

<i>Foreword by Rex Black</i>	<i>xix</i>
<i>Preface</i>	<i>xxiii</i>
<i>How Is This Book Organized?</i>	<i>xxiv</i>
<i>Standalone Chapters</i>	<i>xxiv</i>
<i>References</i>	<i>xxiv</i>
<i>SST and TM Courses</i>	<i>xxiv</i>
<i>Case Studies</i>	<i>xxv</i>
<i>Key Points</i>	<i>xxv</i>
<i>Terminology</i>	<i>xxvi</i>
<i>Who Should Read This Book?</i>	<i>xxvii</i>
<i>Who Are the Authors?</i>	<i>xxvii</i>
<i>Acknowledgments</i>	<i>xxix</i>

Chapter 1 – An Overview of the Testing Process..... 1

A Brief History of Testing	2
Preventive Testing	4
Where Are Most Companies Today?.....	6
Why Is Testing So Difficult?	9
STEP Methodology.....	10
Scope and Objectives of STEP	10
Elements of STEP	12
STEP Architecture	13
Timing of STEP Activities	14
Work Products of STEP.....	17
Roles and Responsibilities in STEP.....	19
Summary of STEP	20

Chapter 2 – Risk Analysis.....23

What Is Risk?.....	26
Software Risk Analysis.....	28
Who Should Do the Analysis?.....	28
When Should It Be Done?.....	29
How Should It Be Done?.....	29
Step 1 – Form a Brainstorming Team.....	31
Step 2 – Compile a List of Features.....	32
Step 3 – Determine the Likelihood.....	33
Step 4 – Determine the Impact.....	34
Step 5 – Assign Numerical Values.....	36
Step 6 – Compute the Risk Priority.....	37
Step 7 – Review/Modify the Values.....	38
Step 8 – Prioritize the Features.....	43
Step 9 – Determine the “Cut Line”.....	44
Step 10 – Consider Mitigation.....	45
Planning Risks and Contingencies.....	47
Project Assumptions.....	51

Chapter 3 – Master Test Planning.....53

Levels (Stages) of Test Planning.....	54
Audience Analysis.....	57
Activity Timing.....	58
Standard Templates.....	60
Sections of a Test Plan.....	61
1.0 – Test Plan Identifier.....	62
2.0 – Table of Contents.....	63
3.0 – References.....	63
4.0 – Glossary.....	64
5.0 – Introduction (Scope).....	64
6.0 – Test Items.....	65
7.0 – Software Risk Issues.....	66
8.0 – Features to Be Tested.....	67
9.0 – Features Not to Be Tested.....	68
10.0 – Approach (Strategy).....	70
Methodology Decisions.....	72
Resources.....	74
Test Coverage Decisions.....	75
Walkthroughs and Inspections.....	76
Configuration Management.....	79
Collection and Validation of Metrics.....	81

Tools and Automation	81
Changes to the Test Plan	82
Meetings and Communications	82
Other Strategy Issues	83
11.0 – Item Pass/Fail Criteria	83
12.0 – Suspension Criteria & Resumption Requirements.....	84
13.0 –Test Deliverables	85
14.0 –Testing Tasks	86
15.0 – Environmental Needs.....	86
16.0 – Responsibilities	88
17.0 – Staffing and Training Needs	89
18.0 – Schedule.....	90
19.0 – Planning Risks and Contingencies.....	91
20.0 – Approvals.....	92

Chapter 4 – Detailed Test Planning97

Acceptance Testing.....	102
Audience Analysis	103
Activity Timing	103
Sources of Information	107
User Responsibilities	108
Usability Testing	108
Usability Labs.....	110
Alpha and Beta Testing	112
Requirements Traceability.....	113
Configuration Management	114
Exit Criteria	115
Release Strategies	116
Pilots.....	116
Gradual Implementation	117
Phased Implementation	118
Parallel Implementation.....	118
Test Environment.....	119
System Testing.....	121
Audience Analysis	121
Sources of Information	122
Software Configuration Management.....	123
Exit/Entrance Criteria	127
Smoke Test	129
Integration Testing	130
Audience Analysis.....	132
Activity Timing	132

Sources of Information	133
Integration Test Planning Issues	134
Configuration Management	135
Test Environments	135
Unit Testing	136
Common Obstacles in Unit Testing	137
Education and Buy-In	138
Standards and Requirements	139
Configuration Management	140
Metrics	140
Reusing Unit Testware	142
Reviews, Walkthroughs, and Inspections	142
Buddy Testing	143

