

# Contents

<b>Introduction</b> .....	xvii
<b>Part I Frame of Reference</b>	
<b>1 Sustainability and Discontinuity</b> .....	3
1.1 Sustainable Development .....	3
1.1.1 Introduction of the Concept in the International Agenda .....	4
1.2 Sustainability Dimensions .....	10
1.2.1 The Environmental Dimension .....	10
1.2.2 The Socio-ethical Dimension .....	13
1.2.3 The Economic Dimension .....	16
1.3 Sustainability: A Call for Radical Change .....	17
1.3.1 The Magnitude of Change .....	17
1.3.2 The Quality of Change .....	17
1.4 The Paths to Sustainability .....	18
1.4.1 Industrialised, Medium and Low-Income Contexts ....	19
1.4.2 The European Agenda for Sustainability .....	19
<b>2 Evolution of Sustainability in Design Research and Practice</b> .....	23
2.1 Evolution of Sustainability in Design .....	23
2.2 Low-Impact Resources Selection .....	24
2.3 Product Life Cycle Design .....	26
2.4 Product-Service System Design for Eco-Efficiency .....	28
2.5 Design for Social Equity and Cohesion .....	29
2.6 Aesthetics for Sustainability .....	32
2.7 State of the Art .....	34

## Part II Design for Environmental Sustainability

<b>3</b>	<b>Life Cycle Design</b> .....	37
3.1	Introduction .....	37
3.2	Environmental Requirements of Industrial Products .....	38
3.3	Product Life Cycle System .....	39
3.3.1	Pre-Production .....	40
3.3.2	Production .....	42
3.3.3	Distribution .....	42
3.3.4	Use .....	42
3.3.5	Disposal .....	43
3.3.6	Additional Life Cycles .....	44
3.4	Functional (Unit) Approach .....	45
3.5	Life Cycle Design .....	46
3.5.1	Life Cycle Design Objectives .....	46
3.6	Implications of Life Cycle Design .....	47
3.6.1	The Design Approach .....	48
3.7	Strategies of Life Cycle Design .....	51
3.7.1	Priorities Among the Strategies .....	53
3.8	State of Art of Life Cycle Design .....	55
<b>4</b>	<b>Minimising Material Consumption</b> .....	57
4.1	Introduction .....	57
4.2	Minimise Material Content of a Product .....	58
4.3	Minimise Scraps and Discards .....	64
4.4	Minimise or Avoid Packaging .....	65
4.5	Minimise Material Consumption During Usage .....	69
4.6	Adopt Flexible Material Consumption Systems (During Use) .....	72
4.7	Minimise Material Consumption During the Product Development Phase .....	74
<b>5</b>	<b>Minimising Energy Consumption</b> .....	75
5.1	Introduction .....	75
5.2	Minimise Energy for Pre-production and Production .....	76
5.3	Minimise Energy Consumption During Transportation and Storage .....	77
5.4	Select the Most Efficient Energy Consumption Systems During Use .....	81
5.5	Enable a Variable Consumption of Energy to Follow Demand Fluctuations .....	87
5.6	Minimise Energy Consumption During Product Development .....	91

<b>6</b>	<b>Minimising Resources Toxicity and Harmfulness</b> . . . . .	93
6.1	Introduction . . . . .	93
6.2	Selection of Non-toxic and Harmless Materials . . . . .	94
6.3	Select Non-toxic and Harmless Energy Resources . . . . .	102
<b>7</b>	<b>Optimising Resources Renewability and Biocompatibility</b> . . . . .	107
7.1	Introduction . . . . .	108
7.2	Selecting Renewable and Biocompatible Materials . . . . .	108
7.3	Selecting Renewable and Biocompatible Energy Resources . . . . .	117
<b>8</b>	<b>Product Lifetime Optimisation</b> . . . . .	123
8.1	Useful Lifetime . . . . .	123
8.2	Why Design Long-Lasting Products . . . . .	124
8.3	Why Design Intensely Utilised Products . . . . .	126
8.4	Social and Economic Dimensions of Changes . . . . .	130
8.5	Life Cycle Services . . . . .	130
8.6	Guidelines . . . . .	131
8.7	Designing for Appropriate Lifespan . . . . .	131
8.8	Designing for Reliability . . . . .	135
8.9	Facilitating Upgrading and Adaptability . . . . .	135
8.10	Facilitating Maintenance . . . . .	139
8.11	Facilitating Repairs . . . . .	143
8.12	Facilitating Reuse . . . . .	145
8.13	Facilitating Remanufacturing . . . . .	149
8.14	Intensifying Use . . . . .	151
<b>9</b>	<b>Extending the Lifespan of Materials</b> . . . . .	153
9.1	Introduction . . . . .	153
9.2	Guidelines . . . . .	159
9.3	Adopting the Cascade Approach . . . . .	160
9.4	Selecting Materials with the Most Efficient Recycling Technologies . . . . .	163
9.5	Facilitating End-of-Life Collection and Transportation . . . . .	165
9.6	Identifying Materials . . . . .	166
9.7	Minimising the Overall Number of Different Incompatible Materials . . . . .	168
9.8	Facilitating Cleaning . . . . .	171
9.9	Facilitating Composting . . . . .	172
9.10	Facilitating Combustion for Energy Recovery . . . . .	173
<b>10</b>	<b>Facilitating Disassembly</b> . . . . .	175
10.1	Introduction . . . . .	175
10.2	Guidelines . . . . .	182
10.3	Reducing and Facilitating Operations of Disassembly and Separation . . . . .	183

