

# Contents

<b>1</b>	<b>Introduction</b> . . . . .	1
<b>Part I Quantum Entanglement</b>		
<b>2</b>	<b>Photons as Qubits</b> . . . . .	7
2.1	The Discovery of Quantum Particles . . . . .	7
2.2	Properties of Photons . . . . .	9
2.3	The Experiments in this Book . . . . .	15
	References . . . . .	16
<b>3</b>	<b>The First Experiment: Independence</b> . . . . .	19
3.1	Design of the Experiment . . . . .	19
3.2	Result of the Experiment . . . . .	20
3.3	Interpretation of the Result—Independence . . . . .	21
<b>4</b>	<b>The Second Experiment: Equality</b> . . . . .	23
4.1	Design of the Experiment . . . . .	23
4.2	Result of the Experiment . . . . .	25
4.3	Interpretation of the Result . . . . .	25
4.3.1	Classical Interpretation: Hidden Variables . . . . .	25
4.3.2	Quantum Mechanical Interpretation: System State, Instantaneous . . . . .	26
<b>5</b>	<b>The Third Experiment: Spooky Action at a Distance</b> . . . . .	29
5.1	Setup of the Experiment . . . . .	29
5.2	Result of the Experiment . . . . .	31

---

5.3	Interpretation of the Result . . . . .	31
5.3.1	Classical Interpretation: Hidden Variables . . . . .	31
5.3.2	Quantum Mechanical Interpretation: System State, Instantaneous. . . . .	34
	References. . . . .	36
<b>6</b>	<b>Evaluations and Interpretations . . . . .</b>	<b>37</b>
6.1	Structural Observations in the Experiments. . . . .	37
6.2	Modeling in Quantum Theory and Philosophical Implications . . . . .	38
	References. . . . .	41
 <b>Part II Quantum Computing with the Example of Teleportation</b>		
<b>7</b>	<b>Quantum Algorithms Vividly. . . . .</b>	<b>45</b>
<b>8</b>	<b>Quantum Bits and Quantum Registers. . . . .</b>	<b>51</b>
8.1	Representation of a Qubit for Algorithms . . . . .	51
8.2	Quantum Registers Consisting of Two and Three Qubits . . . . .	56
8.3	Measurement in Quantum Registers . . . . .	62
	Reference . . . . .	68
<b>9</b>	<b>Quantum Gates on One Qubit. . . . .</b>	<b>69</b>
9.1	Pauli-X, Pauli-Z and Hadamard (X, Z and H): Gates on One Qubit. . . . .	70
9.2	X, Z, H, Applied to a Qubit in a Quantum Register	72
<b>10</b>	<b>CNOT: A Quantum Gate on Two Qubits . . . . .</b>	<b>83</b>
10.1	CNOT in a Register Consisting of Two Qubits. . . . .	83
10.2	CNOT in a Register Consisting of Three Qubits . . . . .	86
	References. . . . .	87
