List of Case Studies	page xi
Preface	xiii
Acknowledgments	xvi
Publisher's Acknowledgements	xvii
Introduction: <i>Why and How We Use Microeconomics</i>	1
Part I Price Theory: Merits and Limitations of the Market Mechanism	7
1 Theory of Consumer Behavior	9
1.1 Rational Behavior: Preferences and the Utility Function	9
1.2 Consumer Preferences and Indifference Curves	14
1.3 Optimal Consumption: Analysis with a Diagram	20
1.4 Important Digression: The Relationship between Mathematical Models and Reality and Thinking like an Economist	22
1.5 Introduction to Marginal Analysis	29
(a) Marginal Utility	30
(b) How Utility Responds to Small Changes in Consumption	32
(c) The Relationship between the Marginal Rate of Substitution and Marginal Utility	35
(d) Condition for Optimal Consumption	37
1.6 Properties of Optimal Consumption	40
Appendix: Is It Safe to Assume that Indifference Curves Are Bowed Toward the Origin?	43
1.7 A Tool for Measuring the Degrees of Substitution and Complementarity: The Compensated Demand Function	45
1.8 The Expenditure Function	51
1.9 Income Effects and Substitution Effects	53
(a) Duality of Consumption	54
(b) The "Effective Decrease" in Income due to a Price Increase	55
(c) Price Change and Demand Change (the Slutsky Decomposition)	56
1.10 Price Elasticity	62
Problem Session 1: Deriving Demand from Utility Maximization	67

2 Theory of Firm Behavior	70
2.1 What Is a “Firm” in Economics?	70
2.2 Firm Behavior in the One-Input (Labor) Case	71
(a) Production Function	72
(b) Profit Maximization	76
(c) The Cost Function and the Supply Curve	81
(d) A Real-Life Example of a Cost Curve	91
2.3 Firm Behavior for the Two-Input (Labor and Capital) Case	94
(a) Returns to Scale	95
(b) Substitution between Inputs and the Marginal Rate of Technical Substitution	96
(c) Profit Maximization	99
(d) The Long-Run Cost Function and the Supply Curve	110
2.4 Firm Behavior in the General Case (Many Inputs and Many Outputs)	115
2.5 Profit and Income Distribution: Why Is There Income Inequality?	119
Problem Session 2: The Production Function and the Workers' Share of Income	123
3 Market Equilibrium	127
3.1 Partial Equilibrium Analysis	127
(a) Market Demand and Market Supply	127
(b) Long-Run Equilibrium at the Industry Level	131
(c) Consumer Surplus	135
(d) Putting Partial Equilibrium Analysis to Practical Use	140
3.2 What You Need to Know about the Trans-Pacific Partnership: TPP and Liberalization of Rice Imports	143
3.3 General Equilibrium Analysis	158
(a) Viewing the Economy as a Whole: General Equilibrium Models	158
(b) Labor Supply	161
(c) General Equilibrium Models (continued)	164
(d) Properties of the Excess Demand Function	165
(e) Existence of an Equilibrium	169
(f) Analyzing an Exchange Economy: The Edgeworth Box	173
(g) Demonstrating the Efficiency of Market Mechanisms: The First Fundamental Theorem of Welfare Economics	181
(h) Background to “Globalization”: Market Equilibrium and the Core	185
(i) The Second Fundamental Theorem of Welfare Economics and Conditions for Efficiency	187
(j) The Second Fundamental Theorem of Welfare Economics and Economic Policy	195
(k) The Big Picture: Decentralized Decision-Making, Information, and Incentives	200

4 Market Failures	203
4.1 Externalities	203
(a) Market Equilibrium with Externalities	204
(b) Pigovian Taxes	206
(c) Pigovian Subsidies	206
(d) Taxes or Subsidies?	208
(e) Some Important Remarks	211
(f) Negotiating Externalities Away: The Coase Theorem	212
4.2 Public Goods	216
(a) Optimal Supply of a Public Good: Partial Equilibrium Analysis	217
(b) Lindahl Equilibrium	218
(c) Optimal Supply of a Public Good: General Equilibrium Analysis	222
5 Monopolies	227
5.1 Behavior of a Monopolistic Firm	227
5.2 What Is Wrong with Monopolies?	230
5.3 Natural Monopolies and Price Regulation	233
Part II Game Theory and Economics of Information: New Frontiers in Economic Theory	239
Introduction: Why Do We Need Game Theory?	239
6 Simultaneous-Move Games and Nash Equilibrium	243
6.1 What Is a “Game”?	243
6.2 Nash Equilibrium	244
(a) Equilibrium in Four Games and Real-Life Situations	245
6.3 The Reason Why a Nash Equilibrium Arises	259
6.4 The Relationship Between an Individual’s Self-Interest and Socially Desirable Outcomes	263
6.5 Application to Oligopoly (I): Quantity Competition and Price Competition	265
(a) Quantity Competition (Cournot Model)	265
(b) Price Competition (Bertrand Model)	268
6.6 Uncertainty and Expected Utility	271
6.7 Mixed-Strategy Equilibria and the Existence of Nash Equilibria	278
7 Dynamic Games and Credible Strategies	284
7.1 Bank Bailout	284
7.2 Subgame-Perfect Equilibrium	289
(a) Extensive Form and Strategies in Dynamic Games	289
(b) What Is a Subgame-Perfect Equilibrium?	293

7.3 Application to Oligopoly (II): The Stackelberg Model	297
7.4 Commitment	302
7.5 Long-Term Relationships and Cooperation	309
8 Insurance and Moral Hazard	316
8.1 Efficient Risk-Sharing and the Role of Insurance	316
8.2 Moral Hazard: The Challenge We Face and What We Can Do	319
9 Adverse Selection and Signaling	331
9.1 What Is Adverse Selection?	331
9.2 Signaling	333
9.3 Signaling Equilibrium in the Labor Market	340
10 Last but Not Least: Let's Talk about Social Justice and Philosophy	355
10.1 The Root of Our Disagreements about Social Justice: The Moral Standards of Community and the Moral Standards of Markets	355
(a) What Are the Moral Standards of Community?	357
(b) What Are the Moral Standards of Markets?	358
(c) The Failure of Socialism and the Limits of the Moral Standards of Community	361
(d) The Roles of the Two Moral Standards	364
10.2 Who Benefits from Markets? The Compensation Principle and Social Justice	366
Appendixes	376
A Essential Mathematical Concepts: All You Need to Know to Read This Book	376
B Constrained Maximization Problems and the Method of Lagrange Multipliers	384
C Compensating Variation and Equivalent Variation	394
D A Step-by-Step Guide to Proving the Second Welfare Theorem	402
Index	428
