

# Contents

<b>1</b>	<b>Introduction</b> .....	1
1.1	Riemannian Manifolds .....	1
1.2	The Riemannian Volume .....	3
1.2.1	Definition and Properties .....	3
1.2.2	The Coarea Formula .....	5
1.2.3	Riemannian Volume of Submanifolds .....	5
1.2.4	The Divergence Theorem.....	6
1.2.5	The Doubling Property .....	8
1.3	Variation Formulas for the Riemannian Volume of Submanifolds ...	9
1.3.1	Deformations.....	9
1.3.2	The First Variation Formula .....	10
1.3.3	The Second Variation Formula .....	17
1.3.4	Variation of the Scalar Mean Curvature of a Hypersurface ...	27
1.3.5	Volume Comparison for Balls.....	30
1.3.6	Estimates of Normal Jacobians .....	37
1.4	Sets of Finite Perimeter .....	40
1.4.1	Definitions .....	40
1.4.2	The Reduced Boundary.....	41
1.4.3	Properties of Sets of Finite Perimeter.....	46
1.4.4	A Uniform Relative Isoperimetric Inequality for Small Balls .....	47
1.4.5	Deformations of Sets of Finite Perimeter.....	48
1.5	Other Notions of Boundary Area.....	49
1.5.1	Minkowski Content .....	49
1.5.2	The Hausdorff Measure .....	53
1.6	The Isoperimetric Profile .....	55
1.6.1	Regularity of Isoperimetric Sets .....	57
1.6.2	Restricted and Free-Boundary Isoperimetric Profiles .....	58
1.7	Notes.....	59

<b>2</b>	<b>Isoperimetric Inequalities in Surfaces</b> .....	63
2.1	A Variational Proof of the Gauss-Bonnet Theorem .....	64
2.2	The Isoperimetric Inequality in Cartan-Hadamard Surfaces .....	66
2.3	The Method of Inner Parallels .....	69
2.4	Bandle's Approach .....	73
2.5	Curve Shortening Flow and Isoperimetric Inequalities .....	76
2.5.1	Basic Results .....	76
2.5.2	The Avoidance Principle .....	78
2.5.3	Applications of Curve Shortening Flow to Isoperimetric Inequalities .....	79
2.6	A Variational Approach .....	88
2.6.1	Curves with Constant Geodesic Curvature in Surfaces of Revolution .....	89
2.6.2	Planes of Revolution with Monotone Gauss Curvature .....	96
2.6.3	Spheres of Revolution with Monotone Gauss Curvature .....	106
2.6.4	Surfaces with Singularities .....	114
2.7	Existence of Isoperimetric Regions in Complete Surfaces with Non-negative Gauss Curvature .....	116
2.7.1	Proof of the Existence Result .....	118
2.7.2	Consequences of the Existence Result .....	120
2.8	Notes .....	122
<b>3</b>	<b>The Isoperimetric Profile of Compact Manifolds</b> .....	127
3.1	The Normalized Isoperimetric Profile .....	128
3.1.1	Basic Properties .....	129
3.2	Continuity of the Isoperimetric Profile .....	130
3.3	An Asymptotic Expansion for Small Volumes .....	132
3.4	Differentiability of the Isoperimetric Profile .....	135
3.4.1	A Differential Inequality for the Isoperimetric Profile .....	136
3.4.2	The Isoperimetric Profile of the Sphere .....	139
3.4.3	Consequences of the Differential Inequality .....	140
3.5	Lévy-Gromov's Isoperimetric Inequality .....	142
3.5.1	A Proof Using the Differential Inequality .....	143
3.5.2	The Original Proof .....	144
3.6	Continuity Under Lipschitz Convergence .....	146
3.7	Density Estimates for Isoperimetric Regions .....	148
3.8	Notes .....	153
<b>4</b>	<b>The Isoperimetric Profile of Non-compact Manifolds</b> .....	157
4.1	A Manifold with Discontinuous Isoperimetric Profile .....	158
4.1.1	Geometry of the First Heisenberg Group $\mathbb{H}^1$ .....	158
4.1.2	The Isoperimetric Profile of Some Quotients of $\mathbb{H}^1$ .....	159
4.1.3	Proof of the Existence Result .....	162
4.2	Continuity of the Isoperimetric Profile Under Sectional Curvature Conditions .....	164