Chapter 5 – Analysis and Design..... 145

Creating Inventories	146
Step 1 Gather Reference Materials	149
Step 2 Form a Brainstorming Team	149
Step 3 Determine Test Objectives	150
Step 4 Prioritize Objectives	151
Step 5 Parse Objectives into Lists	152
Step 6 Create an Inventory Tracking Matrix	153
Step 7 Identify Tests for Unaddressed Conditions	155
Step 8 Evaluate Each Inventory Item	157
Step 9 Maintain the Testing Matrix	158
Design Analysis	158
Black-Box vs. White-Box	159
Black-Box Science	161
Equivalence Partitioning	162
Boundary Value Analysis	165
Decision Tables	166
State-Transition Diagrams	168
Orthogonal Arrays	170
Black-Box Art	173
Ad Hoc Testing	173
Random Testing	175
Semi-Random Testing	176
Exploratory Testing	177
White-Box Science	179
White-Box Testing	179
Cyclomatic Complexity	180
Scalability of White-Box Testing	181

Coverage Techniques.....	181
Test Design Documentation.....	182
IEEE Test Design Specification.....	182
Test Design Specification Identifier.....	184
Feature(s) to Be Tested.....	184
Approach Refinement.....	185
Test Identification.....	185
Feature Pass/Fail Criteria.....	186
IEEE Test Case Specification.....	187
Test Case Specification Identifier.....	189
Test Items.....	189
Input Specifications.....	189
Output Specifications.....	190
Environmental Needs.....	190
Special Procedural Requirements.....	190
Inter-Case Dependencies.....	190
Using a Spreadsheet.....	191
IEEE Test Procedure Specification.....	192
Example Test Procedure.....	194

Chapter 6 – Test Implementation..... 199

Test Environment.....	200
People.....	202
Hardware Configuration.....	204
Cohabiting Software.....	205
Interfaces.....	207
Source of Test Data.....	208
Volume of Test Data.....	211
Strategy.....	212
Model Office Concept.....	213
What Should Be Automated?.....	214
Repetitive Tasks.....	217
Tedious Tasks.....	218
Avoiding Testing Tool Traps.....	219
No Clear Strategy.....	219
Great Expectations.....	220
Lack of Buy-In.....	220
Poor Training.....	220
Automating the Wrong Thing.....	221
Choosing the Wrong Tool.....	221
Ease of Use.....	222
Choosing the Wrong Vendor.....	223

Unstable Software.....	224
Doing Too Much, Too Soon	225
Underestimating Time/Resources	226
Inadequate or Unique Test Environment	226
Poor Timing	227
Cost of Tools	227
Evaluating Testware.....	228
Quality Assurance Group.....	229
Reviews	229
Dry Runs.....	229
Traceability	230
Defect Seeding.....	232
Mutation Analysis.....	235
Testing Automated Procedures	237

Chapter 7 – Test Execution.....239

Before Beginning Test Execution	240
Deciding Who Should Execute the Tests.....	241
Deciding What to Execute First.....	242
Writing Test Cases During Execution	243
Recording the Results of Each Test Case	243
Test Log	244
Test Incident Reports	245
IEEE Template for Test Incident Report	248
Incident Summary Report Identifier.....	249
Incident Summary	249
Incident Description	249
Impact.....	250
Investigation	252
Metrics.....	252
Disposition (Status)	254
Writing the Incident Report	254
Attributes of a Defect Tracking Tool.....	255
Using Multiple Defect Tracking Systems.....	257
Testing Status and Results	258
Measuring Testing Status.....	258
Test Summary Report.....	259
Test Summary Report Identifier	261
Summary	261
Variances.....	262
Comprehensive Assessment	262
Summary of Results	262

Evaluation.....	262
Recommendations	263
Summary of Activities.....	263
Approvals	263
When Are We Done Testing?	264
Defect Discovery Rate	265
Remaining Defects Estimation Criteria	266
Running Out of Resources.....	267
Measuring Test Effectiveness	268
Customer Satisfaction Measures.....	269
Surveys	269
Help Desk Calls.....	272
Defect Measures	272
Number of Defects Found in Testing	273
Production Defects	275
Defect Removal Efficiency (DRE).....	276
DRE Example.....	278
System Test DRE Example	279
Unit Testing DRE.....	280
Defect Age.....	280
Defect Spoilage	282
Defect Density and Pareto Analysis	284
Coverage Measures.....	285
Requirements and Design Coverage.....	286
Code Coverage	287
Code Coverage Weaknesses.....	288
Code Coverage Strengths	290
Global Code Coverage.....	291

