

## Table of contents

List of figures .....	i
List of tables .....	iii
Summary .....	iv
Zusammenfassung .....	v
1 Introduction .....	1
2 Development of dynamic inequity aversion models .....	8
2.1 Theory of <i>homo economicus</i> .....	8
2.2 Deviations from the standard theory .....	9
2.2.1 Nonstandard preferences .....	12
2.2.2 Nonstandard beliefs .....	16
2.2.3 Nonstandard decision-making .....	18
2.3 Models of the nonstandard preference of inequity aversion .....	22
2.3.1 Experimental foundations of social preferences .....	23
2.3.2 Inequity aversion with complete information .....	25
2.3.3 Inequity aversion with incomplete information .....	27
2.3.4 Other social preferences models .....	28
2.3.5 Criticisms and limitations of inequity aversion models .....	35
2.4 Foundations of dynamic inequity aversion .....	37
2.4.1 Anchoring and adjusting utility .....	38
2.4.2 Addressing complexity with system dynamics .....	40
2.4.3 System dynamics model of dynamic inequity aversion with complete information .....	42
2.4.4 System dynamics model of dynamic inequity aversion with incomplete information .....	44
2.5 Applications and limitations of dynamic inequity aversion models .....	45

3	Fairness concerns in supply chains with dynamic inequity aversion .....	48
3.1	Fairness and the supply chains .....	48
3.1.1	Theoretical foundations of fairness .....	48
3.1.2	Fairness in economics and organizations .....	52
3.1.3	Fairness in supply chains.....	57
3.2	Modeling fairness as dynamic inequity aversion .....	62
3.2.1	The Beer Distribution Game .....	62
3.2.2	Inequity aversion in the Beer Distribution Game.....	67
3.2.3	Model validation .....	70
3.3	Simulating a dynamically complex supply chain.....	72
3.4	Implications of fairness concerns in dynamically complex supply chains .....	81
4	Fairness in the Beer Distribution Game: An experimental study.....	85
4.1	Behavioral laboratory experiments and operations management .....	85
4.1.1	Purpose and history of experiments in operations management .....	85
4.1.2	The Beer Distribution Game as an experimental paradigm .....	89
4.2	Experimental design.....	91
4.2.1	Experimental variables and treatments .....	91
4.2.2	Experimental measurements .....	95
4.2.3	Experimental interface .....	101
4.3	Data collection and analysis .....	103
4.3.1	Data collection.....	103
4.3.2	Qualitative analysis .....	106
4.3.3	Quantitative analysis .....	113
4.4	Discussion of the experimental results.....	121
5	Conclusion.....	126
	References .....	131

Appendix A: The stock and flow model .....	i
Appendix B: Full listing of the system dynamics model equations .....	v
Appendix C: Sensitivity reports .....	xxiv
Appendix D: Additional simulations.....	xxix
Appendix E: The experimental interface .....	xxxiii
Appendix F: The post-game questionnaire interface .....	xxxvii
Appendix G: Performance measurements.....	xlii
Appendix H: Results of statistical analysis .....	xliii
Selbstständigkeitserklärung.....	lvii
