

CONTENTS

<i>Preface</i>		xi
<i>Introduction</i>		1
<i>One</i>	A Mistaken View of the Incompleteness of Science	5
	1. The Something-Is-Always-Left-Out Argument	5
	2. The Case of Fact-Explanations: Local Explanatory Omissions Do Not Entail Global Inexplicability	6
	3. The Case of Laws: The Systemic Character of Law Explanation	10
	4. The Case of the System as a Whole: Transcending Circularity	12
	5. Descriptive Incompleteness: The Infeasibility of Characterizing All Particular Facts	14
<i>Two</i>	Question Dynamics and Problems of Scientific Completeness	18
	1. The Role of Presuppositions	18
	2. Question Dissolution	22
	3. Kant's Principle of Question Propagation	27
	4. Cognitive Completeness: Question- Answering (or "Erotetic") Completeness	31
		vii

<i>Three</i>	Questions and Scientific Progress	35
	1. Question Dialectics and Scientific Progress	35
	2. The Lessons of History	40
	3. The Pragmatic Dimension of Progress	44
<i>Four</i>	The Potential Limitlessness of Science	47
	1. The Potential Limitlessness of Scientific Change	47
	2. The Role of Cognitive Limits	54
<i>Five</i>	Against Convergentism	60
	1. The Diminishing>Returns View of Scientific Progress and Its Flaws	60
	2. A Critique of the Self-Correction Thesis	62
	3. The Instability of Science: The Role of Conceptual Innovation	68
	4. Scientific Changes Maintain a Uniform Level of Significance	74
<i>Six</i>	The Instability of Science	77
	1. The Comparative Fragility of Science: Scientific Claims as Mere Estimates	77
	2. Fallibilism and the Distinction Between Our (Putative) Truth and the Real Truth	83
	3. Cognitive Copernicanism	86
	4. The Problem of Progress	88
<i>Seven</i>	The Unpredictability of Future Science	95
	1. Transition	95
	2. Difficulties in Predicting Future Science	96
	3. Present Science Cannot Speak for Future Science	101
	4. The Plasticity of Science	104
	5. Against Domain Limitations	109

<i>Eight</i>	Against Insolubilia	112
	1. The Idea of Insolubilia	112
	2. The Reymond-Haeckel Controversy	114
	3. Some Purported Scientific Insolubilia	118
	4. The Infeasibility of Identifying Insolubilia	127
 <i>Nine</i>	 The Theoretical Unrealizability of Perfected Science	 133
	1. Conditions of Perfected Science	133
	2. Theoretical Adequacy: Issues of Eretetic Completeness	135
	3. Pragmatic Completeness	140
	4. Predictive Completeness	143
	5. Temporal Finality	145
	6. The Dispensability of Perfection	148
	7. "Perfected Science" as an Idealization that Affords a Useful Contrast Conception	150
	8. Science and Reality	153
 <i>Ten</i>	 The Practical Infeasibility of Perfecting Science	 160
	1. Technological Escalation	160
	2. Rising Costs	166
	3. Economic Requirements Spell Economic Limitations	168
 <i>Eleven</i>	 Extraterrestrial Science	 174
	1. Could Science in Another Setting Overcome the Limitations of Our Human Science?	174
	2. The Potential Diversity of "Science"	176
	3. The One-World, One-Science Argument	183
	4. Comparability and Judgments of Relative Advancement	187

5. First Principles	192
6. The Implausibility of Being Outdistanced	197
<i>Twelve</i> The Limited Province of Natural Science	206
1. Knowledge as One Good Among Others	207
2. Scientific Knowledge as One Mode of Knowledge	208
3. The Autonomy of Science	215
4. Conclusion	217
<i>Name Index</i>	219
<i>Subject Index</i>	223
