INTRODUCTION	7
<i>Piagetian methodology; the studies reported; presentation of studies; list of sources of reported results.</i>	
PIAGETIAN TESTS	17
PART 1. Tests of Logical Operations	
<i>Additive classification—visual, haptic and anticipatory; composition of classes; class inclusion; multiplicative classifications; multiplication of classes; multiplication of relations.</i>	
PART 2. Tests of Conservation	32
<i>Continuous quantity—liquid and solid; weight; volume; number; length.</i>	
PART 3. Tests of Transitivity and Seriation	55
<i>Transitivity of discontinuous quantity; transitivity of weight; transitivity of length; seriation.</i>	
PART 4. Tests of Number Concepts	61
<i>Correspondence and composition; addition and subtraction of one unit.</i>	
PART 5. Tests of Spatial Concepts	64
AGES AT WHICH CHILDREN ATTAIN CONCEPTS	67
<i>Tables</i>	
Conclusion	72
