Introduction	1
--------------	---

PART ONE

INTERREGIONAL TRADE SIMPLIFIED

CHAPTER I

A Condition of Interregional Trade	5
------------------------------------	---

1. Simplifications, 5; 2. Interregional differences in productive factor endowment, 6; 3. Differences in relative commodity and factor prices as conditions of trade, 7; 4. The price system in isolated and trading regions, 10; 5. Character of interregional trade, 12; 6. The exchange rate and interregional price differences, 13; 7. Illustrations, 15; 8. Summary, 19; 9. Notes on similar viewpoints in works by earlier writers, 20

CHAPTER II

On Some Effects of Interregional Trade	24
--	----

1. Tendency toward equalization of factor prices, 24; 2. No complete equalization, 26; 3. Gain from interregional trade, 27; 4. Effects upon factor prices in terms of commodities, 29; 5. Generalization of one idea underlying classical law of comparative costs, 31; 6. Summary, 34

CHAPTER III

Another Condition of Interregional Trade	35
--	----

1. Modifications of the atomistic price theory, 35; 2. Lack of divisibility, 36; 3. Large-scale economies as a cause of trade, 38; 4. Effects of trade due to economies of large-scale production, 40

CHAPTER IV

A Variation of Interregional Trade	42
------------------------------------	----

1. Relative factor prices and terms of trade after a change in demand, 42; 2. Reactions of factor supply, 45

PART TWO

INTERNATIONAL TRADE SIMPLIFIED

CHAPTER V

International Comparisons of Productive Factors	49
---	----

1. Introduction, 49; 2. Different groups of labor, 50; 3. Different natural resources, 54; 4. Different capital factors,

- 55; 5. International comparisons of unskilled labor, 56;
- 6. International comparisons of other labor qualities, 58;
- 7. Comparisons of capital factors and natural resources, 59;
- 8. International differences in the stability of productive conditions and risks, 61

CHAPTER VI

Some Fundamentals of International Trade

63

- 1. Summary of certain conclusions in Part One, 63; 2. Influence of qualitative differences within the same subfactor, 64;
- 3. Qualitative differences of commodities and services, 65;
- 4. Qualifications of the observation that trade tends to equalize factor prices, 66; 5. Further qualifications, 67; 6. Exceptions to the rule, 69; 7. Trade as an equalizer of costs of production, 72; 8. Trade and economies of large-scale production, 73; 9. Differences in the stability of economic conditions, 74; 10. Effects on trade of differences in taxation and other social conditions of production, 75; 11. Summary, 76

CHAPTER VII

Reactions of Demand for Goods and Supply of Productive Factors

78

- 1. Reaction of taste, 78; 2. Reactions of factor supply, 79;
- 3. Increases in international differences in factor supplies caused by trade, 81; 4. Changes in quality of labor and capital caused by trade, 85; 5. Trend of future international trade, 86; 6. Summary, 88; 7. Gain from international trade, 89; 9. Cases of location, 90

PART THREE

COMMODITY AND FACTOR MOVEMENTS

CHAPTER VIII

Interregional Costs of Transfer of Commodities

97

- 1. Introduction, 97; 2. Preliminary analysis of the influence of obstacles to interregional commodity movements, 97; 3. Distance and the character of trade, 101; 4. Relation between transfer costs for raw materials and finished goods, 101; 5. Interregional prices, 104; 6. Interregional prices, continued, 107; 7. Difficulties with price indices, 109; 8. Prices of productive factors in different regions, 110; 9. Differences in factor supplies and prices, 112; 10. Friction and interregional prices, 112; 11. Summary, 114

CHAPTER IX

Interregional Factor Movements and Their Relation to Commodity Movements

115

- 1. Factor movements as an alternative to trade, 115; 2. Influence of factor movements on volume and character of trade,

117; 3. Influence of factor movements on trade, continued, 119; 4. Influence of changes in transfer conditions on factor movements, 121; 5. Various combinations of commodity and factor movements as alternatives, 123; 6. Some dynamic aspects of factor movements and their relation to trade, 124

CHAPTER X

Interior Transfer Costs and Factor Movements: Some Aspects of a General Location Theory 127

1. The Thünen Case, 127; 2. Relative mobility of raw materials and finished goods in simple cases, 128; 3. Relative mobility in complicated cases, 130; 4. Location of raw material production, 132; 5. Location of consumers' markets, 133; 6. Local differences in transportation resources and facilities, 135; 7. Local differences in transportation resources and facilities, continued, 136; 8. Economies of scale in transportation and the pricing of transport services, 138; 9. Local distribution of labor and capital, 139; 10. Economies of scale in industry, 140; 11. Review of location, 142; 12. Transfer costs other than transportation costs, 145

