

CONTENTS

PREFACE	page vii
CHAPTER I INTRODUCTION	1
(1) A brief review of the multi-period theory of the firm	2
(2) The plan of the present study	4
II THE MULTI-PERIOD THEORY OF THE FIRM WITHOUT ADJUSTMENT COSTS	7
(1) One-period optimisation	7
(2) Multi-period profit maximisation	10
(3) Multi-period cost minimisation	15
(4) Summary and conclusions	16
III MULTI-PERIOD MODELS OF THE FIRM WITHOUT ADJUSTMENT COSTS: SOME EMPIRICAL EVIDENCE	18
(1) Profit maximisation	18
(2) Cost minimisation	29
(3) Summary and conclusions	34
IV THE MULTI-PERIOD THEORY OF THE FIRM WITH ADJUSTMENT COSTS/1/THE BASIC APPROACH	36
(1) Types of adjustment costs	36
(2) A simple model of the firm with external adjustment costs	42
(3) Summary and conclusions	48
V THE MULTI-PERIOD THEORY OF THE FIRM WITH ADJUSTMENT COSTS/2/SOME SPECIFIC RESULTS	49
(1) Decreasing returns to scale	49
(2) Constant returns to scale	57
(3) Increasing returns to scale	61
(4) Cost minimisation	63
(5) Summary and conclusions	65

VI	ADJUSTMENT COST MODELS: SOME EMPIRICAL RESULTS	page 67
	(1) The estimation of adjustment cost models	67
	(2) A specific cost minimisation model with adjustment costs	72
	(3) Empirical results for a specific adjustment cost model	75
	(4) Summary and conclusions	79
VII	FIRM AND MARKET THEORIES OF INVESTMENT AND EMPLOYMENT	80
	(1) Modifications of the theory of the firm	81
	(2) A market theory of investment	82
	(3) Summary and conclusions	95
	APPENDIX	97
	BIBLIOGRAPHY	104
	INDEX	108
TABLE	III-1 The profit maximisation model without lags	26
	III-2 The profit maximisation model with lags	28
	III-3 The cost minimisation model without lags	30
	III-4 Cost minimisation model with K lags	32
	III-5 Cost minimisation model with N lags	33
	VI-1 Parameter estimates of equations (VI-26)	77
