

Table of contents

Acknowledgments.....	viii
Introduction	1
Chapter 1: Theoretical principles and background on German phonology.....	4
1.1 Theoretical overview	4
1.1.1 Lexical Phonology	4
1.1.2 Syllable structure and syllabification.....	8
1.1.3 Feature geometry.....	9
1.1.4 Underspecification.....	10
1.1.5 Other constraining principles in nonlinear phonology.....	12
1.2 Background on German phonology.....	13
1.2.1 On "Standard German"	13
1.2.2 Phonetic inventory.....	14
1.2.3 Underlying segmental inventory.....	21
1.2.4 German word stress.....	23
1.2.5 Vowel quantity and quality.....	27
1.2.6 German schwa	33
1.2.7 On the cycle in German phonology	37
Notes to Chapter 1	40
Chapter 2: German syllable structure and syllabification.....	41
2.1 Syllabification model and theoretical assumptions.....	41
2.2 Further remarks on syllable structure	46
2.3 On ambisyllabicity	49
2.4 Syllable- and foot-sensitive rules.....	52
2.4.1 Devoicing.....	53
2.4.2 Aspiration.....	53
2.4.3 R-Vocalization.....	56
2.4.4 Glottal Stop Insertion.....	58
2.5 Syllable Structure Algorithm.....	59
2.6 The sonority hierarchy.....	63
2.7 The German onset.....	65
2.7.1 One member onsets.....	65
2.7.2 Two member onsets	66
2.7.3 Three member onsets.....	68

2.7.4	Additional syllable-initial clusters	69
2.7.5	Syllable-initial constraints.....	70
2.7.6	Obstruent + nasal onsets.....	72
2.7.7	Obstruent + [v] onsets	73
2.7.8	Coronal Fricative Adjunction and s-Dissimilation.....	74
2.8	On the cyclicity of syllabification.....	81
2.9	Fast Speech Resyllabification	92
2.10	Rubach (1990).....	96
2.11	On compounds and prefixed words and postlexical resyllabification.....	100
2.11.1	Prosodification Constraint.....	101
2.11.2	Postlexical resyllabification	108
2.12	The German coda	110
2.12.1	One member codas.....	111
2.12.2	Two member codas.....	111
2.12.3	Coda clusters of more than two members.....	115
2.12.4	Coda constraints	121
2.13	Devoicing and Coronal Obstruent Adjunction.....	124
2.14	Remarks on the syllable structure of monomorphemes.....	126
Notes to Chapter 2		130
Chapter 3:	The syllabification of glides and vowels.....	134
3.1	Hiatus sequences and the German diphthongs.....	134
3.2	The syllabification of diphthongs	142
3.3	On the voiced fricatives [j] and [v].....	153
3.3.1	[j].....	153
3.3.2	[v].....	162
3.4	Prevocalic glides.....	168
3.4.1	Obligatory prevocalic glides	169
3.4.2	Optional prevocalic glides.....	172
3.5	On Structure Preservation.....	182
Notes to Chapter 3		184
Chapter 4:	The velar nasal and the representation of schwa.....	188
4.1	Lexical processes involving nasal consonants.....	188
4.1.1	Lexical Nasal Assimilation	188
4.1.2	Lexical Nasal Spreading.....	192
4.2	Postlexical processes involving nasal consonants	193
4.2.1	Progressive Nasal Assimilation.....	193
4.2.2	Regressive Nasal Assimilation.....	197
4.3	The velar nasal.....	199
4.3.1	On the phonemic status of [ŋ].....	200
4.3.2	g-Deletion as a cyclic rule.....	202

4.3.3	Additional comments on g-Deletion.....	207
4.4	The representation of schwa.....	208
4.5	Cyclic syllabification and Schwa Epenthesis.....	213
4.6	On Structure Preservation.....	216
Notes to Chapter 4.....		218
Chapter 5:	The distribution of [ç] and [x].....	220
5.1	Background and data	220
5.2	DFA and the German lexicon.....	224
5.3	[ç] - [g] alternations.....	227
5.4	On Structure Preservation.....	232
Notes to Chapter 5.....		234
References	237