4.2.1	Geometry of Manifolds with a Convex Exhaustion Function .....	164
4.2.2	A Volume Estimate .....	166
4.2.3	Approximation of the Isoperimetric Profile .....	168
4.2.4	The Isoperimetric Profile of the Sublevel Sets .....	170
4.2.5	Proof of the Continuity Result .....	171
4.3	Minimizing Sequences.....	174
4.3.1	Structure of Minimizing Sequences.....	174
4.3.2	Existence of Isoperimetric Regions on Manifolds with Finite Volume .....	178
4.4	Existence of Isoperimetric Sets Under a Cocompact Action of the Isometry Group .....	179
4.4.1	An Isoperimetric Inequality for Small Volumes.....	180
4.4.2	Boundedness of Isoperimetric Sets .....	181
4.4.3	Concentration of Mass.....	183
4.4.4	Proof of Existence .....	183
4.4.5	Some Properties of the Isoperimetric Profile .....	186
4.5	The Isoperimetric Profile of the Euclidean and Hyperbolic Spaces.....	190
4.5.1	The Isoperimetric Profile of $\mathbb{R}^m$ .....	191
4.5.2	The Isoperimetric Profile of $\mathbb{H}^m$ .....	194
4.6	Generalized Existence of Isoperimetric Sets.....	198
4.6.1	Manifolds with Bounded Lipschitz Geometry .....	198
4.6.2	Existence of Isoperimetric Sets in Manifolds with Bounded Lipschitz Geometry .....	202
4.6.3	Some Consequences .....	209
4.7	Notes.....	210
<b>5</b>	<b>Symmetrization and Classical Results .....</b>	<b>215</b>
5.1	Symmetrization in Warped Products .....	216
5.1.1	Geometry of Warped Products .....	216
5.1.2	Symmetrization and Basic Properties.....	219
5.1.3	Proof of the Symmetrization Result .....	222
5.1.4	An Inequality for the Perimeter .....	225
5.2	Spaces with Constant Sectional Curvature.....	229
5.2.1	The One-Dimensional Case .....	229
5.2.2	Decomposition of Simply Connected Space Forms as Warped Products .....	231
5.2.3	The Isoperimetric Inequality in Euclidean Space .....	232
5.2.4	The Isoperimetric Inequality in Hyperbolic Space.....	236
5.2.5	The Isoperimetric Inequality in Euclidean Space by Multiple Symmetrization .....	237
5.2.6	The Isoperimetric Inequality in the Round Sphere.....	240
5.3	Hsiang Symmetrization .....	242
5.3.1	The Symmetrization Result .....	242

5.3.2	Some Consequences .....	245
5.3.3	Products of Euclidean and Hyperbolic Spaces .....	246
5.3.4	Spherical Cylinders .....	247
5.3.5	Product of a Circle with a Simply Connected Two-Dimensional Space Form .....	248
5.4	Classical Proofs of the Isoperimetric Inequality in Euclidean Space .....	251
5.4.1	Using Brunn-Minkowski Inequality .....	251
5.4.2	Using the Linear Brunn-Minkowski Inequality .....	252
5.4.3	Using Mass Transport: Knothe and Brenier-McCann Maps.....	254
5.4.4	Reilly-Ros' Proof of Alexandrov Theorem.....	255
5.4.5	Cabré's Proof: The Alexandrov-Bakelman-Pucci Technique .....	258
5.5	Notes.....	259
<b>6</b>	<b>Space Forms .....</b>	<b>263</b>
6.1	Stable Constant Mean Curvature Hypersurfaces .....	264
6.1.1	The Jacobi Operator and the Index Form.....	265
6.1.2	Eigenvalues of the Jacobi Operator .....	267
6.1.3	Local Minimizing Properties for Stable Hypersurfaces.....	270
6.2	Stable Hypersurfaces in Simply Connected Space Forms .....	273
6.2.1	Stability of Geodesic Spheres in Simply Connected Space Forms .....	273
6.2.2	Stable Constant Mean Curvature Surfaces in $\mathbb{R}^m$ .....	274
6.2.3	Stable Constant Mean Curvature Hypersurfaces in $\mathbb{S}^m$ and $\mathbb{H}^m$ .....	277
6.2.4	The Stability Condition in the Presence of a Singular Set ....	281
6.3	Three-Dimensional Space Forms.....	284
6.3.1	Bounds on the Genus of an Isoperimetric Boundary.....	285
6.3.2	The Genus 0 Case.....	289
6.3.3	The Genus 1 Case.....	290
6.3.4	Higher Genus: Examples .....	293
6.4	Three-Dimensional Elliptic Space Forms.....	294
6.4.1	The Real Projective Space $\mathbb{R}P^3$ .....	294
6.4.2	An Application to the Willmore Problem .....	296
6.4.3	Lens Spaces .....	299
6.5	Three-Dimensional Flat Space Forms.....	300
6.5.1	Compactness of the Space of Isoperimetric Boundaries of High Genus .....	302
6.5.2	Isoperimetric Sets in Rectangular Lattices .....	308
6.5.3	Hadwiger's Theorem for Lattices .....	312
6.5.4	Product of Circles and Euclidean Spaces .....	315
6.6	Notes.....	327

