Table of contents

Preface

Part I INTRODUCTION

I–1 A Short Survey of the Literature . . . . . I– 1
I–2 Arguments in Favor of Dynamic Control Models . . . . . I– 7
I–3 Limitations and Assumptions . . . . . I– 10
I–3.1 The Decision-maker . . . . . I– 10
I–3.2 Investment Decisions . . . . . I– 11
I–3.3 Further Assumptions . . . . . I– 13
I–3.4 Investment Objects . . . . . I– 15
I–3.5 Discount Factor . . . . . I– 16
I–3.6 Choice Criteria . . . . . I– 21
I–3.7 Uncertainty . . . . . I– 24
I–4 Summary . . . . . I– 26

Part II MAINTENANCE AND SERVICE LIFE

II–1 Formulating the Problem . . . . . II– 4
II–1.1 General Model . . . . . II– 4
II–1.2 Mathematical Techniques . . . . . II– 9
II–1.3 Separability . . . . . II– 9
II–1.4 Consistency and the Discount Factor . . . . . II– 11
II–1.5 The Law of Diminishing Marginal Returns . . . II– 12
II–1.6 Classification of Maintenance and Investment Activities . . . . . II– 12
II–1.7 Aspects of the Data Problem . . . . . II– 14
II–2 Models . . . . . II– 16
II–2.1 One-Dimensional Models . . . . . II– 17
II–2.2 The Two Models' Approach . . . . . II– 25
II–2.3 Decreasing Amount of Maintenance Expenditures . . . . . II– 28
II–2.4 Different Descriptive Dimensions . . . . . II– 32
II–2.5 Multi-Dimensional Models . . . . . II– 37
II–2.6 Concluding Remarks . . . . . II– 39
II–3 Reinvestment Models . . . . . II– 41
II–3.1 The Constant Chain Assumption . . . . . II– 42
II–3.2 Changes in Conditions . . . . . II– 47

II–3.3 Investment Chains and Maintenance Expenditures . . . . . II– 56
II–3.4 The Terminal Condition . . . . . II– 61
II–3.5 Summary . . . . . II– 69
II–4 Summary of Part II . . . . . II– 71

Part III EFFECTS OF TAXES
III–1 Invariant Models . . . . . III– 10
III–1.1 Criteria for Invariant Models . . . . . III– 11
III–1.2 Special Depreciation Rules . . . . . III– 15
III–1.3 A Special Discount Rate . . . . . III– 21
III–1.4 An Additional Investment Cost . . . . . III– 25
III–1.5 Concluding Discussion . . . . . III– 33
III–2 Profit Tax and Single Investment Models . . . . . III– 36
III–2.1 Taxes and the Discount Rate . . . . . III– 36
III–2.2 A Constant Discount Rate . . . . . III– 44
III–2.3 A Decreasing Discount Rate . . . . . III– 51
III–2.4 An Increasing Discount Rate . . . . . III– 76
III–2.5 Concluding Discussion . . . . . III– 80
III–3 Profit Tax and Reinvestment Models . . . . . III– 85
III–3.1 Profit Tax in Investment Models without Maintenance Expenditures . . . . . III– 89
III–3.2 Profit Tax in an Investment and Maintenance Model . . . . . III– 95
III–3.3 Summary III–107
III–4 Special Taxes and Investment Maintenance Decisions . III–112
III–4.1 Revenue Tax III–119
III–4.2 Employer's Tax III–125
III–4.3 Sales Tax III–127
III–4.4 Lump Sum Tax III–129
III–4.5 Value-Added Tax III–130
III–4.6 Overlapping Discussion III–132
III–4.7 Brief Summary III–137
III–5 Summary, Part III III–139
Appendix III–I III–151

Part IV RULES OF THUMB
IV–1 The MAPI-Formula . . . . . IV– 11
IV–1.1 A General Approach . . . . . IV– 11
IV–1.2 Terborgh's Approach . . . . . IV– 14
IV–1.3 Some Implications . . . . . IV– 16
IV–1.4 Summary . . . . . IV– 20
IV–2 The MAPI-Maintenance Model . . . . . IV– 21
IV–2.1 Introducing Maintenance into the MAPI-Model IV– 21
IV–2.2 The Control Model . . . . . IV– 26
IV–2.3 An Approximate Method of Determining the Service Life T . . . . . IV– 34
IV–2.4 Summary . . . . . IV– 44
IV–3 An Estimate of Approximations . . . . . IV– 46

IV–4 Modified Assumptions . . . . . IV– 56
IV–4.1 Exponential "Operating Inferiority" . . . . . IV– 56
IV–4.2 Obsolescence in the Cost-Reducing Effect . . IV– 62
IV–4.3 Intermittent Maintenance Policy . . . . . IV– 71
IV–4.4 Profit Tax . . . . . IV– 80
IV–4.5 Adjustment . . . . . IV– 86
IV--4.6 Concluding Remarks . . . . . IV– 87
IV–5 Summary, Part IV . . . . . IV– 91
Appendix IV–1 . . . . . IV–100