Chapter 8 – The Test Organization.....293

Test Organizations	294
Sample Test Organizations	295
Independent Test Teams.....	296
Integrated Test Teams	298
Developers.....	299
Test Coordinator.....	300
Quality Assurance (QA).....	301
Outsourcing	302
Independent Verification & Validation (IV&V) ...	303
Office Environment.....	304
Office Space	304
Location Relative to Other Participants.....	305

Cube vs. Office vs. Common Office	305
Immersion Time.....	306
Quiet Time.....	308
Meetings	309

Chapter 9 – The Software Tester311

Characteristics of Good Testers	312
Finding Good Testers.....	313
Developers.....	313
Users.....	314
Help Desk / Technical Support.....	314
Technical Writers	314
QA Personnel	315
Recent Graduates.....	315
Other Companies (New Hires)	315
Hiring Testers.....	316
Define Job Requirements.....	316
Read the Candidate’s Résumé	317
Prepare Yourself Mentally.....	317
First Impressions Are Important	317
Learn How to Ask Questions.....	318
Ask Candidates to Demonstrate Skills.....	319
Take Notes.....	319
Answer the Candidate’s Questions	320
Check References	320
Team Interviews	320
How Many Testers Do You Need?	321
Retaining Staff	323
Working Overtime	324
Software Tester Certifications.....	326
Value of Certification to Testers.....	329
Help in Getting a Job.....	330
Salary Increase or Promotion	330
Do a Better Job	330
Value of Certification to Test Managers.....	331
Certain Level of Knowledge.....	331
Incentive to Study.....	331
Motivation	332
Career Path	332
Show of Support.....	332
Value of Certification to the Company.....	333
How to Prepare for Certification.....	333

Chapter 10 – The Test Manager.....339

- What Is Management? 340
 - Interpersonal Roles 341
 - Informational Roles 342
 - Decisional Roles 342
- Management vs. Leadership..... 343
 - Leadership Styles..... 344
- Marine Corps Principles of Leadership..... 345
- The Test Manager As a Leader 346
 - Cornerstones of Leadership 346
 - Authority 347
 - Responsibility 348
 - Accountability 348
 - Politics 348
 - Span of Control..... 349
 - Effective Communication 350
- The Test Manager’s Role in the Team..... 351
 - Equal Pay for Equal Jobs..... 351
 - Career Path Development..... 352
 - Desktop Procedures 353
 - Staying Late..... 354
 - Motivation 355
 - Building Morale 356
 - Selling Testing..... 357
 - Manager’s Role in Test Automation..... 358
 - Knowledgeable on State of Practice 358
 - Obtain Adequate Resources 359
 - Ensure Correct Tool Is Selected 359
 - Ensure Proper Integration of Tool 360
 - Provide Adequate Training..... 360
 - Identify and Empower a Champion..... 360
 - Measure the Return on Investment..... 361
- The Test Manager’s Role in Training 361
 - Topics That Require Training..... 362
 - Testing..... 362
 - Tools..... 363
 - Technical Skills 363
 - Business Knowledge 363
 - Communication Skills 364
 - Methods of Training 364

Mentoring	364
On-Site Commercial Training	365
Training in a Public Forum.....	366
In-House Training	366
Specialty Training	367
Metrics Primer for Test Managers	369
Software Measurements and Metrics.....	369
Benefits of Using Metrics	370
Identify Risky Areas That Require More Testing	371
Identify Training Needs.....	372
Identify Process Improvement Opportunities	372
Provide Control/Track Status	372
Provide a Basis for Estimating	373
Justify Budget, Tools, or Training.....	373
Provide Meters to “Flag” Actions	373
Rules of Thumb for Using Metrics	374
Ask the Staff.....	374
Use a Metric to Validate the Metric	374
Normalize the Values of the Metric.....	375
Measure the Value of Collecting the Metric.....	375
Periodically Revalidate the Need for Each Metric	376
Make Collecting and Analyzing the Metric Easy..	376
Respect Confidentiality of Data	377
Look for Alternate Interpretations	377
Present the Raw Data.....	378
Format the Data for the Audience	379
Beware of the Hawthorne Effect	379
Provide Adequate Training.....	381
Create a Metrics Worksheet	381
What Metrics Should You Collect?	382
Metrics Used by the “Best” Projects.....	383
Measurement Engineering Vision.....	385

