1	Introduction	1
1.1	An Example	2
1.2	Contributions	4
1.3	Scope of Results.....	5
1.4	Structure and Content of This Text.....	6
1.5	Notation and Conventions	9
2	Preliminaries	11
2.1	Finite Dimensional Gaussian Measures.....	12
2.1.1	Univariate Gaussian Measures	12
2.1.2	Multivariate Gaussian Measures	13
2.1.3	Hermite Polynomials	14
2.2	Gaussian Measures on Separable Locally Convex Spaces	16
2.2.1	Cylindrical Sets	18
2.2.2	Definition and Basic Properties of Gaussian Measures	18
2.3	Cameron-Martin Space	21
2.4	Gaussian Product Measures	22
2.5	Gaussian Series.....	24
2.5.1	Some Abstract Results.....	24
2.5.2	Karhunen-Loève Expansion.....	27
2.5.3	Multiresolution Representations of GRFs	30
2.5.4	Periodic Continuation of a Stationary GRF	31
2.5.5	Sampling Stationary GRFs	34
2.6	Finite Element Discretization.....	36
2.6.1	Function Spaces.....	36
2.6.2	Finite Element Interpolation	37
3	Elliptic Divergence-Form PDEs with Log-Gaussian Coefficient	39
3.1	Statement of the Problem and Well-Posedness	40
3.2	Lipschitz Continuous Dependence	40
3.3	Regularity of the Solution	41
3.4	Random Input Data	45

3.5	Parametric Deterministic Coefficient	45
3.5.1	Deterministic Countably Parametric Elliptic PDEs	46
3.5.2	Probabilistic Setting	47
3.5.3	Deterministic Complex-Parametric Elliptic PDEs	48
3.6	Analyticity and Sparsity	49
3.6.1	Parametric Holomorphy	49
3.6.2	Sparsity of Wiener-Hermite PC Expansion Coefficients.....	52
3.7	Parametric $H^s(D)$ -Analyticity and Sparsity	61
3.7.1	$H^s(D)$ -Analyticity	61
3.7.2	Sparsity of Wiener-Hermite PC Expansion Coefficients.....	65
3.8	Parametric Kondrat'ev Analyticity and Sparsity	69
3.8.1	Parametric $K_x^s(D)$ -Analyticity	69
3.8.2	Sparsity of K_x^s -Norms of Wiener-Hermite PC Expansion Coefficients	74
3.9	Bibliographical Remarks	76
4	Sparsity for Holomorphic Functions	79
4.1	$(\mathbf{b}, \xi, \delta, X)$ -Holomorphy and Sparsity	80
4.2	$(\mathbf{b}, \xi, \delta, X)$ -Holomorphy of Composite Functions	89
4.3	Examples of Holomorphic Data-to-Solution Maps.....	96
4.3.1	Linear Elliptic Divergence-Form PDE with Parametric Diffusion Coefficient.....	96
4.3.2	Linear Parabolic PDE with Parametric Coefficient	98
4.3.3	Linear Elastostatics with Log-Gaussian Modulus of Elasticity	107
4.3.4	Maxwell Equations with Log-Gaussian Permittivity	112
4.3.5	Linear Parametric Elliptic Systems and Transmission Problems	112
5	Parametric Posterior Analyticity and Sparsity in BIPs	115
5.1	Formulation and Well-Posedness.....	116
5.2	Posterior Parametric Holomorphy.....	117
5.3	Example: Parametric Diffusion Coefficient.....	120
6	Smolyak Sparse-Grid Interpolation and Quadrature	123
6.1	Smolyak Sparse-Grid Interpolation and Quadrature	124
6.1.1	Smolyak Sparse-Grid Interpolation	124
6.1.2	Smolyak Sparse-Grid Quadrature	126
6.2	Multiindex Sets.....	128
6.2.1	Number of Function Evaluations	128
6.2.2	Construction of $(c_{k,v})_{v \in \mathcal{F}}$	128
6.2.3	Summability Properties of the Collection $(c_{k,v})_{v \in \mathcal{F}}$	131
6.2.4	Computing Λ_ε	133
6.3	Interpolation Convergence Rate	133
6.4	Quadrature Convergence Rate.....	140

7	Multilevel Smolyak Sparse-Grid Interpolation and Quadrature	145
7.1	Setting and Notation	145
7.2	Multilevel Smolyak Sparse-Grid Algorithms	147
7.3	Construction of an Allocation of Discretization Levels	150
7.4	Multilevel Smolyak Sparse-Grid Interpolation Algorithm	155
7.5	Multilevel Smolyak Sparse-Grid Quadrature Algorithm	160
7.6	Examples for Multilevel Interpolation and Quadrature	165
7.6.1	Parametric Diffusion Coefficient in Polygonal Domain	165
7.6.2	Parametric Holomorphy of the Posterior Density in Bayesian PDE Inversion	178
7.7	Linear Multilevel Interpolation and Quadrature Approximation	183
7.7.1	Multilevel Smolyak Sparse-Grid Interpolation	184
7.7.2	Multilevel Smolyak Sparse-Grid Quadrature	188
7.7.3	Applications to Parametric Divergence-Form Elliptic PDEs	191
7.7.4	Applications to Holomorphic Functions	192
8	Conclusions	197
