

## Contents

Introduction	1
1 Demand and Equilibria	6
1.1 Introduction	6
1.2 Individual demand	7
1.3 Market demand	11
1.4 Equilibria	17
1.5 Concluding remarks	21
2 Smoothing Demand by Aggregation	23
2.1 Many different consumers	23
2.2 Convexifying by averaging	30
2.3 Concluding remarks on diversification	32
3 Spaces of Preferences and Large Economies	34
3.1 Introduction	34
3.2 Preference relations	35
3.3 Spaces of preference relations	42
3.4 Large economies	48
4 Heuristic Remarks on Some Basic Concepts	53
4.1 Genericity	53
4.2 Stability	56
4.3 Equal distribution	59
4.4 The law of large numbers	61
5 The Parametric Approach	65
5.1 Introduction	65
5.2 Dispersion of tastes	67
5.3 Continuous mean demand	71
5.4 Differentiable mean demand	88
5.5 Concluding remarks	94
6 The Ergodic Approach	98
6.1 Introduction	98
6.2 G-dispersion	104
6.3 Continuous mean demand	118
6.4 Differentiable mean demand	124
6.5 Concluding remarks	157

7 Other Approaches	161
7.1 Dispersion of unit normals	161
7.2 Infinite dimensional linear spaces of preferences	166
7.3 Random individual demand	171
7.4 The generic approach	175
8 Mathematical Tools	179
8.1 Miscellany	179
8.2 Differential topology	184
8.3 Measure theory	189
Notation	196
References	199
