TABLE OF CONTENTS

List of abbreviations xii
List of tables xiii
Acknowledgments xv

1. Setting the scene 1

1.1. Goals, foci and scope of the study 1

1.2. Non-technical vocabulary in technical language: a neglected aspect of LSP 8
1.2.1. Lexical expression of tense, aspect, aktionsart and modality 12
1.2.2. Classification and characterization of states of affairs: elements of the subject matter described 13
1.2.3. Relations between states of affairs 17
1.2.4. The vocabulary of scholarly practice 18
1.2.5. Vocabulary pertaining to the text domain 19

1.3. Three meaning components of subject-oriented texts: states of affairs, modalities, illocutions 23

2. Towards a pragmatics of academic written communication 29

2.1. The notion of pragmatics 29

2.2. The semiotic triangle turned into a narrative 33

2.3. Elements of the context of academic communication 37
2.3.1. The production context 38
2.3.2. The research process 42
2.3.3. The writing process and the intratextual context types 43
2.3.4. The reception process 54
2.3.5. Summary 57

2.4. The relationship between research and writing 58

2.5. The goals of the scholarly process 61

2.6. Truth and communication 63

2.7. *Erkenntnis* as a social process 67

2.8. The role of language 71

3. In search of an appropriate semantic model 75

3.0. Overview of the chapter 75

3.1. A personal history of contemporary semantics 76
3.1.1. The classical paradigm 76
3.1.2. The emergence of prototype semantics 78
3.1.3. Are meanings in the head? 82

3.2. The notion of prototype and the arbitrariness of natural kinds 85

3.3. Widening the scope: a non-unified view of word meaning 92

3.4. A set of postulates for semantic description 95

3.5. Some categories of analysis 99
3.5.1. Physical agentive senses 101
3.5.2. Physical metonymic senses 103
3.5.3. Cognitive agentive senses 104
3.5.4. Cognitive metonymic senses 106
3.5.5. Metalinguistic senses 110

4. The macro-frames of academic investigation and communication: zooming in on the topic of the following chapters 114

5. Coming to know: the core 118

5.0. Overview of the following two chapters 118

5.1. The core of the core: *see* and *find* 120
5.1.1. The prototypical basis of knowledge: *see* 120
5.1.1.0. The ICM of seeing 120
5.1.1.1. Seeing as visual perception 125

5.1.1.2. Lexicalizations of *see* 131
5.1.1.3. *see* as a cognitive verb 132
5.1.1.4. Why research can't see 138
5.1.1.5. *see* in metatextual contexts 139
5.1.2. The basic level of Erkenntnis: *find* 143
5.1.2.0. The ICM of finding 143
5.1.2.1. What money can find 152
5.1.2.2. Finding as a cognitive achievement 154
5.1.2.3. Finding as an attitude 160
5.1.2.4. Other senses of *find* 163

5.2. Emphasis on the mental character of the process: *realize* and *recognize* 166

5.3. Coming to know accidentally: *encounter, meet with, notice* 171

5.4. Emphasis an attention and permanence: *note* 175

5.5. Emphasis on preexistence of object and novelty of knowledge: *discover* and *reveal* 180

5.6. Emphasis on elusiveness of object: *detect* and *trace* 190

5.7. Emphasis on source: *learn* and *gather* 194

5.8. Emphasis on perception: *experience, witness,* and *observe* 195

5.9. Emphasis on certainty or precision: *determine* and *ascertain* 204

5.10. Summary of the chapter 211

6. Coming to know: the periphery 213

6.1. Try to find, but don't try too hard 215

6.2. Epistemic achievements 217
6.2.1. Abstract achievements: How much you can achieve in research 217

6.2.2. Local achievements: Why you seldom arrive at and never reach a result 220
6.2.3. Possessive achievements: What you see is what you get, isn't it? 227
6.2.3.1. *obtain:* Knowledge as a bartering object 227
6.2.3.2. The poor relation: *get* 237
6.2.3.3. You don't gain (by) evidence 240
6.2.3.4. How receiving differs from obtaining, and why this is important 241
6.2.4. The illuminating lamp of reason: appraising scholarly achievements rather than representing them 242

6.3. Coming to know by special operations 245
6.3.1. Quantifying procedures: Finding how much 246
6.3.1.1. The vernacular way: counting and weighing 247
6.3.1.2. The preservation of exactitude: *measure, gauge* and *estimate* 251
6.3.1.3. Why Old men, Fooles, and Children calculate 267
6.3.2. Operations based on a discrete scale: assessing and rating 279
6.3.3. The exercise of logic: *conclude, infer, deduce* 286

6.4. Addressee-oriented production of knowledge: The group around *show* 297
6.4.0. Extending the scene of coming to know 297
6.4.1. The basic level of sharing the truth: *show* 300
6.4.1.0. *show* as the causative of *see* 300
6.4.1.1. The first deviation from the prototype: What a piece of paper may show us 306
6.4.1.2. The gradient from visible to cognitive showing: "Figure 1 shows ..." 307
6.4.1.3. "The patient shows symptoms of mental disturbance": What the objects of study show 313
6.4.1.4. "Comparison of the results shows ...": What the process of investigation shows 317
6.4.1.5. "The rise of the Labour Party shows ...": What the facts show 322
6.4.1.6. "It will be shown in the following chapter ...": the hypothetical and metatextual uses of *show* 324

6.4.1.7. What other scholars show: the 'intertextual' use of *show* 326
6.4.1.8. A show of assorted curios 331
6.4.1.9. Summary of *show* 334
6.4.2. Bringing *ad oculos*: *demonstrate* 335
6.4.3. Attaining a stage beyond doubt: *establish* and *prove* 340
6.4.3.1. Establishing established facts: the fallacy of constructivism 340
6.4.3.2. "Prove all things: hold fast that which is good" 349
6.4.4. Strengthening the truth: *confirm, substantiate, attest* 353

6.5. Summary of the chapter 359

7. Summary of results and implications 361

7.1. Perspectives for broadening the scope 361
7.1.1. The quantitative perspective 361
7.1.2. The genre perspective 362
7.1.3. The contrastive perspective 362
7.1.4. The diachronic perspective 362
7.1.5. Including more lexical fields 363

7.2. The technical 'language' fallacy 363

7.3. Some thoughts on corpus work 369

7.4. Some conclusions on the semantics of coming to know in academia 370
