

# CONTENTS

ACKNOWLEDGMENTS . . . . .	vi
PREFACE . . . . .	vii

## *Chapter 1*

THE NATURE OF EQUIPMENT MAINTENANCE PROBLEMS . . . . .	1
1.1. Introduction . . . . .	1
1.2. Setting of the Problem . . . . .	2
1.3. Deterministic Maintenance Policies . . . . .	5

## *Chapter 2*

MAINTENANCE POLICIES FOR STOCHASTICALLY FALLING EQUIPMENT	13
2.1. Introduction . . . . .	13
2.1.1. Preliminary Concepts . . . . .	13
2.1.2. Alternative Criteria . . . . .	15
2.1.3. Renewal . . . . .	17
2.1.4. Alternative Maintenance Actions and Models . . . . .	19
2.2. Preventive Maintenance Policies . . . . .	22
2.2.1. Single Component Equipment . . . . .	22
2.2.2. Equipment with Several Parts . . . . .	23
2.2.3. Operating Characteristics . . . . .	25
2.3. Preparedness Maintenance Policies . . . . .	32
2.3.1. Single Component Equipment . . . . .	32
2.3.2. Equipment with Several Parts. . . . .	35
2.3.3. Models with Several States and Several Actions . . . . .	38
2.3.4. Operating Characteristics . . . . .	39
2.4. Maintenance Policies for Uncertain Failure Distributions . . . . .	45
2.4.1. Introduction . . . . .	45
2.4.2. Minimax Policies . . . . .	45
2.4.3. Bounds on Costs . . . . .	46
2.4.4. Adaptive Policies . . . . .	48
2.5. An Approach to the Theory of Maintenance . . . . .	49

*Chapter 3*

THE OPTIMALITY OF MONOTONE MAINTENANCE POLICIES . . . . .	51
3.1. Introduction . . . . .	51
3.2. Simple Replacement in a Markovian Environment . . . . .	53
3.3. Preventive Maintenance in a Markovian Environment. . . . .	57
3.4. Inspection in a Random Environment. . . . .	60
3.5. Preparedness: Replacement and Inspection of a Single Part in the Presence of Several Monitored Parts . . . . .	64
3.5.1. Continuous Time Formulation . . . . .	68
3.5.2. Inspection . . . . .	68
3.6. Preventive Maintenance: Replacement of a Single Part in the Presence of Several Parts with Constant Failure Rates . . . . .	68

*Chapter 4*

OPTIMAL POLICIES FOR THE PREVENTIVE MAINTENANCE MODEL . . . . .	70
4.1. Introduction . . . . .	70
4.2. Structure of the Optimal Policies. . . . .	71
4.3. Periodic Preventive Maintenance Policy . . . . .	71
4.4. Operating Characteristics for Periodic Preventive Maintenance. . . . .	76
4.5. Adaptive Preventive Maintenance Policies. . . . .	78
4.5.1. Introduction . . . . .	78
4.5.2. Fully Adaptive Policy . . . . .	78
4.5.3. Adaptation of Parameter Estimates . . . . .	79
4.6. Opportunistic Preventive Maintenance Policy. . . . .	79
4.7. Operating Characteristics for the Opportunistic Preventive Maintenance Model	84

*Chapter 5*

OPTIMAL POLICIES FOR THE PREPAREDNESS MAINTENANCE MODEL . . . . .	88
5.1. Introduction . . . . .	88
5.2. Structure of the Optimal Policies. . . . .	90
5.3. Periodic Inspection and Replacement Policies. . . . .	91
5.3.1. Periodic Replacement . . . . .	91
5.3.2. Periodic Inspection for Exponentially Failing Equipment. . . . .	94
5.3.3. Operating Characteristics . . . . .	98
5.3.4. The Choice Between Inspection and Replacement Without Prior Inspec- tion in the Exponential Case. . . . .	99
5.4. Adaptive Inspection and Replacement Policies. . . . .	100

*Chapter 6*

**OPPORTUNISTIC POLICIES FOR THE PREPAREDNESS MAINTENANCE MODEL . . . . . 107**

6.1. Introduction . . . . . 107

6.2. Structure of the Optimal Policies . . . . . 109

6.3. Opportunistic Replacement Policies. . . . . 112

6.4. Opportunistic Inspection Policies. . . . . 118

6.5. Opportunistic Inspection and Replacement Policies. . . . . 119

6.6. Operating Characteristics for Opportunistic Replacement Policies . . . . . 121

6.7. Operating Characteristics for Opportunistic Inspection Policies . . . . . 127

6.8. Operating Characteristics for Opportunistic Inspection and Replacement Policies . . . . . 129

*Chapter 7*

**APPLICATIONS OF THE PREVENTIVE MAINTENANCE MODEL. . . . . 132**

7.1. Introduction . . . . . 132

7.2. Failure Distributions . . . . . 134

7.3. Relative Cost of Failure During Operation. . . . . 146

7.4. Determining the Optimal Policy. . . . . 148

7.5. The Value of Preventive Maintenance. . . . . 156

7.6. Opportunistic Preventive Maintenance. . . . . 162

7.7. Appendix A: Estimation Procedures. . . . . 167

7.8. Appendix B: Determining the Optimal Policies for Normal, Log-Normal and Gamma Distributions . . . . . 173

    7.8.1. Normal Distribution . . . . . 173

    7.8.2. Log-Normal Distribution . . . . . 175

    7.8.3. Gamma Distribution . . . . . 178

*Chapter 8*

**APPLICATIONS OF OPPORTUNISTIC POLICIES FOR THE PREPAREDNESS MAINTENANCE MODEL . . . . . 180**

8.1. Introduction . . . . . 180

8.2. Description of a Typical Ballistic Missile System. . . . . 181

8.3. Proposed Maintenance Policies for Missiles. . . . . 183

8.4. Comparisons of the Proposed Maintenance Policies. . . . . 188

8.5. Operating Characteristics for the  $(n_1, n_2, N)$  Opportunistic Policy . . . . . 199

8.6. Conclusion . . . . . 200

*Chapter 9*

APPLICATIONS OF ADAPTIVE POLICIES FOR THE PREPAREDNESS MAINTENANCE MODEL . . . . .	202
9.1. Introduction . . . . .	202
9.2. The Bayes Procedure . . . . .	204
9.3. Comparison of Bayes and Non-Bayes Recycle Policies. . . . .	207
BIBLIOGRAPHY . . . . .	215
AUTHOR INDEX. . . . .	220
SUBJECT INDEX. . . . .	222
