

Contents

Part I Introduction

1	Overview of the Issues	3
1.1	Introduction	3
1.2	Climate Science Basics	4
1.3	Socio-Economic Impacts, Mitigation Actions, Adaptation Actions, and Ethics	4
1.4	Economic Sectors and Industries	5
1.5	The Future	6
1.6	Analytic Challenges	6
	References	7

Part II Core Issues

2	Emissions: Types, Effects and Sources	11
2.1	Introduction	11
2.2	Carbon Dioxide Emission Rates and Concentration Levels	12
2.3	Temperature Changes	13
2.4	Other Types of Emissions	16
2.4.1	Short-Lived and Long-Lived Emissions	16
2.4.2	Scope 1, Scope 2, and Scope 3 Emissions	21
2.4.3	Carbon Dioxide Equivalent (CO ₂ e) Emissions	22
2.4.4	Earth's Carbon Budget	22
2.5	Effects of Emissions	22
2.5.1	Extreme Heat and Human Health	22
2.5.2	Droughts, Crop Failures and Wildfires	24
2.5.3	Sea Level Rise, Cyclones and Coastal Flooding	24
2.6	Economic Costs and the Social Cost of Carbon	26
2.7	Sources of Emissions	27
2.7.1	Countries	27
2.7.2	Economic Sectors	27
2.8	Conclusion	28

Annex 2.1: Attribution of the Causes of Extreme Weather Events	28
Annex 2.2: Warming in the Arctic	30
Annex 2.3: Annual State of the Global Climate Reports	32
Questions to Ponder	33
References	33
3 The Big Emitters and The Most Vulnerable People	39
3.1 Introduction	39
3.2 Comparative Overview of Emissions	40
3.3 Profiles of The Big Emitters	43
3.3.1 European Union (EU-27)	43
3.3.2 Germany	47
3.3.3 US	48
3.4 Mitigation Policy	50
3.4.1 China	52
3.4.2 India	54
3.4.3 Comparative Ratings of Big Emitters	55
3.5 Vulnerable Countries	56
3.5.1 Extreme Weather Events	56
3.5.2 Islands	57
3.6 Multiple Crises in East Africa	61
3.7 Compensation Issues: “Loss and Damage”	63
3.8 Ethical Issues	66
3.9 Conclusion	67
Annex 3.1: EU Emission Trading System (ETS)	67
Annex 3.2: Emissions and Mitigation Policies of the UK	69
Annex 3.3: Comparisons of Consumption-Based and Production-Based Accounting of National Emissions	69
Annex 3.4: Vulnerabilities of SIDS	70
Questions to Ponder	72
References	73
4 International Agreements	79
4.1 Introduction	79
4.2 The Beginning (1972–1990)	80
4.2.1 UN Scientific Conference in Stockholm: The First Earth Summit (1972)	80
4.2.2 First World Climate Conference (1979)	80
4.2.3 World Climate Research Programme (1980)	80
4.2.4 Convention on Long-Range Transboundary Air Pollution (1983) and Gothenburg Protocol (1999)	81
4.2.5 Toronto Conference (1988)	81
4.2.6 Intergovernmental Panel on Climate Change (IPCC) (1988 ...)	81
4.2.7 Second World Climate Conference (1990)	82
4.3 The Framework Convention on Climate Change (1992 ...)	82

4.3.1	COP 1: Berlin Mandate (1995)	83
4.3.2	Kyoto Protocol (1997)	84
4.3.3	COP 21 Paris Agreement (2015)	85
4.3.4	COP 26 in Glasgow (2021)	87
4.3.5	COP 27 in Sharm El-Sheikh (2022)	89
4.4	Conclusion	91
Annex 4.1: Climate Change Programs in International Organizations		92
Annex 4.2: International Trade Issues		93
Questions to Ponder		95
References		96

