Introduction	xv
---------------------------	----

Irving E. Sigel

Chapter 1

Reflexive Abstraction and Education: The Meaning of Activity in Piaget's Theory

Jeanette McCarthy Gallagher

1. The Meaning of Activity in Piaget's Cognitive Theory: An Introduction	1
2. Concept of Phenocopy	2
3. The Mechanism of Reflexive Abstraction	7
3.1. Basic Definitions	7
3.2. Relationship to Phenocopy	9
3.3. Experimental Evidence	10
3.3.1. The Study of Correlates	10
3.3.2. The Study of Intersections	12
3.4. Theoretical Considerations and General Educational Implications	14
4. Reflexive Abstraction and Contradiction	16
4.1. Basic Notions of Contradiction	16
4.2. The Meaning of Activity and Anticipation	17
5. Conclusions and Future Directions in Applying Piagetian Theory to Education	18
References	19

Chapter 2

Moral Development and Moral Education: Piaget, Kohlberg, and Beyond

Thomas Lickona

1. The Case for Moral Education in the Schools	21
2. Piaget's Theory of Moral Development	24
3. Kohlberg's Theory of Moral Development	29
3.1. Kohlberg and Piaget: How They Compare	29
3.2. Research on Kohlberg's Theory	34
4. Developmental Moral Education: Putting Piaget and Kohlberg into the Classroom	36
4.1. Goals and Means of Developmental Moral Education ..	36
4.2. Applications of Kohlberg with Adolescents	38
4.3. Developmental Moral Education with Elementary School Children	44
4.4. Fostering Moral Development in Early Childhood	53
5. Conclusion: Critique and New Directions	57
5.1. Summing Up	62
References	67

Chapter 3

Early Education and Piagetian Theory: Applications Versus Implications

Rheta DeVries

1. Applications of Isolated Parts of Piaget's Work	76
1.1. Stages	76
1.2. Tasks	77
1.3. Areas of Knowledge	79
1.4. Action	79
1.5. Specific Practices	79
2. Implications of Piaget's Constructivism	83
2.1. Types of Experience, Action, and Knowledge	83
2.2. Interest, Autonomy, and the Role of Peer Interaction ..	86
3. Conclusion	89
References	91

Chapter 4

The Impact of the Work of Piaget on Science Curriculum Development

Kenneth Lovell and Michael Shayer

1. Introduction	93
2. Some Basic Points in Piagetian Developmental Theory	94
3. The Early Years	95
4. Concrete Operational Thought and Understanding Science .	95
5. The Move to Formal Operational Thought	98
6. Formal Operational Thought and Understanding Science ...	100
7. An Analysis of Some Scientific Concepts	102
8. Some Difficulties with Piaget's Theory with Respect to Science Curricula	106
9. The Problem of the Existing Secondary Science Tradition ...	110
10. Curricula Which Have Used Piagetian Principles	120
10.1. Science 5-13	120
10.2. Australian Science Education Project (ASEP)	125
10.3. Science Curriculum Improvement Study (SCIS)	127
11. Possible Uses of Piaget's Work Suggested by the 1974/1975 CSMS Study	132
12. Curricula for the 80th to 20th Percentile of Population	134
13. Life Style and Formal Operational Thought	135
References	136

Chapter 5

Four Decades of Conservation Research: What Do They Mean for Mathematics Education?

J. A. Easley, Jr.

1. Overview	139
1.1. Two Questions	140
1.2. Genetic Epistemology of Number	141
1.3. Epistemological Issues in Mathematics Education	143
1.4. A Logical Empiricist's View	146
1.5. Dynamic Structuralism in Piaget's Genetic Epistemology	147
1.6. Other Empiricist Views	149
2. The Logistics of Genetic Epistemology	151
2.1. The First Conceptualization	151

2.2. Mental Imagery and Mental Operations	154
2.3. Category Theory and Genetic Epistemology	155
3. Piaget's Overall Strategy	157
4. Toward a New Theory of Conservation	158
4.1. Geneva and the Nonconservers	158
4.2. The "Operational Envelope"	161
4.3. Discrete and Continuous Quantities	164
5. Mathematics Education and Conservation	165
6. Two New Questions	170
References	171

Chapter 6

Two Models of Human Behavior and Reading Instruction

Frank B. Murray

1. Introduction to the Two Models	177
2. The Constructivist Position	179
3. Implications of Piaget's Theory for Reading Instruction	181
4. On The Pedagogical Similarity of the Operant and Cognitive Models	190
5. General Piagetian Educational Recommendations	194
References	196

Chapter 7

Genevan Theory and the Education of Exceptional Children

D. Kim Reid

1. Introduction	199
2. Individual Differences	200
3. Predominant Orientations	204
3.1. Perception	204
3.2. Learning	206
3.3. Memory and Language	208
4. Research on Exceptionalities from a Genevan Perspective ..	209
4.1. Clarification of Performance Characteristics	209
4.1.1. Mental Retardation	210
4.1.2. Emotional Disturbance	212
4.1.3. Learning Disabilities	213
4.1.4. Cerebral Palsy	214
4.1.5. Deafness	214
4.1.6. Blindness	215

4.1.7. Giftedness	216
4.1.8. Summary	217
4.2. Research Analyzing Regulatory Mechanisms	218
4.2.1. Learning Disabled	219
4.2.2. Emotionally Disturbed	220
4.2.3. Mentally Retarded	221
4.2.4. Summary	222
4.3. Differential Diagnosis	222
4.4. Summary	226
5. Implications of Genevan Research and Theory for Special Education	226
6. Conclusions	233
References	234

Chapter 8

**Piagetian Theory and Neo-Piagetian Analysis as Psychological
Guides in Education**

*Juan Pascual-Leone, Doba Goodman, Paul Ammon, and Irene
Subelman*

1. Reflections on Piaget and Education	243
1.1. Stages and Equilibration as a Basis for Instructional Planning	245
2. The Metasubject inside Piaget's "Epistemic Subject"	252
2.1. Schemes and Their Affective/Personal/Cognitive Classification	253
2.2. Executive Schemes	259
2.3. Organismic Resources and the Equilibration Process: I. Basic Factors	265
2.4. Organismic Resources and the Equilibration Process: II. Basic Principles	269
3. Toward a Piagetian Metasubjective Technology for Education	271
3.1. The Limits of Educational Simplification	272
3.2. The Educational Cost of Wholesale Early Efficient Education	280
3.3. Offers of Directed Training That Children Cannot Refuse	283
3.4. Two Methods in Lieu of an Epilogue	284
References	286
