## 1. Technical background, patient preparation, and quality and safety

1.1 Key hardware components of a cardiac-enabled CT scanner	1
1.2 Technical requirements for cardiac CT scanning	7
1.3 Physical background: X-ray generation, interaction with matter, and radiation dosimetry concepts	15
1.4 Patient selection and preparation	23
1.5 Scanner setup, cardiac protocols, and contrast injection	33
1.6 Image reconstruction, postprocessing, and fundamentals of image analysis	43
1.7 Concepts of radioprotection	55
1.8 Common CT imaging artefacts	59
1.9 Tips and tricks to improve image quality	69
1.10 CT contrast agents and injection protocols	77
1.11 How to deal with challenging scenarios	83

## 2. Indications: coronary artery disease

2.1 Coronary artery calcium imaging	89
2.2 Coronary CT angiography interpretation and reporting	97
2.3 How to apply coronary CT angiography in patients with stable chest pain	111

2.4 CT-based fractional flow reserve	119
2.5 CT myocardial perfusion and scar imaging	125
2.6 Atherosclerotic plaque imaging	137
2.7 Stents and grafts	145
2.8 Coronary anomalies	155
2.9 CT for suspected acute coronary syndrome	167
2.10 Graft vasculopathy in transplanted hearts	175
<b>3. Non-coronary artery disease indications</b>	
3.1 Ventricular volume and function	181
3.2 Normal dimensions on cardiac CT	189
3.3 Aortic valve disease	203
3.4 CT prior to transcatheter/surgical aortic valve replacement	209
3.5 Mitral valve disease	221
3.6 CT after valve surgery/intervention	229
3.7 Left atrium and pulmonary veins	237
3.8 Infective endocarditis	245
3.9 Thoracic great vessels	255
3.10 Adult congenital heart disease	269
3.11 Cardiomyopathies	287
3.12 Cardiac masses	297
3.13 Pericardial disease	311
3.14 Implanted cardiac devices and how to recognize them on CT	319
3.15 Extracardiac findings	341

3.16 Artificial intelligence in cardiac CT	349
--	-----

---

#### **4. Training and competence in cardiac CT**

4.1 European Association of Cardiovascular Imaging certification standards in cardiac CT	353
--	-----

---