10.4	Engaging Reversible Joining Systems . . . . .	187
10.5	Engaging Permanent Joining Systems That Can Be Easily Opened . . . . .	189
10.6	Prearrange Special Technologies and Features for Crushing Separation . . . . .	190
10.7	Using Materials That Are Easily Separable After Being Crushed . . . . .	191
10.8	Using Additional Parts That Are Easily Separable After the Crushing of Materials . . . . .	192
<b>11</b>	<b>Constraints and Opportunities for a Product LCD Approach . . . .</b>	<b>193</b>
11.1	Economic Restrictions in Traditional Product Supply and Demand System . . . . .	193
11.2	Eco-efficient Product-Service Systems: New Business Models Fostering the Introduction of the Product LCD Approach . . . . .	196
11.3	Eco-efficient Product-Service Systems Types . . . . .	197
11.3.1	Product-Oriented Eco-efficient Product-Service Systems: Services Providing Added Value to the Product Life Cycle . . . . .	197
11.3.2	Result-Oriented Eco-efficient Product-Service Systems: Services Providing Final Results to the Customer . . . . .	199
11.3.3	Use-Oriented Eco-efficient Product-Service Systems: Services Providing Enabling Platforms to the Customer . . . . .	201
11.4	Product-Service System Design for Eco-efficiency . . . . .	204
 <b>Part III Methods and Support Tools for Environmental Sustainability Analysis and Design</b>		
<b>12</b>	<b>Environmental Complexity and Designing Activity . . . . .</b>	<b>209</b>
12.1	Introduction . . . . .	209
12.2	Methods and Tools for Design for Environmental Sustainability . . . . .	210
<b>13</b>	<b>Estimating the Environmental Impact of Products: Life Cycle Assessment . . . . .</b>	<b>213</b>
13.1	The Environmental Impact of Our Production–Consumption System . . . . .	213
13.1.1	Exhaustion of Natural Resources . . . . .	214
13.1.2	Global Warming . . . . .	215
13.1.3	Ozone Layer Depletion . . . . .	216
13.1.4	Smog . . . . .	217
13.1.5	Acidification . . . . .	218

13.1.6	Eutrophication . . . . .	219
13.1.7	Toxic Air, Soil and Water Pollution . . . . .	220
13.1.8	Waste . . . . .	221
13.1.9	Other Effects . . . . .	222
13.2	Quantitative Methods for Estimating and Analysing the Environmental Impact of Products . . . . .	222
13.3	Life Cycle Assessment (LCA) . . . . .	223
13.4	LCA and Design: Importance and Limitations . . . . .	232
13.5	Other Quantitative Methods for Environmental Impact Evaluation . . . . .	236
<b>14</b>	<b>Environmentally Sustainable Design-Orienting Tools . . . . .</b>	<b>239</b>
14.1	Introduction . . . . .	239
14.2	Environmental Impact Evaluation Tools . . . . .	240
14.2.1	Quantitative Environmental Evaluation Tools . . . . .	240
14.2.2	Tools for Complete LCA . . . . .	241
14.2.3	Tools for Simplified LCA . . . . .	242
14.2.4	Qualitative Environmental Evaluation Tools . . . . .	243
14.3	Orientation Tools for the Generation of Environmentally Sustainable Solutions . . . . .	245
14.3.1	Dedicated Tools for Specific Environmental Performances . . . . .	245
14.3.2	Product LCD Tools . . . . .	248
14.3.3	Product/Firm-Specific Tools . . . . .	251
<b>15</b>	<b>The MPDS Method . . . . .</b>	<b>253</b>
15.1	Introduction to the MPDS Method . . . . .	253
15.2	MPDS in the Strategic Product Analysis (and Brief) . . . . .	255
15.2.1	Environmental Impact Evaluation of Standard Existing Product . . . . .	256
15.2.2	Definition of the Environmental Design Priorities . . . . .	257
15.2.3	Synthetic Visualisation of the Environmental Design Priorities . . . . .	258
15.3	MPDS in Concept Design . . . . .	259
15.3.1	Sustainable Idea Generation . . . . .	260
15.3.2	Concept/s Sustainability Check . . . . .	262
15.4	MPDS in Product Design (and Engineering) . . . . .	265
15.4.1	Selection of the Lowest Environmental Impact Processes and Project Details . . . . .	265
15.5	MPDS in Communication . . . . .	266
15.5.1	Evaluation of the Environmental Impacts in Comparison with the Standard Existing Product for Communication Purposes . . . . .	266
15.5.2	Product Environmental Quality Document Drafting . . . . .	268

15.6	MPDS Tools	269
15.6.1	ESPI Form—Environmental Strategic Priority Indicators (ICS)	271
15.6.2	Checklist of Evaluation of the Environmental Impact of Existing Product (ICS)	275
15.6.3	Eco-ideas Boards with Guidelines and Examples (ICS)	276
15.6.4	Checklist of Evaluation of the Pursuit of LCD Strategies (ICS)	280
15.6.5	Multi-strategy Radar (ICS)	284
15.6.6	Life cycle exploded diagram	287
15.7	Example of Application of the MPDS Method and Tools	289
15.7.1	Life Cycle Assessment of a Standard Existing Product	289
15.7.2	Identification and Synthetic Visualisation of the Environmental Strategic Priorities	292
15.7.3	Idea generation focused on environmental sustainability	292
15.7.4	Concept/s Sustainability Check	293
15.7.5	Selection of the Lowest Environmental Impact Processes and Project Details	295
15.8	Application of the Method to Different Design Contexts	297
	<b>Appendix A: Design Criteria and Guidelines</b>	<b>299</b>
	<b>Appendix B: Diagrams of Environmental Impacts</b>	<b>309</b>
	<b>References</b>	<b>319</b>