CHAPTER XI

Local Differences in Labor and Capital Supply: Location Theory, Continued 146

1. Equalizing wages, 146; 2. Influence of equalizing wages, 147; 3. Real wage differences, 149; 4. Interest differences, 152; 5. Influence of local differences in the supply of labor and capital, 153; 6. Interaction of factor and commodity movements, 154; 7. Illustrations, 157

CHAPTER XII

Interregional Trade Theory as Location Theory 159

1. Introduction, 159; 2. A bird's-eye view of pricing, 159; 3. Importance of the region concept, 160; 4. Reactions of the so-called basic elements of pricing, 161; 5. Arbitrary elements in location, 163; 6. Arbitrary local price differences, 164

PART FOUR

INTERNATIONAL TRADE AND FACTOR MOVEMENTS

CHAPTER XIII

International Trade 169

1. Introduction, 169; 2. Obstacles to international commodity movements, 170; 3. Division of national markets, 173; 4. Relative mobility of goods at different stages of their production, 177; 5. Local differences in transfer facilities, 178; 6. Transfer facilities, factor supplies, and the character of in-

dustry, 180; 7. Location as a product of economic development, 181; 8. International trade of the United States, 184; 9. Meaning of the effects of and the gain from international trade, 185; 10. Effects of and gain from a reduction in transport costs in international trade, 187

CHAPTER XIV

International Price Relations 188

1. Commodity prices, 188; 2. Wages, interest rates, and rents, 188; 3. Why wages differ in various countries, 190; 4. Why the commodity price level is higher in the United States than in Europe, 192; 5. Note on Ricardo and Senior, 194; 6. Domestic price differences, 195

CHAPTER XV

Some Effects of Import Duties 196

1. On tariffs and the location of industry, 196; 2. On imports and exports, 197; 3. On national income, 198; 4. On distribution of income, 200; 5. On the supply of productive factors, 203; 6. On interior location, 206

CHAPTER XVI

International Capital and Labor Movements 208

1. Incentives and obstacles, 208; 2. Economic causes, 213; 3. Relation between international factor movements and international trade, 214; 4. Effect of capital movements on trade and income, 216; 5. International migrations, 218; 6. Movements of capital and labor, 220; 7. Effects on "outside" countries, 223; 8. Connection between different types of international factor movements, 224; 9. Reactions of international factor movements and trade to changed mobility of commodities, 226; 10. Effect of labor movements on quality of labor, 230; 11. Reactions of domestic factor supply, 231; 12. Special aspects, 232

PART FIVE

MECHANISM OF INTERNATIONAL TRADE
VARIATIONS AND CAPITAL MOVEMENTS

CHAPTER XVII

Equilibrium in International Trade 235

1. Governing elements, 235; 2. The foreign exchange problem, 238; 3. Interrelations of various elements in the balance of payments, 239; 4. Short-term international capital movements, 240; 5. International gold movements, 243; 6. Reactions of credit volume and buying power, 244; 7. Criticism of the orthodox view of the role of gold movements, 246

Contents

xv

CHAPTER XVIII

The Mechanism of Domestic Capital Movements 248

1. A simple case, 248;
2. Relative price variations, 249;
3. Mobility of labor and capital instruments, 250;
4. Illustrations, 250

CHAPTER XIX

The Mechanism of International Capital Movements 252

1. Transfer of buying power, 252;
2. Nature of international capital movements, 253;
3. Monetary mechanism, 255;
4. Preliminary analysis of terms of trade, 258;
5. Relative prices of factors of production, 259;
6. Commodity price levels and terms of trade, 261;
7. Situation in the capital exporting country, 262;
8. A controversial point, 264

CHAPTER XX

The Mechanism of International Capital Movements, Continued 266

1. Size of buying power variations, 266;
2. Terms of trade, 267;
3. Influence of tariffs, 268;
4. Transport costs, 269;
5. Changes in volume of capital movements, 270

CHAPTER XXI

Import Duties and Price Adjustments 273

1. Effect of duties on relative prices, 273;
2. Protective duties, 275;
3. Terms of trade, 277;
4. The monetary mechanism, 281;
5. Duties as means of better utilizing productive capacity, 282

CHAPTER XXII

International Price Variations 287

1. Monetary variations, 287;
2. Determination of foreign exchange rates, 289

APPENDICES

I. Simple Mathematical Illustration of Pricing in Trading Regions 297

1. An isolated region, 297;
2. Trading regions, 300;
3. Certain conditions of trade, 302;
4. A generalization, 303

II. Reflections on Contemporary International Trade Theories 305

Index 322
