Contents

Introduction to the series v

Preface vii

1. Introduction 1

Part I National and International Planning Models

A. Economic Planning

2. Some Thoughts on Mature Socialism 9
Jan Tinbergen
3. On Models of Planning Regional Development in Hungary . . . 26
Joseph Sebestyén
4. Development Planning 43
Wilbur R. Maki and James E. Angus
5. Economic Adjustment Research for Policy Guidance: An Example from Agriculture 65
Thomas A. Miller
6. Unemployment and the International Division of Labour . . . 89
B. Herman
7. Planning for the United Arab Republic 116
Ragnar Frisch

B. Static and Dynamic Input–Output Models

8. Interregional Input–Output: A State of the Arts Survey 133
Roger F. Riefler

9. An Analysis of United States Commodity Freight Shipments . . 163
Karen R. Polenske
10. Linkages Between Industries in Urban-Regional Complexes . . . 180
Stan Czamanski
11. Application of a Turnpike Theorem to Planning for Efficient Accumulation: An Example for Japan 205
J. Tsukui

Part II Linear Planning Models over Space and Time

A. Spatial Programming Models

12. Optimal Transportation Patterns of Single Commodities in Capacitated Networks. 225
L. J. King, E. Casetti and C. C. Kissling
13. An Application of a Multi-Commodity Transportation Model to the U.S. Feed Grain Economy 243
L. J. Guedry
14. A Spatial Analysis of the U.S. Livestock Economy 261
G. G. Judge, J. Havlicek and R. L. Rizek
15. An Interregional Analysis of the United States Soybean Industry 274
J. V. Leunis and R. J. Vandenborre
16. Pricing and Allocation Models Applied to Problems of Interregional Trade and Location of Industries 298
H. E. Buchholz
17. Experiences with Multi-Commodity Models in Regional Analysis 307
G. Weinschenck, W. Henrichsmeyer and C. H. Hanf

B. Spatial and/or Temporal Programming Models

18. Recursive Programming Models: A Brief Introduction 329
Richard H. Day
19. Dynamic Micro-economic Models of Production, Investment and Technological Change of the U.S. and Japanese Iron and Steel Industries 345
Masatoshi A. Abe
20. An Interregional Recursive Programming Model of the U.S. Iron and Steel Industry 368
Jon P. Nelson
21. Recursive Programming Models of Agricultural Development . . 394
I. Singh

Part III Non-Linear Models over Space and Time

A. Spatial Programming Models

22. Spatial Equilibrium Analysis of Livestock Products in Eastern Japan 419
Kozo Sasaki
23. A Positive Model of Spatial Equilibrium with Special Reference to the Broiler Markets 443
T.-C. Lee and S. K. Seaver
24. A Spatial Analysis of the EEC Trade Policies in the Market for Winter Oranges. 464
P. Zusman, A. Melamed and I. Katzir
25. A Spatial Price Analysis of the World Wheat Economy: Some Long-Run Predictions 488
Andrew Schmitz and D. Lee Bawden

B. Spatial and/or Temporal Models

26. An Evaluation of Policy Alternatives Facing Australian Banana Producers 519
J. W. B. Guise and W. Aggrey-Mensah
27. Allocation and Pricing of Water Resources 536
J. W. B. Guise and J. C. Flinn
28. Allocation of Milk Through Space and Time in a Competitively-Mixed Dairy Industry 557
Marvin W. Kottke
29. Temporal Equilibrium Analysis of Rice and Wheat in India . . 579
V. K. Pandey and T. Takayama
30. An Investigation of Agricultural Planning Models; A Case Study of the Indian's Food Economy 597
S. P. Pant and T. Takayama
31. An Exact Hume–Ricardo–Marshall Model of International Trade 624
Paul A. Samuelson

Part IV Public and Private Planning Models

32. National and Interregional Models of Water Demand for Land Use and Agricultural Policies 651
Earl O. Heady and Howard C. Madsen

33. Evaluation of the Effect of Alternative Agricultural Systems on Water Quality: A Linear Programming Approach 676
E. R. Swanson and A. V. S. Narayanan
34. Capital Budgeting and Financial Management in Linear Programming Models 688
C. B. Baker
35. An Econometric Model of Supply, Demand and Wages of Educated Workers 706
H. Correa

Subject Index 724