<b>7</b>	<b>The Isoperimetric Profile for Small and Large Volumes</b>	331
7.1	A Symmetrization Result for Small Volumes	332
7.1.1	The Center of Mass	332
7.1.2	Blowing Up the Riemannian Metric at a Point	334
7.1.3	Pseudo Bubbles	338
7.1.4	Isoperimetric Sets of Small Volume	342
7.1.5	Proof of the Symmetry Result	344
7.1.6	Asymptotic Expansion of Area and Volume of Pseudo Bubbles	345
7.1.7	Isoperimetric Sets and Scalar Curvature	350
7.2	Large Isoperimetric Sets in $M \times \mathbb{R}$	352
7.3	Large Isoperimetric Sets in $M \times \mathbb{R}^k$ , $k > 1$	355
7.3.1	Geometric Properties of $M \times \mathbb{R}^k$	355
7.3.2	$L^1$ Convergence of Anisotropic Scalings	358
7.3.3	Density Estimates	361
7.3.4	Strict $O(k)$ Stability of Tubes with Large Radius	365
7.3.5	Statement and Proof of the Main Result	367
7.4	Notes	368
<b>8</b>	<b>Isoperimetric Comparison for Sectional Curvature</b>	371
8.1	A Proof of the Euclidean Isoperimetric Inequality Involving Total Curvature	373
8.2	A Mean Curvature Estimate	375
8.3	The Three-Dimensional Case: Kleiner's Proof	377
8.4	The Three-Dimensional Case: A Proof Using the Willmore Functional	382
8.4.1	The Euclidean Case	382
8.4.2	The Hyperbolic Case	385
8.5	The Four-Dimensional Case: Croke's Proof	387
8.6	Notes	391
<b>9</b>	<b>Relative Isoperimetric Inequalities</b>	393
9.1	The Isoperimetric Profile of a Domain	394
9.1.1	Isoperimetric Sets: Boundary Regularity of Isoperimetric Sets	394
9.1.2	The Isoperimetric Profile of a Half-Space	395
9.1.3	The Isoperimetric Profile for Small Volumes	396
9.2	Variation Formulas in Sets with Boundary	397
9.2.1	First Variation	397
9.2.2	Second Variation	398
9.3	A Differential Inequality for the Isoperimetric Profile of a Bounded Set	401
9.3.1	The Differential Inequality	402
9.3.2	Geometrical and Topological Restrictions for Isoperimetric Sets	405
9.3.3	Comparison Results	406

9.4	The Isoperimetric Profile of the Ball .....	408
9.4.1	A Family of Conformal Deformations .....	408
9.4.2	Stable Hypersurfaces Inside a Euclidean Ball .....	412
9.4.3	Stable Hypersurfaces Outside a Euclidean Ball .....	413
9.4.4	Isoperimetric Sets Inside a Euclidean Ball .....	413
9.4.5	Isoperimetric Sets Outside a Euclidean Ball .....	414
9.5	The Isoperimetric Profile of a General Convex Body .....	414
9.5.1	Concavity of the Profile .....	415
9.5.2	The Ahlfors Property and a Relative Isoperimetric Inequality for Small Volumes .....	418
9.5.3	Density Estimates .....	423
9.5.4	The Isoperimetric Profile for Small Volumes.....	428
9.6	Notes .....	433
	<b>References</b> .....	437
	<b>Index</b> .....	455
	<b>Notation index</b> .....	459
