1	Introduction	1
2	Preliminaries	7
2.1	Basic Facts, Notation, and Conventions	7
2.2	Known Results Involving $a(x)$	11
2.3	Domain of Attraction	13
2.4	Relative Stability, Distribution of Z and Overshoots	14
2.4.1	Relative Stability	14
2.4.2	Overshoots and Relative Stability of Z	15
2.5	Overshoot Distributions Under (AS)	16
2.6	Table for Modes of the Overshoot $Z(R)$ Under (AS)	17
3	Bounds of the Potential Function	19
3.1	Statements of Results	19
3.2	Auxiliary Results	23
3.3	Proofs of Theorems 3.1.1 to 3.1.3	31
3.3.1	Proof of Theorem 3.1.1	31
3.3.2	Proof of Theorem 3.1.3	34
3.4	Proof of Proposition 3.1.5	36
3.5	Proof of Theorem 3.1.6 and Proposition 3.1.7	39
3.6	An Example Exhibiting Irregular Behaviour of $a(x)$	45
4	Some Explicit Asymptotic Forms of $a(x)$	51
4.1	Relatively Stable Distributions	51
4.2	Distributions in Domains of Attraction	56
4.2.1	Asymptotics of $a(x)$ I	57
4.2.2	Asymptotics of $a(x)$ II	62
4.3	Asymptotics of $a(x + 1) - a(x)$	68

5	Applications Under $m_+/m \rightarrow 0$	75
5.1	Some Asymptotic Estimates of $P_x[\sigma_R < \sigma_0]$	76
5.2	Relative Stability of Z and Overshoots	79
5.3	The Two-Sided Exit Problem Under $m_+/m \rightarrow 0$	85
5.4	Spitzer's Condition and the Regular Variation of V_d	88
5.5	Comparison Between σ_R and $\sigma_{[R, \infty)}$ and One-Sided Escape From Zero	94
5.6	Escape Into $(-\infty, -Q] \cup [R, \infty)$	95
5.7	Sojourn Time of a Finite Set for S with Absorbing Barriers	101
6	The Two-Sided Exit Problem – General Case	105
6.1	Statements of Results	106
6.2	Upper Bounds of $P_x(\Lambda_R)$ and Partial Sums of $g_\Omega(x, y)$	111
6.3	Proof of Theorem 6.1.1	113
6.3.1	Case (C2)	113
6.3.2	Cases (C3) and (C4)	114
6.4	Miscellaneous Lemmas Under (C3), (C4)	117
6.5	Some Properties of the Renewal Functions U_a and V_d	124
6.6	Proof of Proposition 6.1.3	128
6.7	Note on the Over- and Undershoot Distributions I	131
7	The Two-Sided Exit Problem for Relatively Stable Walks	135
7.1	Statements of the Main Results	136
7.2	Basic Facts from Chapter 6	142
7.3	Proof of Theorem 7.1.1 and Relevant Results	143
7.4	Proof of Proposition 7.1.3 (for F Recurrent) and Theorem 7.1.4	148
7.4.1	Preliminary Estimates of u_a and the Proof of Proposition 7.1.3 in the Case When F is Recurrent	148
7.4.2	Asymptotic Forms of u_a and $P_0(\Lambda_R)$	151
7.4.3	Proof of Theorem 7.1.4	155
7.5	Proof of Proposition 7.1.3 (for F Transient) and Theorem 7.1.6	157
7.6	Estimation of $P_x[S_{N(R)} = y \Lambda_R]$ and the Overshoots	162
7.7	Conditions Sufficient for (7.7) or $\ell^*(x)\ell_{\#}(x) \sim A(x)$	168
8	Absorption Problems for Asymptotically Stable Random Walks	171
8.1	Strong Renewal Theorems for the Ladder Height Processes	172
8.2	The Green Function $g_\Omega(x, y)$	176
8.3	Asymptotics of $P_x[\sigma_R < T \Lambda_R]$	180
8.4	Asymptotic Form of the Green Function $g_{B(R)}(x, y)$	185
8.5	The Scaling Limit of $g_{B(R)}(x, y)$	189
8.6	Asymptotics of $g_{B(R)}(x, y)$ Near the Boundary	196
8.7	Note on the Over- and Undershoot Distributions II	203

9 Asymptotically Stable Random Walks Killed Upon Hitting a Finite Set 207

9.1 The Potential Function for a Finite Set 208

 9.1.1 Recurrent Walks with $\sigma^2 = \infty$ 208

 9.1.2 Case $\sigma^2 < \infty$ 210

 9.1.3 Transient Walks 211

9.2 The r.w. Conditioned to Avoid a Finite Set; Statements of Results .. 211

9.3 Proof of Theorem 9.2.1 219

9.4 The Distribution of the Starting Site of a Large Excursion 225

9.5 An Application to the Escape Probabilities From a Finite Set 227

9.6 Proof of Theorem 9.2.2 230

9.7 Proof of Theorem 9.2.6 234

9.8 Random Walks Conditioned to Avoid a Finite Set Forever 235

9.9 Some Related Results 240

 9.9.1 The r.w. Avoiding a Finite Set in the Case $\sigma^2 < \infty$ 241

 9.9.2 Uniform Estimates of $Q_B^n(x, y)$ in the Case $1 < \alpha < 2$ 242

 9.9.3 Asymptotic Properties of $p_t^0(\xi, \eta)$ and $q_t(\xi)$ and Applications 244

 9.9.4 The r.w. Killed Upon Entering the Negative Half-Line 247

Appendix 249

 A.1 Relations Involving Regularly Varying Functions 249

 A.1.1 Results on s.v. Functions I 249

 A.1.2 Results on s.v. Functions II 250

 A.2 Renewal Processes, Strong Renewal Theorems and the Overshoot Distribution 252

 A.2.1 Strong Renewal Theorems 253

 A.2.2 Renewal Function and Over- and Undershoot Distributions .. 257

 A.3 The First Ladder Epoch and Asymptotics of U_a 260

 A.3.1 Stability of τ_1 and Spitzer's Condition 261

 A.3.2 Asymptotics of U_a Under (AS) 262

 A.4 Positive Relative Stability and Condition (C3) 264

 A.5 Some Elementary Facts 266

 A.5.1 An Upper Bound of the Tail of a Trigonometric Integral 266

 A.5.2 A Bound of an Integral 267

 A.5.3 On the Green Function of a Transient Walk 267
