I. Introduction	9
1. Aim and scope	9
2. Variation analysis and the historical study of syntactic usage	10
A. The factor analysis	10
B. Systemic identity and the comparability of syntactic usage data	11
C. Paradigmatic typology and syntactic change	12
3. The corpus of the present study.	13
II. The Development of the <i>Be/Have</i> Paradigm up to 1700 (with a Note on the development of the corresponding paradigms in German and the Scandinavian languages)	16
III. The Development of the <i>Be/Have</i> Paradigm in Late Modern English	21
1. Previous research	21
2. Verb categories and the functional range of <i>be</i> + PP	22
3. Distributional constraints in the synsemantic environment	26
4. The use of <i>be</i> and <i>have</i> with the individual verbs in the texts examined	29
A. Preliminaries Descriptive procedure 29 The diachronic context 29 Chronological segmentation of the 1700—1900 corpus 29 Verb frequency 31 Presentation and evaluation of the numerical data 31 Categories excluded from the statistics 31 Method of exemplification 32	
B. The various verbs abate 33 abscond 34 advance 34 age 36 alight 36 alter 37 amend 39 appear 40 arise 41 arrive 43 ascend 49 awake 49 become 49 befall 53 begin 54 blow 55 bolt 55 break 55 burst 57 cease 57 change 58 climb 61 come 61 cool 72 crawl 72 creep 72 decrease 72 decline 72 decrease 72 depart 73 descend 74 desert 74 deteriorate 75 die 75 diminish 76 disappear 77 dive 78 drop 78 dry 78 dwindle 78 elapse 78 elope 80 emerge 81 end 81 enter 81 escape 84 evaporate 86 expire 86 fade 88 fail 89 fall 89 finish 93 flee 94 flit 96 fly 96 freeze 97 frisk 97 get 97 go 104 grow 116 happen 121 heal 121 hurry 122 improve 122 increase 125 intrude 127 keep 127 land 128 leap 129 lessen 130 lie 130 light 130 march 130 meet 131 melt 131 mend 132 miscarry 132 mount 133 move 133 pass 133 penetrate 140 perish 140 plunge 142 proceed 142 progress 142	

rally 142 reach 142 recover 143 relapse 146 relent 146 remain 147
 remove 147 repair 148 rest 149 retire 149 retreat 149 return 151
 ride 156 rise 157 run 158 rush 161 sail 161 set 163 shrink 166 sink 166
 sit 168 slip 170 sneak 170 sober 170 sour 171 spring 171 steal 172
 step 172 stir 173 subside 173 succumb 174 swell 174 transpire 174
 travel 174 trot 175 turn 175 vanish 180 wake/n/ 182 walk 182
 wander 182 wear 183 wither 183

C.	Summary of the distributional relevance of the major synsemantic/ lexical factors in the texts examined	183
	Iterative contexts 184 Durative contexts 184 Conditional contexts 186 Optative contexts 187 Negative contexts 188 The past perfect 189 The perfect infinitive 191 <i>Ing</i> -constructions 193	
5.	Diachronic trends in the <i>be/have</i> paradigm in the period investigated	195
A.	Overall regulations	195
	General chronological trends 195 The levelling process 197	
B.	Development according to verb category	198
6.	Textual, individual and social variation	200
7.	The <i>be/have</i> paradigm and 18th/19th century prescriptive grammar	206
8.	The <i>be</i> -construction in present-day English	211
IV.	Conclusion	213
V.	Bibliography	215
1.	Texts examined	215
