INTRODUCTORY COMMENTS

<i>Preface 1982:</i> ON A REALISTIC AND COMMONSENSE INTERPRETATION OF QUANTUM THEORY	I
<i>Introduction:</i> QUANTUM MECHANICS WITHOUT 'THE OBSERVER'	35
1. Quantum Theory and the Role of 'the Observer'.	
2. Theories versus Concepts.	
3. Thirteen Theses.	
4. The Collapse of the Wave Packet without Observation.	
5. Everett's 'Many-Worlds' Interpretation.	
6. Configuration Space.	

QUANTUM THEORY AND THE SCHISM IN PHYSICS

<i>Chapter I.</i> UNDERSTANDING QUANTUM THEORY AND ITS INTERPRETATIONS	97
1. (*93) A Schism in Physics.	
2. (*94) The Significance of Interpretations.	
3. (*95) Subjective Probabilities, Statistical Probabilities, and Determinism.	
4. (*96) The Objectivity of Statistical Mechanics.	

Note on Numbering of Sections. The sections in each of the three volumes of the *Postscript* are numbered consecutively, beginning with section 1. The original section numbers, indicating the order of the sections within the *Postscript* as a whole, are given in starred brackets in the Tables of Contents. Ed.

CONTENTS

5. (*97)	The Subjectivist Interpretation of Statistical Mechanics.	
6. (*98)	Oscillations Between the Two Interpretations.	
<i>Chapter II.</i>	THE OBJECTIVITY OF QUANTUM THEORY	119
7. (*99)	The Objectivity of Quantum Theory: The Boxes.	
8. (*100)	The Source of the Confusion: The 'Reduction of the Wave Packet'.	
9. (*101)	The Incompleteness of the Mathematical Formalism of Quantum Theory.	
10. (*102)	A Random Walk and the 'Transition from the Potential to the Actual'.	
11. (*103)	Particles, Waves, and the Propensity Interpretation.	
12. (*104)	Partial Anticipation of the Propensity Interpretation.	
13. (*105)	Are there Quantum Jumps?	
14. (*106)	Are there Particles?	
15. (*107)	Position Space.	
<i>Chapter III.</i>	TOWARDS A RESOLUTION OF THE PARADOXES OF QUANTUM THEORY	144
16. (*108)	Indeterminacy or Scatter?	
17. (*109)	The Experiment of Einstein, Podolsky, and Rosen.	
18. (*110)	The Two-Slit Experiment.	
19. (*111)	An Apology for Having Been Controversial.	
<i>Chapter IV.</i>	A METAPHYSICAL EPILOGUE	159
20. (*112)	Metaphysical Ideas and Research Programmes, and the History of Physics.	
21. (*113)	Schisms, Programmes, and Metaphysical Dreams.	
22. (*114)	Classical Determinism Modified by a Correspondence Argument.	
23. (*115)	Indeterminism and the So-called 'Reduction of the Wave Packet'.	
24. (*116)	Replacing the Classical Films by Propensity Films.	
25. (*117)	A Rough Model of Quantum Theoretical Indeterminism.	
26. (*118)	Matter and Field.	
27. (*119)	Open Problems.	
28. (*120)	Conclusion.