Chapter 11 – Improving the Testing Process.....387

Improving the Testing Process.....	388
Step 1 Baseline Current Practices	390
Step 2 Develop Vision and Goals	392
Step 3 Formulate/Prioritize Requirements.....	393
Step 4 Establish a Project.....	394
Step 5 Develop a Plan.....	395
Step 6 Introduce Change Incrementally.....	397
Pilots.....	399

Step 7 Measure Results.....	399
Step 8 Return to Step 1	400
Obtain Buy-In Throughout the Process	400
Ask the Practitioners.....	402
Effective Communications	402
Metrics.....	403
Develop Feedback Loops	403
Provide Training.....	404
Pick a Champion and Sponsor.....	404
Post-Project Reviews.....	404
ISO Certification.....	407
ISO Checklists	408
Pros and Cons of ISO Certification	410
Capability Maturity Model (CMM)	411
CMM Level 1 – Initial.....	413
CMM Level 2 – Repeatable.....	413
CMM Level 3 – Defined	414
CMM Level 4 – Managed	415
CMM Level 5 – Optimizing.....	415
Pros and Cons of the CMM	415
Test Process Improvement (TPI) Model	416
Key Areas of the TPI	417
Levels of Maturity	418
Checkpoints	418
Test Maturity Matrix	418
Improvement Suggestions	420
Example TPI Assessment	420
Description for Test Spec. Techniques (5A)	424
Checkpoints for Test Spec. Techniques (5A)	424
Improvements for Test Spec. Techniques (5A).....	425
Continuous Improvement.....	425

Chapter 12 – Some Final Thoughts... ..427

Use Preventive Testing Techniques	429
Conduct Software Risk Analysis	429
Determine Planning Risks	429
Develop a Testing Strategy	430
Use Inventories	430
Use Testing Tools When Appropriate.....	430
Analyze Defect Trends and Patterns	431
Measure Test Effectiveness.....	431
Conduct Training Continually.....	432

Sell the Idea of Testing 432

Appendix A – Glossary of Terms433

Glossary of Terms 434

Appendix B – Testing Survey451

Test and Evaluation Practices Survey 452

Appendix C – IEEE Templates.....459

IEEE Templates 460

Test Documents 461

Test Plan 462

Unit Testing 463

Test Design Specification 464

Test Case Specification..... 464

Test Procedure 465

Test Log 466

Test Incident Report 467

Test Summary Report 468

Test Plan for Process Improvement 468

Appendix D – Sample Master Test Plan.....471

Sample Master Test Plan..... 472

1. Test Plan Identifier 472

2. References 472

3. Introduction 472

4. Test Items 475

5. Software Risk Issues..... 476

6. Features and Functions to Test 476

7. Features Not to Test..... 477

8. Approach 477

Automated Testing Tools 477

Defect Tracking 478

Change Management 478

Test Cycles 479

Metrics..... 479

9. Item Pass/Fail Criteria 479

10. Suspension Criteria and Resumption Req'mts 480

11.	Test Deliverables	480
12.	Remaining Test Tasks	480
13.	Test Environment	481
14.	Staffing and Training Needs.....	481
15.	Responsibilities	482
16.	Schedule	482
17.	Planning Risks and Contingencies	483
18.	Approvals	484
	Appendix A for STQE.net MTP	484
	Appendix B for STQE.net MTP	485
	Appendix C for STQE.net MTP	486
	Appendix D for STQE.net MTP	488

Appendix E – Simplified Unit Test Plan489

	Simplified Unit Test Plan.....	490
1.	Identification	490
2.	References	490
3.	Module/Component/Unit.....	490
4.	Functions/Features (Attributes, Sub-Functions)....	491
5.	Shared Elements	492
6.	Interfaces/Communications	492
7.	Non-Modified or Other Functions and Attributes .	493
8.	External Updates	493
9.	Approach	494
10.	Pass/Fail Criteria	494

Appendix F – Process Diagrams.....495

Appendix G – Bibliography499

	Bibliography	500
