

## CONTENTS

### *Preface*

#### PART I. ESSAYS IN METHODOLOGY

<i>Chapter 1. Foreign exchange shadow prices. A critical review of current theories, by Edmar Bacha and Lance Taylor</i>	3
1 Introduction	3
2 The welfare approach	4
3 Costs of producing foreign exchange	13
4 Equilibrium and parity exchange rates	18
5 Comparisons of the methods and a recommended evaluation rule	25
<i>Chapter 2. Two generalizations of discounting, by Lance Taylor</i>	31
1 Introduction	31
2 General decision rules	32
3 First order decision rules	36
4 Optimal shadow prices for large projects	41
Appendix	42

#### PART II. ESTIMATES OF SHADOW PRICES

<i>Chapter 3. Shadow wages in Chile, by Francis Seton</i>	49
1 Introduction	49
2 The underlying theory of shadow-pricing	50
3 The cost of labour to the project (BP-content)	56
4 The social adjustments	73
5 Summary of results	83
Appendix A: Border prices and the static Pareto optimum	88
Appendix B: The computation of demand-induced labour requirements	92
Appendix C: The social valuation of incremental consumption	96

<i>Chapter 4. Growth and trade distortions in Chile, and their implications in calculating the shadow price of foreign exchange, by Lance Taylor and Edmar Bacha</i>		121
1	Introduction	121
2	Projections of foreign exchange use	122
3	Costs of trade improvement	126
4	Shadow price calculations	139
5	Conclusions	145
 <i>Chapter 5. The cost of capital in the Chilean economy, by Sergio Bitar and Hugo Trivelli</i>		 147
1	Introduction	147
2	Social rate of return in the industrial sector	149
3	Methodology	150
4	Results of the industrial sector	156
5	Discussion of the results	161
6	Other results	163
7	Conclusions	165
 <i>Chapter 6. Investment project analysis in terms of a model of optimal growth, by Lance Taylor</i>		 167
1	Introduction	167
2	Open economy development constraints	168
3	A model for Chile	169
4	Optimality conditions, and their interpretation	174
5	Project evaluation in the optimal growth model	175
6	Functional specifications	178
7	Base year specification and parameter values	179
8	A basic solution	185
9	Variant solutions	190
10	Comparisons to other approaches and conclusions	194
	Appendix: Computation and second order effects	196
 <i>Chapter 7. Project evaluation within a macroeconomic framework, by Peter B. Clark, Alejandro Foxley R. and Anna Maria Jul</i>		 199
1	Introduction	199
2	Description of the macroeconomic model	202
3	Evaluation of the Arauco cellulose project	205
4	Criteria for selecting a project as evaluated within the framework of a multisectoral programming model	208
5	Sensitivity of the evaluation method to changes in the availability of total resources and in the international price of cellulose	214

6	Conclusions	220
	Appendix: Equations and restrictions of the multisector linear programming model	221

## PART III. SECTORAL STUDIES

<i>Chapter 8. Aggregative market responses in developing agriculture: the postwar Chilean experience, by Jere R. Behrman</i>		229
1	Introduction	229
2	Long run Chilean aggregate agricultural market responses	232
3	Short run Chilean aggregate agricultural market responses	238
4	The determination of the rate of change of Chilean aggregate agricultural prices	240
5	The determination of the rate of change of Chilean aggregate agricultural wages	243
6	Conclusions	245
	Appendix: Notational conventions and variable definitions and sources	246
<i>Chapter 9. Cyclical sectoral capacity utilization in a developing economy, by Jere R. Behrman</i>		251
1	Introduction	251
2	Patterns of sectoral utilization of historically attainable capacity in postwar Chile	253
3	The determination of Chilean sectoral outputs of annual real gross domestic product, 1945–1965	260
4	Conclusions	266

## PART IV. INTERNATIONAL TRADE AND DEVELOPMENT STRATEGIES

<i>Chapter 10. Preference for industry and commercial policy theory in industrializing countries, by Edmar Bacha</i>		269
1	Introduction	269
2	The economy described	270
3	Commercial policy alternatives	276
4	Ordering the alternatives	288
	Appendix: A note on the 'trade vs. acid' controversy	289
<i>Chapter 11. The Andean common market: gestation and outlook, by Carlos Diaz-Alejandro</i>		293
1	Introduction	293
2	Some characteristics of the Andean Five	294
3	The road to Cartagena	298
4	Outlook for the Andean customs union: trade creation	303
5	Trade diversion	311

6	Outlook for Andean policies toward intra-Andean factor movements	313
7	Outlook for Andean policies toward non-Andean traders and investors	316
8	Possible future difficulties and dangers of the Andean Group	319
9	Some conclusions	325
<i>Chapter 12. Neoclassical projections of foreign exchange needs in Chile, by L. Taylor</i>		327
1	A neoclassical model for projecting foreign exchange requirements	328
2	Numerical projections	332
<i>Chapter 13. Target shooting with a multisectoral model, by Peter B. Clark and Alejandro Foxley R.</i>		341
1	Introduction	341
2	Multi-sectoral programming models	344
3	Description of the model	345
4	Aggregate adjustments of the models	352
5	Target trade-offs described by policy variations	356
6	Conclusions	365
PART V. STUDIES OF THE EFFECTS OF INFLATION		
<i>Chapter 14. Price determination in an inflationary economy: the dynamics of Chilean inflation revisited, by Jere R. Behrman</i>		369
1	Introduction	369
2	The demand for per capita real monetary balances and aggregate price determination	372
3	The determination of the rate of change of sectoral Chilean prices, 1945–1965	385
4	Conclusions	395
<i>Chapter 15. A study of quarterly nominal wage change determination in an inflationary developing economy, by Jere R. Behrman and Jorge G. Mujica</i>		399
1	Introduction	399
2	The role of expectations of the rate of change of price levels in the determination of sectoral rate of change of nominal wages	401
3	Some possible additional determinant of the rate of change of Chilean sectoral nominal wages	407
4	Conclusions	414
	Appendix: Data sources	415
<i>References</i>		417
<i>Subject index</i>		427
