

## Contents

Preface	vii
Stochastic equations M. M. RAO	ix
Biography of M. M. Rao	xv
Published writings of M. M. Rao	xvii
Ph.D. theses completed under the direction of M. M. Rao	xxv
Celebrating M. M. Rao's many mathematical contributions	xxix
Sufficient conditions for Lorenz ordering with common finite support BARRY C. ARNOLD	1
Ergodicity and steady state analysis for interference queueing networks SAYAN BANERJEE and ABISHEK SANKARARAMAN	9
How strong can the Parrondo effect be? II S. N. ETHIER and JIYEON LEE	25
Binary response models comparison using the $\alpha$ -Chernoff divergence measure and exponential integral functions SUBIR GHOSH and HANS NYQUIST	37
Nonlinear parabolic equations with Robin boundary conditions and Hardy-Leray type inequalities GISÈLE RUIZ GOLDSTEIN, JEROME A. GOLDSTEIN, ISMAIL KÖMBE, and REYHAN TELLIOĞLU BALEKOĞLU	55
Banach space valued weak second order stochastic processes YÛICHIRO KAKIHARA	71
Explicit transient probabilities of various Markov models ALAN KRINIK, HUBERTUS VON BREMEN, IVAN VENTURA, UYEN VIETTHANH NGUYEN, JEREMY J. LIN, THUY VU DIEU LU, CHON IN (DAVE) LUK, JEFFREY YEH, LUIS A. CERVANTES, SAMUEL R. LYCHE, BRITTNEY A. MARIAN, SAIF A. ALJASHAMY, MARK DELA, ALI OUDICH, PEDRAM OSTADHASSANPANJEHALI, LYHENG PHEY, DAVID PEREZ, JOHN JOSEPH KATH, MALACHI C. DEMMIN, YOSEPH DAWIT, CHRISTINE CARMEN MARIE HOOGENDYK, AARON KIM, MATTHEW McDONOUGH, ADAM TREVOR CASTILLO, DAVID BEECHER, WEIZHONG WONG, and HEBA AYEDA	97

On the use of Markovian stick-breaking priors WILLIAM LIPPITT and SUNDER SETHURAMAN	153
Eulerian polynomials and Quasi-Birth-Death processes with time-varying-periodic rates BARBARA MARGOLIUS	175
Random measure algebras JASON H. J. PARK	195
From additive to second-order processes M. M. RAO and R. J. SWIFT	205
The exponential-dual matrix method: Applications to Markov chain analysis GERARDO RUBINO and ALAN KRINIK	217
Two moment closure techniques for an interacting species model JENNIFER SWITKES	237
