Space Representations of p-adic Lie Groups		
2	Iwasawa Algebras	11
2.1	Projective Limits	11
2.1.1	Universal Property of Projective Limits	13
2.1.2	Projective Limit Topology	15
2.2	Projective Limits of Topological Groups and \mathcal{O}_K -Modules	19
2.2.1	Profinite Groups	21
2.3	Iwasawa Rings.....	24
2.3.1	Linear-Topological \mathcal{O}_K -Modules.....	25
2.3.2	Another Projective Limit Realization of $\mathcal{O}_K[[G_0]]$	30
2.3.3	Some Properties of Iwasawa Algebras	32
3	Distributions	35
3.1	Locally Convex Vector Spaces.....	35
3.1.1	Banach Spaces	37
3.1.2	Continuous Linear Operators	37
3.1.3	Examples of Banach Spaces	40
3.1.4	Double Duals of a Banach Space	41
3.2	Distributions	43
3.2.1	The Weak Topology on $D^c(G_0, \mathcal{O}_K)$	43
3.2.2	Distributions and Iwasawa Rings	46
3.2.3	The Canonical Pairing.....	50

3.3	The Bounded-Weak Topology	50
3.3.1	The Bounded-Weak Topology is Strictly Finer than the Weak Topology	53
3.4	Locally Convex Topology on $K[[G_0]]$	55
3.4.1	The Canonical Pairing	56
3.4.2	p -adic Haar Measure	57
3.4.3	The Ring Structure on $D^c(G_0, K)$	59
4	Banach Space Representations	63
4.1	p -adic Lie Groups	63
4.2	Linear Operators on Banach Spaces	64
4.2.1	Spherically Complete Spaces	64
4.2.2	Some Fundamental Theorems in Functional Analysis.....	65
4.2.3	Banach Space Representations: Definition and Basic Properties.....	68
4.3	Schneider-Teitelbaum Duality	73
4.3.1	Schikhof's Duality.....	73
4.3.2	Duality for Banach Space Representations: Iwasawa Modules.....	78
4.4	Admissible Banach Space Representations	81
4.4.1	Locally Analytic Vectors: Representations in Characteristic p	84
4.4.2	Duality for p -adic Lie Groups.....	85
 Part II Principal Series Representations of Reductive Groups		
5	Reductive Groups	91
5.1	Linear Algebraic Groups	91
5.1.1	Basic Properties of Linear Algebraic Groups	92
5.1.2	Lie Algebra of an Algebraic Group.....	95
5.2	Reductive Groups Over Algebraically Closed Fields	96
5.2.1	Rational Characters.....	97
5.2.2	Roots of a Reductive Group.....	98
5.2.3	Classification of Irreducible Root Systems.....	103
5.2.4	Classification of Reductive Groups	105
5.2.5	Structure of Reductive Groups	107
5.3	F -Reductive Groups	109
5.4	Z -Groups.....	111
5.4.1	Algebraic R -Groups	112
5.4.2	Split Z -Groups	113
5.5	The Structure of $\mathbf{G}(L)$	114
5.5.1	\mathfrak{o}_L -Points of Algebraic Z -Groups.....	114
5.5.2	\mathfrak{o}_L -Points of Split Z -Groups	115
5.5.3	Coset Representatives for G/P	118
5.6	General Linear Groups	119

6	Algebraic and Smooth Representations	123
6.1	Algebraic Representations	123
6.1.1	Definition and Basic Properties	124
6.1.2	Classification of Simple Modules of Reductive Groups	124
6.2	Smooth Representations.....	132
6.2.1	Absolute Value.....	133
6.2.2	Smooth Representations and Characters	134
6.2.3	Basic Properties.....	135
6.2.4	Admissible-Smooth Representations	137
6.2.5	Smooth Principal Series.....	138
6.2.6	Smooth Principal Series of $GL_2(L)$ and $SL_2(L)$	143
7	Continuous Principal Series	147
7.1	Continuous Principal Series Are Banach.....	148
7.1.1	Direct Sum Decomposition of $\text{Ind}_{P_0}^{G_0}(\chi_0^{-1})$	149
7.1.2	Unitary Principal Series	153
7.1.3	Algebraic and Smooth Vectors.....	154
7.1.4	Unitary Principal Series of $GL_2(Q_p)$	155
7.2	Duals of Principal Series	156
7.2.1	Module $M_0^{(\chi)}$	156
7.3	Projective Limit Realization of $M_0^{(\chi)}$	164
7.4	Direct Sum Decomposition of $M^{(\chi)}$	168
7.4.1	The Case $G_0 = GL_2(\mathbb{Z}_p)$	168
7.4.2	General Case.....	169
8	Intertwining Operators	173
8.1	Invariant Distributions.....	174
8.1.1	Invariant Distributions on Vector Groups	174
8.1.2	“Partially Invariant” Distributions on Unipotent Groups	175
8.1.3	T_0 -Equivariant Distributions on Unipotent Groups	177
8.2	Intertwining Algebra	181
8.2.1	Ordinary Representations of $GL_2(Q_p)$	183
8.3	Finite Dimensional G_0 -Invariant Subspaces	184
8.3.1	Induction from the Trivial Character: Intertwiners	185
8.4	Reducibility of Principal Series.....	186
8.4.1	Locally Analytic Vectors	187
8.4.2	A Criterion for Irreducibility	189
A	Nonarchimedean Fields and Spaces	193
A.1	Ultrametric Spaces	193
A.2	Nonarchimedean Local Fields	195
A.2.1	p -Adic Numbers	195
A.2.2	Finite Extensions of \mathbb{Q}_p	197
A.2.3	Algebraic Closure $\overline{\mathbb{Q}_p}$	199
A.3	Normed Vector Spaces	199

B Affine and Projective Varieties	201
B.1 Affine Varieties	201
B.1.1 Zariski Topology on Affine Space	202
B.1.2 Morphisms and Products of Affine Varieties	203
B.2 Projective Varieties	204
References	207
