

CONTENTS

PREFACE	v
INTRODUCTION	1
Purpose of the Study	1
The Setting of the Problem	3
Empirical Experience	3
Estimation Theory	4
Use of Original Source Material	4
Summary of Principal Recent Critiques	5
Outline of Following Chapters	7
 1. THE DISCOVERY OF "HIGHER STATISTICS" IN ECONOMIC RESEARCH	 11
Background	11
American Developments 1911-1930	13
Henry Ludwell Moore	13
Choice of Regression: Henry Schultz and Holbrook Working	19
Elmer Working and the "Marketplace Equilibrium"	23
Sewall Wright and the End of the American Era	28
Stirrings in Europe	33
Jan Tinbergen	33
Ragnar Frisch	36
 2. THE EMERGENCE OF STRUCTURAL ESTIMATION	 47
Background: Macrodynamics and Complete Systems	47
Early Reaction to Complete Systems	50
The Discovery of Statistical Simultaneity	55
The "Cowles Commission Method"	60
Background of the Commission	60
The Theoretical Achievement	62

Beginning Debate over Methodology of Structural Estimation	64
Measurement with Too Many Theories	64
Limitations of Aggregate Linear Difference Equations	68
3. THE HISTORICAL CONTEXT OF STRUCTURAL ESTIMATION	79
The Full Employment Act and Post-War Policies	79
Wartime Price Controls and the Cowles Commission	82
Fiscal Policy and Debates over Taxation	86
Structural Estimation and American Institutionalism	87
The National Bureau of Economic Research	89
The John R. Commons School: Non-Market Policy	90
Comparison to the Cowles Commission Research	91
4. PROMISES AND PROBLEMS OF STRUCTURAL ESTIMATION	99
Attempts to Recruit Mathematical Statisticians	99
Empirical Work at Cowles	101
Introduction	101
Model Specification: Klein's Models I-III and Others	104
Multiple Hypotheses	106
The Friedman Counterattack	108
Retreat from Structure	110
Structural Estimation after Cowles	114
The Klein-Goldberger Model and Its Critics	114
The Econometrica Symposium	118
Monetarist Econometrics I: Friedman-Becker	121
Monetarist Econometrics II: Friedman-Meiselman	124
The Exit of Frisch and Haavelmo from Econometrics	127
Triumph and Crisis of Large Models	128
5. CONTEMPORARY ALTERNATIVES TO SIMULTANEOUS EQUATIONS ESTIMATION	141
Comparative Developments in England 1939-54	141
Introduction	141
Research Orientation at Cambridge	142
Keynesian Influence	142
Statistical Traditions	144
Empirical Work	145

Distributional Assumptions—Orcutt and Cochrane . . .	146
Econometrics of Consumer Demand	147
Theoretical Statistical Work	150
Distributional Assumptions—Durbin and Watson . . .	150
Spread of Time Series Methodology in English Econometrics	151
Tinbergen and the Netherlands Central Planning Bureau . .	152
The Swedish School: Recursive Models and OLS	155
Introduction	155
The Recursive Model	156
Critique of Interdependent Systems	158
Rejection of Maximum Likelihood Estimation	160
Soft Modeling and Partial Least Squares	161
Background	161
Soft Modeling	162
6. EXOGENEITY	171
Introduction	171
A Priori Exogeneity	172
Testing Exogeneity	176
Direct Tests of Structural Models	176
Panel Data and Interviews	177
Granger Causality and Exogeneity	180
Granger Causality, Reduced Forms, and Forecasting .	183
Rational Expectations	185
Structural Autonomy and Exogeneity	185
Analysis of Structure Under Rational Expectations	188
Rational Expectations and Early Structural Estimation	194
Rational Expectations and a Return to Structure	196
7. VECTOR AUTOREGRESSIONS	205
Background	205
Critique of Identification	206
An Alternative Time-Series Methodology	207
Contrast to Structural Methods	209
Estimation and Inference with a VAR	210
Hypothesis Testing	211
Policy Analysis	213
Conclusions about VAR Methodology	217

8. CONCLUSION	223
Review of the Argument	223
Divergent Trends in Modern Econometrics	224
A Role for Methodological Studies	225
BIBLIOGRAPHY	229
INDEX OF NAMES	249
INDEX OF SUBJECTS	253
