The Editors Preface	ix
Geometric analysis of metric Legendre foliated cocycles on contact manifolds via SODE structure FATEMEH AHANGARI	1
Special Vinberg cones, invariant admissible cubics and special real manifolds DMITRI V. ALEKSEEVSKY, ALESSIO MARRANI, and ANDREA SPIRO	31
Bundles of Weyl structures and invariant calculus for parabolic geometries ANDREAS ČAP and JAN SLOVÁK	53
Coverings and pseudosymmetries of differential equations VLADIMIR N. CHETVERIKOV	73
Differential invariants of inviscid flows in pipes ANNA DUYUNOVA	101
Presymplectic gauge PDEs and Lagrangian BV formalism beyond jet-bundles MAXIM GRIGORIEV	111
Minimal realizations of the KP hierarchy, its strict version and their reductions G.F. HELMINCK and E.A. PANASENKO	135
Minimal coupling of gravitational and electromagnetic fields in General Relativity JOSEF JANYŠKA and MARCO MODUGNO	151
Projective-geometric aspects of bi-Hamiltonian structures of KdV type PAOLO LORENZONI and RAFFAELE VITOLO	165
Measurement of random operators, jet geometry and high-order phase transitions VALENTIN LYCHAGIN	179
Metrics admitting projective and c-projective vector fields GIANNI MANNO, JAN SCHUMM, and ANDREAS VOLLMER	193
Lax representations via twisted extensions of infinite-dimensional Lie algebras: some new results OLEG I. MOROZOV	215
Energy functionals and normal forms of knots and plane curves A.B. SOSSINSKY	231