Part III Sectors

5	Fossil Fuels	103
5.1	Introduction	103
5.2	Fossil Fuel Production	104
5.3	Emissions	106
5.3.1	Trends and Components in Fossil Fuel Emissions	106
5.3.2	Methane Emissions	107
5.4	Issues About Industry Public Positions	108
5.5	Fossil Fuel Subsidies	109
5.6	Mitigation Policies and Actions	111
5.7	Conclusion	114
Annex 5.1: International Agreements on Fossil Fuels		114
Annex 5.2: Letters Exchanged by the British Royal Society and ExxonMobil in 2006		119
Annex 5.3: Fossil Fuel Subsidy Levels		120
Questions to Ponder		121
References		122
6	Electric Power	127
6.1	Introduction	127
6.2	Emissions	128
6.3	Renewable Technologies	130
6.4	Mitigation Options	130
6.5	Nuclear Alternatives	133
6.6	Conclusion	134
Annex 6.1: UN Energy Program ‘Deliverables’ for 2025		134
Questions to Ponder		135
References		135
7	Transportation	137
7.1	Introduction	137
7.2	Emission Patterns and Trends	137
7.3	Technologies and Policies	139

7.4	Conclusion	144
	Annex 7.1: Chronology of Climate Change Issues at the International Civil Aviation Organization (ICAO)	144
	Annex 7.2: Chronology of Climate Change Issues at the International Maritime Organization (IMO)	145
	Questions to Ponder	146
	References	146
8	Industry	149
8.1	Introduction	149
8.2	Emission Patterns and Trends	150
8.3	Cement	150
8.4	Steel	152
8.5	Petrochemicals	153
8.6	Conclusion	154
	Annex 8.1: Key Features of Cement, Steel and Petrochemical Production Processes	154
	Questions to Ponder	156
	References	156
9	Buildings	159
9.1	Introduction	159
9.2	Emissions	160
9.3	Mitigation and Adaptation Measures	161
	9.3.1 Building Construction and Operational Issues	161
	9.3.2 Operational Issues: Space Heating and Cooling	163
9.4	Conclusion	164
	Annex 9.1: Building Design: Interdisciplinary Challenges for Architects	165
	Annex 9.2: Sufficiency, Efficiency, Renewable Analytic Framework	166
	Questions to Ponder	167
	References	167
10	Agriculture, Aquaculture, Food, Forests and Other Land and Ocean Uses	169
10.1	Introduction	169
10.2	Agriculture	169
	10.2.1 Agricultural Vulnerabilities to Climate Change	169
	10.2.2 Agricultural Adaptation Measures	170
	10.2.3 Agricultural Emissions	170

10.2.4	Measures to Mitigate Agricultural Emissions	171
10.2.5	Agricultural Carbon Sinks	173
10.3	Forests	173
10.4	Aquaculture	175
10.4.1	El Nino and La Nina	175
10.4.2	Aquaculture Vulnerabilities to Climate Change	176
10.4.3	Oceans as Carbon Sinks	177
10.5	Conclusion	177
	Annex 10.1: The Case of Changes in the Gulf of Maine	178
	Questions to Ponder	180
	References	181
11	Finance	185
11.1	Introduction	185
11.2	Insurance	186
11.2.1	Insurance Exposures to Climate Related Risks	186
11.2.2	Environmental, Social, and Governance Issues (ESG)	188
11.3	Investment	188
11.3.1	Stranded Assets	189
11.3.2	Greenwashing	191
11.4	Conclusion	193
	Questions to Ponder	194
	References	194

Part IV The Future

12	Climate Model Projections and Potential Action Paths	199
12.1	Introduction	199
12.2	Projections of Temperatures	200
12.3	Melting Ice in the Arctic and Antarctic Regions with Global Consequences	203
12.3.1	Effects on Sea Level Rise	203
12.3.2	Effects on Ocean Currents	204
12.4	Climate Tipping Points (CTPs)	205
12.5	Another Type of Tipping Point: Investment and Economic Growth Opportunities	208
12.6	Political-Economy: “The Tragedy of the Commons” and “Market Failures”	210
12.7	Conclusion	211
	Annex 12.1: Climate Change Models: Features, Issues and Applications	212
	Annex 12.2: Sector-Specific Policies and Priorities for Action	214
	Annex 12.3: Systemic Shocks	215

Annex 12.4: Data About the Earth's Carbon Budget	217
Annex 12.5: The Problematic Paradox of Atmospheric Cooling Above the Troposphere	217
Questions to Ponder	218
References	219
