FOREWORD	v
PREFACE	vii
I. A MODEL WITH CONSTANT PROFIT EXPECTATIONS	1
1.0 Introduction	1
1.1 General assumptions	1
1.2 Relations of the model	3
1.3 Solution of the symmetrical model	12
1.4 Description of the business cycle	14
1.5 Economic policy	22
II. MACROECONOMICS: THE CLOSED ECONOMY	27
2.1 Introduction	27
2.2 Basic model II	30
2.3 The solution of the model	38
2.4 Description of the business cycle	41
2.5 Economic policy	45
2.6 Some tentative conclusions	55
III. MACROECONOMICS: THE OPEN ECONOMY	57
3.1 Introduction	57
3.2 The new relations	60
3.3 Basic model III and its solution	67
	xiii

3.4 Description of the business cycle	69
3.5 Economic policy	69
3.6 The resonance effect	84
IV. SEPARATE LABOUR MARKETS: THE SIGNIFICANCE OF THE REGIONAL DEMAND AND PRICE SYSTEM	87
4.1 Introduction	87
4.2 The relations	89
4.3 The solution of the model	91
4.4 Description of the business cycle	93
4.5 Economic policy	104
V. SEPARATE LABOUR MARKETS: THE SIGNIFICANCE OF THE REGIONAL SUPPLY BALANCE	115
S	
5.1 Introduction	115
5.2 The relations	115
5.3 The solution of the model	116
5.4 Description of the business cycle	117
5.5 Economic policy	129
APPENDICES	
Appendix 1.1 Regions (countries) of different sizes	137
1.1.1 Introduction	137
1.1.2 The new model and the solution: the data	138
1.1.3 Description of the business cycle and some conclusions	139
Appendix 1.2 Systems of linear difference equations	145
1.2.1 The matrix presentation of a linear difference equation	145
1.2.2 Systems of difference equations	146
Appendix 2.1 Yield definitions and investment function	147
2.1.1 The closed economy	147
2.1.2 The open economy	148
2.1.3 The investment function	149

Appendix 2.2 The wage determination function	150
Appendix 3.1 The $\tilde{\mu}$ -mechanism	151
