	Review Problem	38
3	Cost Estimation	50
	The Engineering Method	51
	Analysis of Historical Cost Data	53
	Techniques Used to Derive Cost Equations from Past Data	56
	Multiple Regression	73
	Learning Curves and Cost Behavior	81

Evaluating Cost Estimates	83
Conclusion	88

PART 2 COST DATA APPROPRIATE FOR DECISION MODELS, 105

4	Cost–Volume–Profit Decisions	107
	The Economic Model	108
	Profit–Volume Analysis	113
	Additional Applications of Cost–Volume–Profit Analysis	120
	A Multiproduct, Multiconstraint Model	126
	Uncertainty and Cost–Volume–Profit Analysis	133
	Conclusion	133
	<i>Appendix: Using Matrix Algebra to Solve Linear Programming Problems: The Simplex Method</i>	134
5	The Investment Decision	167
	Incremental Analysis	167
	Nondiscounting Approaches to Investment Analysis	185
	Theory Versus Practice	195
	Conclusion	197

6	Additional Considerations in Capital Investment Analysis	226
	Conditions Leading to Conflicts in Investment Rankings	226
	Leasing: A Special Form of Financing	231
	Conclusion	249
7	Inventory Models	265
	Balancing Inventory Costs	266
	Accounting Issues	275
	Conclusion	280

PART 3 STANDARDS AND CONTROL, 289

8	Management Control Systems	291
	Decision Control and Operational Control	291
	Relationship Between Organizational Design and Control Systems	292
	Characteristics of Formal Control Systems	294
	Properties of Performance Indicators	295
	Behavioral Science and Management Control	299

Setting Performance Indicators (Standards)	307
The Feedback Process	314
Management Audits	316
Conclusion	318
9 The Use of Standards and Budgets in Organizational Control	329
Responsibility Accounting	330
Responsibility Centers and Control of Costs	330
Standards of Performance: Some General Considerations	333
Standards for Different Activities	336
Standards for Manufacturing Overhead	345
Service Department Costs	350
The Measurement of Deviations from Standard	352
Conclusion	357
10 The Master Budget	371
The Master Budget	373
Planning Budgets	390
Summary	402
11 Comparison of Standards with Actual Performance: Variance Analysis	418
A Review of the Calculation	418
Variance Analysis in Standard Cost Systems	420
Pure Variance Analysis	438
The Accounting Disposition of Variances	443
Revenue–Cost–Profit Variances	444
Income Statement Variances	447
Conclusion	448
<i>Appendix A: Some Topics in Cost Accounting</i>	449
<i>Appendix B: Mix and Yield Variance</i>	451
12 Assessing the Significance of Standard Cost Variances	476
Levels of Significance	476
Measuring Random Variation	480
The Use of Prior Probabilities in Cost Control	486
Related Variances	489
Decision Significance	493
Conclusion	494
<i>Appendix: Program Evaluation and Review Technique (PERT)</i>	496

PART 4 SPECIAL PROBLEMS IN ANALYZING RECURRING ACTIVITIES, 515

13	Problems in Performance Measurement: Job Order and Process Cost Systems	517
	Environmental Considerations	518
	Job Order Cost Systems	519
	Process Cost Systems	525
	Conclusion	545
14	Cost Allocations: Joint Products, By-Products, and Service Departments	561
	Joint Products	562
	Joint Products and Decision Making	564
	Joint Products and Inventory Costing	570
	Standards and Joint Products	576
	By-Product Accounting	576
	Cost Allocation Versus Market Value Recording of Joint Products	578
	Service Departments	579
	Summary	590
	<i>Appendix: Using Matrix Algebra to Allocate Reciprocal Service Department Costs</i>	594
15	Direct Costing and Absorption Costing	619
	Nature of the Issue	619
	Direct Costing and Internal Reporting	622
	Conflicts in Reporting Purposes	627
	Direct Costing for External Reporting	635
	Conclusion	637
16	Decentralization and Transfer Pricing	650
	Limited Decentralization with Internal Transfers	651
	Complete Decentralization	654
	Accounting Issues	655
	Accounting Implications of Transfer Prices	664
	Summary—Conditions for Using Alternative Bases for Transfer Pricing	667
	Conclusion	669
